AIR POLLUTION

THIRD EDITION

VOLUME I

**Air Pollutants, Their Transformation
and Transport**

Edited by

Arthur C. Stern

Department of Environmental Sciences and Engineering
School of Public Health
University of North Carolina at Chapel Hill
Chapel Hill, North Carolina

ACADEMIC PRESS New York San Francisco London 1976

A Subsidiary of Harcourt Brace Jovanovich, Publishers

Contents

List of Contributors

xi

Preface

xiii

Contents of Other Volumes

xv

PART A THE POLLUTANTS

1. Classification and Extent of Air Pollution Problems

Leslie A. Chambers

I. Natural History of the Air Pollution Problem	3
II. Historical Perspective	5
III. Primary Concepts of Air Pollution	13
IV. Types of Effects Associated with Air Pollution	19
V. Air Pollution as a Problem of the Future	21

2. The Primary Air Pollutants—Gaseous Their Occurrence, Sources, and Effects

Paul Urone

I. Introduction	24
II. The Polluted Atmosphere	35
III. The Gaseous Compounds of Carbon	39
IV. The Gaseous Compounds of Sulfur	48
V. The Gaseous Compounds of Nitrogen	54
VI. The Gaseous Halogens	61
VII. Ozone and Oxidants	68
VIII. Mercury	69
References	71

3. Aerosols and the Primary Air Pollutants—Nonviable Particles Their Occurrence, Properties, and Effects

Morton Corn

Nomenclature	78
I. Introduction	79
II. Characterization of Particles	82
III. Particle Dynamics in the Atmosphere	97
IV. Physical and Chemical Properties of Particles in the Air	103
V. Traditional Measures of Particulate Pollution	139
VI. Indoor versus Outdoor Particulate Pollution	154
VII. Concluding Remarks	157
References	158

4. The Primary Air Pollutants—Viable Particulates Their Occurrence, Sources, and Effects

Alvin R. Jacobson and Samuel C. Morris

I. Viable Particulates in the Air	169
II. Factors Influencing the Numbers of Viable Particulates in the Air	182
III. Special Considerations in Sampling for Viable Particulates	187
IV. Effects on Man, Animals, and Plants	190
References	193

5. The Primary Air Pollutants—Radioactive Their Occurrence, Sources, and Effects

Merril Eisenbud

I. Natural Radioactivity.	198
II. The Fission and Activation Products	205
III. Mining, Milling, and Fuel Fabrication	207
IV. Nuclear Reactors.	209
V. Reprocessing of Spent Fuel	221
VI. Nuclear Weapons	223
VII. Aerospace Applications of Nuclear Energy	227
VIII. Peaceful Uses of Nuclear Explosives	228
References	230

PART B THE TRANSFORMATION OF AIR POLLUTANTS

6. Atmospheric Reactions and Scavenging Processes

A. J. Haagen-Smit and Lowell G. Wayne

I. Principles of Atmospheric Reactions	235
II. Atmospheric Reactions in Air Pollution	249
III. Atmospheric Scavenging Processes	280
References	285

7. Global Sources, Sinks, and Transport of Air Pollution

D. M. Whelpdale and R. E. Munn

I. Introduction	290
II. Global Sources of Pollution	291
III. Sink Mechanisms	298
IV. Global Transport and Diffusion Processes	305
V. Observed Global Concentration Patterns	307
VI. Synoptic Models of Global Transport and Diffusion	314
VII. Climatological Models of Global Air Pollution	318
VIII. The Ecological Significance of Global Air Pollution	320
References	322

PART C THE TRANSPORT OF AIR POLLUTANTS

8. The Meteorological Setting for Dispersal of Air Pollutants

Raymond C. Wanta and William P. Lowry

I. Introduction	328
II. Atmospheric Radiant Energy Transfer and Exchange	329
III. Vertical Structure of Temperature and Stability	337
IV. Atmospheric Motions	352
V. Vertical Structure of Wind and Shear	362
VI. Self-Cleaning of the Atmosphere	370
VII. Some Meteorological Approaches in Air Pollution Analysis	378
References	396

9. Transport and Diffusion of Stack Effluents

Gordon H. Strom

Nomenclature	401
I. Introduction	403
II. Atmospheric Characteristics Significant to Transport and Diffusion of Stack Effluents	407
III. Stack Plume Characteristics	420
IV. Experimental Methods for Determination of Plume Characteristics.	490
References	498

10. Urban Air Quality Simulation Modeling

Warren B. Johnson, Ralph C. Sklarew, and D. Bruce Turner

I. The Nature of Urban Air Quality Simulation Models and Their Role	504
II. Basic Numerical Modeling Approaches.	514
III. Inherent Problems in Air Quality Simulation Modeling	526
