**ANALYSIS AND DESIGN
ISSUES FOR MODERN
AEROSPACE VEHICLES
– 1997 –**

Edited By
G. J. Simitzes

CONTENTS

STRUCTURAL SIMILITUDE AND SIZE EFFECTS

Introduction	
<i>A. Tabiei and K. E. Jackson</i>	1
Similitude of Failure and Size Effect in Fiber Composites	
<i>Zdenek P. Bazant</i>	3
Prediction of First Ply Failure in Scaled Cross-Ply Composite Laminates	
<i>Karen E. Jackson</i>	11
Strength Distribution and Size Effects for the Fracture of Fibrous Composite Materials	
<i>S. Leigh Phoenix and Irene J. Beyerlein</i>	23
Orthotropic Column Buckling: The Euler and Engesser/Haringx/Timoshenko Formulas Versus an Elasticity Solution	
<i>George A. Kardomateas</i>	35
Mechanisms for Size Effects in Bending of Fiber Composites	
<i>Stephen R. Swanson</i>	49
Scaling Effects in Composite Laminates Under Tensile, Flexural, and Compressive Loading	
<i>David P. Johnson, Joseph H. Felts, and Michael T. Ho</i>	59
Size Effects in Tensile, Compressive and Interlaminar Failure of Unidirectional Composites	
<i>Michael R. Wisnom</i>	67
Analytical Simulation of Strength Size Effect in Composite Materials	
<i>Ala Tabiei and Jianmin Sun</i>	79
Stacking Sequence Effects on the Process-Induced Free-Edge Stresses in Thermoplastic Composite Laminates	
<i>Moshe M. Domb and Jorn S. Hansen</i>	93

THERMOMECHANICAL INTERACTION IN STRUCTURES AND MATERIALS

Introduction	
<i>Liviu Librescu and Victor Birman</i>	99
Thermal Stresses in a Layer Due to a Train of Laser Pulses	
<i>Richard B. Hetnarski, Louis G. Hector, Jr., and Woo-Seung Kim</i>	101
Statical and Vibrational Behavior of Orthogonally Reinforced Flat Panels Exposed to Thermomechanical Loading	
<i>M. A. Souza and L. Librescu</i>	107
Non-Uniqueness of Two Inverse Problems of Thermally and Force-Loaded Smart Structures: Sensor Shaping and Actuator Shaping Problem	
<i>Hans Irschik, Alexander K. Belyaev, Michael Krommer, and Kurt Schlacher</i>	119
Vibration and Flutter Analysis of Stiffened Composite Plate Considering Thermal Effect	
<i>In Lee, Il-Kwon Oh, and Dong-Min Lee</i>	133
Nonlinear Analysis of Curved Composite Panels Subjected to Combined Temperature Gradient and Mechanical Loads	
<i>Ahmed K. Noor and Jeanne M. Peters</i>	143
Singular Solutions of Multi-Material Wedges Under Thermomechanical Loading	
<i>Wan-Lee Yin, Kuo-chang Jane, and Chien-Chang Lin</i>	159
Minimization of the Periodic Thermoelastic Deformation in Space Structures by Active Loads	
<i>Omri Rand and Dan Givoli</i>	167

Vibration of a Flexible Solar Array Caused by the Change of Thermal Input in Orbit <i>Luca Tabacchi, M. C. Natori, and Hiroshi Hirikado</i>	175
Free Vibration Analysis of Composite Plates With Tailored Thermal Residual-Stresses <i>Sérgio Frascino Müller de Almeida and Jorn S. Hansen</i>	183
Thermoelastic Analysis of Laminated Composite Plates and Shells Based on High-Order Theory <i>Viktor E. Verijenko, Theodore R. Tauchert, Sarp Adali, Murray L. Scott, and Chippy S. Shaikh</i>	191
Thermomechanical Response of Laminated Flat Panels Featuring Interlaminar Bonding Imperfections <i>U. Icardi, L. Librescu, and M. Di Sciuva</i>	197
A Finite Element Modal-Coordinate Formulation for Thermal Postbuckling of Composite Plates <i>Yucheng Shi, Raymond Y. Y. Lee, and Chuh Mei</i>	215
Oscillation Control of Cantilevers via Smart Materials Technology and Optimal Feedback Control: Actuator Location and Power Consumption Issues <i>S. S. Na and L. Librescu</i>	231
Thermal Shape Control of Active and Sensory Piezoelectric Composite Plates <i>Ho-Jun Lee and Dimitris A. Saravanos</i>	249
Minimum Deflection Design of Piezothermoelastic Laminated Composite Plates <i>Theodore R. Tauchert, Sarp Adali, Viktor E. Verijenko, and Alexander A. Richter</i>	259
Stress Dependency of the Thermoelastic and Piezoelectric Coefficients <i>Charles W. Bert and Victor Birman</i>	265

SANDWICH STRUCTURES

Introduction <i>Jack R. Vinson</i>	271
Design Criteria for Sandwich Panels for Building Construction <i>J. Michael Davies</i>	273
Dynamics for Large Deflections of a Sandwich Plate With Thin Piezoelectric Face Layers <i>Y. Y. Yu</i>	285
Analysis of Curved Sandwich Panels With Cutouts Subjected to Combined Temperature Gradient and Mechanical Loads <i>Ahmed K. Noor and Jeanne M. Peters</i>	293
The Application of Sandwich Components to Hybrid Structures <i>Alois Starlinger</i>	311
Properties of Sandwich Structures With Reinforced Core <i>C. T. Sun, R. S. Hasebe, and Y. Hua</i>	323
Bending of Curved Sandwich Panels With Transversely Flexible Cores: Closed-Form High-Order Theory <i>Y. Frostig</i>	335
Strain Rate Compression Performance for a Linear Core Sandwich Beam: I <i>Deborah Weissman-Berman</i>	355
On the Response of a Sandwich Panel With a Bilinear Core <i>David L. Sikarskie and Lei L. Mercado</i>	365
A Refined Theory for the Analysis of Sandwich Beams and Its Application to Local and Global Stability Investigations <i>Hans-R. Meyer-Piening</i>	379
On the Optimization of Composite Cylindrical Sandwich Shells Subjected to Beam Type Bending <i>Jack R. Vinson</i>	387

**STRUCTURAL AND AERO MECHANICAL RESEARCH IN
HIGH CYCLE FATIGUE**

Introduction	
<i>C. I. Chang and Brian Sanders</i>	401
Forced Response Analysis of Gas Turbine Rotor Blades Using CFD-Based Aeroelastic Tools	
<i>Marlin J. Kruse, Jong S. Liu, Yves G. Marengi, and Christopher D. Eick</i>	403
Variability of Rotor Wake Interactions and Airfoil Unsteady Aerodynamics	
<i>Albert J. Sanders and Sanford Fleeter</i>	411
Consideration on the Benefits of Intentional Blade Mistuning for the Forced Response of Turbomachinery Rotors	
<i>Matthew P. Castanier and Christophe Pierre</i>	419
Computation of the Maximum Amplitude of a Mistuned Bladed Disk Assembly via Infinity Norm	
<i>Alok Sinha</i>	427
Aerodynamic Response of Turbomachinery Blade Rows to Convecting Density Wakes	
<i>Becky E. Ramer, Sanith Wijesinghe, Choon Tan, and Eugene E. Covert</i>	433
The Role of Threshold Fatigue Crack Growth in Life Prediction of the Alloy Ti-6Al-2Sn-4Zr-6Mo Under High Cycle Fatigue Spectra	
<i>James M. Larsen, Stephan M. Russ, David C. Maxwell, and Brian D. Worth</i>	443
Comparison of Fretting Fatigue Crack Nucleation Experiments to Multiaxial Fatigue Theory Life Predictions	
<i>Matthew P. Szolwinski, G. Harish, and Thomas N. Farris</i>	449
Micromechanics Study of Plastic Zone at Crack Tip in Steel Under Cyclic Load	
<i>Qing Wang, Ming-Liang Du, and Fu-Pen Chiang</i>	459
Probabilistic Mesomechanics for High Cycle Fatigue Life Prediction	
<i>Robert G. Tryon and Thomas A. Cruse</i>	467
Micromechanics of High Cycle Fatigue in Single and Polycrystals	
<i>T. H. Lin, K. Wong, and N. J. Teng</i>	475
Static Indentation and Low Velocity Impact Tests on Sandwich Plates	
<i>Rocco Ferri and Bhavani V. Sankar</i>	485
Forced Response Prediction of Gas Turbine Rotor Blades	
<i>Gary R. Hilbert, Ron-Ho Ni, and Ronald K. Takahashi</i>	491
Author Index.....	499
