

REVUE DU PÉT

INTERNATIONAL

Turbomachinery

Covering the selection, operation, maintenance and overhaul of rotating equipment.

- Environmental Monitoring
- Power Generation in Asia
- Ship Propulsion
- Turbomachinery Maintenance Congress

Turbomachinery Publications

Established in 1959

Founders

G. Renfrew Brighton

Foreign (Air Mail): 1 year \$100.

Claims for undelivered copies not honored after 30 days from publication (90 days for overseas).

BPA

Turbomachinery International is published for key management and engineering personnel in turbomachinery-using industries. Our editorial content is aimed at

keeping our readers informed of all important developments in the field. We provide concepts, technical details and business developments to enable our readers to share the experiences of others as to systems, approaches and equipment that have proven valuable, and to stimulate new approaches to energy conversion. Publisher makes no guarantees or recommendations concerning any process, procedure or device described herein.

Turbomachinery International is published seven times a year (six magazine issues and one handbook) by Business Journals, Inc.

Executive and Editorial offices, 50 Day Street, Norwalk, Connecticut, U.S.A. 06854. Volume 35, Number 7. Copyright © 1994 by Business Journals, Inc.

Second Class postage paid in Norwalk, Connecticut and at additional mailing offices. (USPS 871-500. ISSN 0149-4147). Turbomachinery International is

available on microfilm from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan, U.S.A. 48106. Postmaster: Please send address changes to Circulation Manager, Turbomachinery International, P.O. Box 5550,

Norwalk, CT 06856-5550 U.S.A.

November/December 1994, Vol. 35, No. 7

Features

18 Siemens Increases Presence in Taiwan Market

With their first combined cycle nearing completion in Kaohsiung, Siemens have taken a further order for fifteen Model V84.2 gas turbines in five separate blocks, thereby making Taiwan Power Corporation the largest operator of the company's 60-Hz gas turbine.

by Eric Jeffs

24 GEC Alstom Establish Hong Kong Base for Asian Market

In setting up their new headquarters in Hong Kong the Anglo-French group have positioned themselves to compete for business in the burgeoning market for power system and railroad development in China and neighboring countries.

by Eric Jeffs

28 AlliedSignal Seeks New Marine Applications

The Connecticut branch of AlliedSignal Aerospace Engines (the former Textron Lycoming) is becoming more involved in marine propulsion as a way of keeping production up in the face of slowed aircraft engine sales.

by Thomas Barker

30 Catalytic System Introduced for Continuous Emissions Monitoring

Advanced Sensor Devices (a unit of Catalytica, Inc) has introduced a continuous emissions monitor using a catalytic technology, which promises to lower the cost of continuous monitoring of NOx, CO and oxygen.

by Thomas Barker

31 Catalytic Combustion Nears Application

Researchers at Catalytica and Tanaka, working with turbine manufacturers, move closer to practical catalytic combustion.

32 Predictive Emission Monitoring, an Alternative to Continuous Monitoring

Researchers at Solar Turbines have developed a mathematical model of gas turbine emissions, which has been used to build a predictive emission monitoring system (PEMS). PEMS promises to be less expensive and easier to maintain than current-generation continuous emissions monitors.

33 TMC 10: A Watershed

The tenth Turbomachinery Maintenance Congress in Kuala Lumpur marked the culmination of work to secure an international standard for gas turbine maintenance in ISO 3977.

38 Turbomachinery Symposium: New Products on Display

The news from the annual symposium included some new turbine components, and an important agreement which was reached between the Turbomachinery Laboratory and Mexico's CIATEQ.

40 Fiber Metal Interlayer Improves Ceramic Coating Performance

The use of a compliant fiber metal interlayer between a ceramic coating and metal can improve the life of the coating.
