THE IMA VOLUMES
IN MATHEMATICS
AND ITS APPLICATIONS VOLUME 74

K.J. Åström G.C. Goodwin P.R. Kumar
Editors

Adaptive Control, Filtering, and Signal Processing

Springer-Verlag

CONTENTS

Foreword xiii

Preface xv

Oscillations in systems with relay feedback 1
Karl J. Åström

Compatibility of stochastic and worst case system identification: Least squares, maximum likelihood and general cases 27
Er-Wei Bai and Mark S. Andersland

Some results for the adaptive boundary control of stochastic linear distributed parameter systems 43
T.E. Duncan

LMS is H^∞ optimal 65
Babak Hassibi, Ali H. Sayed, and Thomas Kailath

Adaptive control of nonlinear systems: A tutorial 89
Ioannis Kanellakopoulos

Design guidelines for adaptive control with application to systems with structural flexibility 135
Joy H. Kelly and B. Erik Ydstie

Estimation-based schemes for adaptive nonlinear state-feedback control 165
Miroslav Krstić and Petar V. Kokotović

An adaptive controller inspired by recent results on learning from experts 199
P.R. Kumar

Stochastic approximation with averaging and feedback: faster convergence 205
Harold J. Kushner and Jichuan Yang

Building models from frequency domain data 229
Lennart Ljung

Supervisory control 241
A.S. Morse

Potential self-tuning analysis of stochastic adaptive control 271
Karim Nassiri-Toussi and Wei Ren

Stochastic adaptive control 299
B. Pasik-Duncan

Optimality of the adaptive controllers 327
Miloje S. Radenkovic and B. Erik Ydstie

Uncertain real parameters with bounded rate of variation 345
Anders Rantzer

Averaging methods for the analysis of adaptive algorithms 351
Victor Solo

A multilinear parametrization approach for identification of partially known systems 359
Jing Sun

Adaptive filtering with averaging 375
G. Yin
