Journal of Fluid Mechanics

VOLUME 602

- 1 Flow along a long thin cylinder
O. R. Tutty
- 39 The dynamics and mixing of turbulent plumes in a turbulently convecting environment
F. Witham & J. C. Phillips
- 63 Experimental investigation and kinetic-theory-based model of a rapid granular shear flow
R. D. Wildman, T. W. Martin, J. M. Huntley, J. T. Jenkins, H. Viswanathan, X. Fen & D. J. Parker
- 81 Normal-mode linear analysis and initial conditions of capillary jets
F. J. García & H. Gonzalez
- 119 On the thickness of soap films: an alternative to Frankel's law
E. A. van Nierop, B. Scheid & H. A. Stone
- 129 Linked twist map formalism in two and three dimensions applied to mixing in tumbled granular flows
R. Sturman, S. W. Meier, J. M. Ottino & S. Wiggins
- 175 Direct numerical simulations of forced and unforced separation bubbles on an airfoil at incidence
L. E. Jones, R. D. Sandberg & N. D. Sandham
- 209 Fibre-induced drag reduction
J. J. J. Gillissen, B. J. Boersma, P. H. Mortensen & H. I. Andersson
- 219 Interleaving intrusions produced by internal waves: a laboratory experiment
R. W. Griffiths & A. A. Bidokhti
- 241 On the stability of ocean overflows
L. J. Pratt, K. R. Helfrich & D. Leen
- 267 Shock tube flows past partially opened diaphragms
P. Gaetani, A. Guardone & G. Persico
- 287 On the deficiency of even-order structure functions as inertial-range diagnostics
P. A. Davidson & P.-Å. Krogstad
- 303 Reynolds stresses and mean fields generated by pure waves: applications to shear flows and convection in a rotating shell
E. Plaut, Y. Lebranchu, R. Simitev & F. H. Busse
- 327 Vortical structures in the turbulent boundary layer: a possible route to a universal representation
M. Stanislas, L. Perret & J.-M. Foucaut
- 383 Transverse-jet shear-layer instabilities. Part 2. Linear analysis for large jet-to-crossflow velocity ratio
L. S. de B. Alves, R. E. Kelly & A. R. Karagozian
- 403 Stability and acoustic scattering in a cylindrical thin shell containing compressible mean flow
E. J. Brambley & N. Peake
- 427 Gas flows through constricted shallow micro-channels
A. Gat, I. Frankel & D. Weihs
- 443 INDEX TO VOLUME 602
