Contents

Foreword IX

1. Diagnosis of distal ulcerative colitis (and cryptogenetic proctitis). What are the criteria needed in clinical practice and trials?
Marc Lémann 1

Discussion 8

2. Efficacy criteria in the treatment of distal ulcerative colitis
Stephen B. Hanauer 13

Discussion 23

3. Dosage forms for ulcerative colitis treatments
Jean-Marc Aiache 29

Discussion 43

4. Efficacy and tolerance of topical treatments for active ulcerative colitis: corticosteroids, budesonide
Antoine Cortot 47

5. Efficacy and tolerance of rectal 5-aminosalicylic acid for distal ulcerative colitis
John K. Marshall, E. Jan Irvine 55

Discussion of chapters 4 and 5 65

6. Local treatments for distal ulcerative colitis and cryptogenetic proctitis. The situation in France
Philippe Marteau, Gérard Schénowitz 69

7. Treatment strategies for distal colitis in USA
Stephen B. Hanauer 79

Discussion of chapters 6 and 7 84

8. Management of refractory proctitis
Daniel H. Present 87

Discussion 96
