CONTENTS

	PREFACE	ix
1	INTRODUCTION TO MAXWELL'S EQUATIONS AND WAVES	1
	1.1 Introduction	1
	1.2 Maxwell's Equations and the Lorentz Force Law	2
	1.3 Uniform Plane Waves	6
	1.4 Time-Harmonic Fields	11
	1.5 Polarization	14
	1.6 The Poynting Theorem	22
	1.7* The Energy Theorem	29
	1.8* Uniqueness	31
	1.9 Nonelectromagnetic Waves	34
	1.10 Summary	37
	1.11 Problems	39
2	RADIATION BY CURRENTS AND CHARGES IN FREE SPACE	46
	2.1 Static Solutions to Maxwell's Equations	46
	2.2 Radiation by Dynamic Currents and Charges	52
	2.3 Radiation from a Hertzian Dipole	55
	2.4 Radiation from Arrays of Hertzian Dipoles	64

2.5	Summary	72
2.6	Problems	73
3	**WAVES IN MEDIA**	**76**
3.1	Types of Media	76
3.2	Polarizable Media	77
3.3	Anisotropic Media	80
3.4	Waves in Lossy Media	87
3.5	Waves in Dispersive Media: Phase and Group Velocities	96
3.6	Waves in Plasmas	99
3.7*	Gyromagnetic Media	106
3.8*	Faraday Rotation	108
3.9	Summary	110
3.10	Problems	111
4	**WAVES AT PLANAR BOUNDARIES**	**117**
4.1	Boundary Conditions	117
4.2	Reflection and Transmission of Normally Incident Plane Waves	124
4.3	Non-normal Incidence of Plane Waves in Lossless Media	141
4.4*	Non-normal Incidence of Plane Waves in Lossy Media	157
4.5*	Current Sheets at Planar Boundaries	163
4.6	Summary	170
4.7	Problems	172
5	**TRANSMISSION LINES**	**177**
5.1	Introduction	177
5.2	Parallel-Plate Lines	178
5.3*	General *TEM* Transmission Lines	186
5.4	The Coaxial Cable and Other Transmission Line Examples	197
5.5	Time-Domain Analysis of Transmission Lines	205
5.6	Periodic Transmission Lines with Lumped Elements	207
5.7	Summary	216
5.8	Problems	217
6	**TRANSMISSION LINE SYSTEMS**	**220**
6.1	Impedance, Reflection, and Transmission	220

6.2 ABCD Matrices 230
6.3 Gamma Plane and Smith Chart Analysis Methods 234
6.4 *TEM* Waves at Planar Boundaries 253
6.5 Time-Domain Analysis of Transmission Lines 261
6.6 Summary 277
6.7 Problems 279

7 WAVEGUIDES 286

7.1 Parallel-Plate Transmission Lines 286
7.2 Dielectric-Slab Transmission Lines 294
7.3* Excitation and Orthogonality of Modes 303
7.4 Rectangular Waveguides 310
7.5* Separation of Variables 319
7.6 Summary 327
7.7 Problems 329

8 RESONATORS 336

8.1 Introduction 336
8.2 Cavity Resonators 337
8.3 Loss in Resonators 349
8.4 Discrete-Element Resonator Circuits 357
8.5 Transmission Line Resonators 365
8.6 Transients in Resonators 369
8.7* Perturbation of Resonators 373
8.8* Resonator Coupling to External Circuits 380
8.9* Design and Applications of Resonators 390
8.10 Summary 399
8.11 Problems 401

9 ANTENNAS 406

9.1 Introduction 406
9.2 Simple Dipole Antennas 407
9.3 Circuit Properties of Transmitting Antennas 416
9.4 Dipole Arrays and Images 422
9.5 Receiving Properties of Antennas 444
9.6* Reciprocity Theorem 454

9.7	Long-Wire Antennas	459
9.8	Aperture Antennas and Diffraction	469
9.9	Summary	484
9.10	Problems	486
10	**ACOUSTICS**	**490**
10.1	Introduction	490
10.2	Linearized Acoustic Wave Equation	491
10.3*	Nonlinear Acoustic Wave Equation	499
10.4	Acoustic Wave Behavior at a Planar Interface	502
10.5	Transmission Line Model for Acoustic Waves	508
10.6	Acoustic Waveguides	513
10.7	Acoustic Resonators	517
10.8	Acoustic Radiation	522
10.9	Summary	527
10.10	Problems	529
	APPENDICES	**533**
A	**A REVIEW OF COMPLEX NUMBERS**	**533**
B	**VECTOR IDENTITIES AND THEOREMS**	**537**
C	**LIST OF SYMBOLS**	**540**
D	**RATIONALIZED MKS UNITS**	**544**
E	**NUMERICAL CONSTANTS**	**546**
	INDEX	**549**
