INDUSTRIAL ELECTRONICS SERIES

THE INDUSTRIAL INFORMATION TECHNOLOGY HANDBOOK

Edited by

Richard Zurawski

CRC PRESS

Table of Contents

PART I FUNDAMENTALS OF INFORMATION TECHNOLOGY

SECTION 1 Computer Software and Web Technologies

1.1 Development Platforms and Frameworks

1. Web-based Enterprise Computing Development using J2EE
   Jiang B. Liu 1-1
2. Microsoft's .NET
   Martin v. Löwis and Peter Tröger 2-1

1.2 The Unified Modeling Language

3. Unified Modeling Language: The Industry Standard for Software Development
   Kleanthis Thramboulidis 3-1

1.3 Middleware

4. Middleware
   Andreas Polze 4-1
5. Distributed Components in Microsoft Platforms — Technology Overview
   Marcos Ribeiro Pereira Barretto, Paulo Marcelo Porto Alves Blanco and Marco Antonio Poli ... 5-1
6. CORBA in Manufacturing — Technology Overview
   Marcos Ribeiro Pereira Barretto, Paulo Marcelo Porto Alves Blanco and Marco Antonio Poli ... 6-1

1.4 Web Technologies

7. Web Servers, Clients, and Browsers
   Robert Tolksdorf 7-1
8. Internet Programming Languages
   Wolfgang Radinger and Martin Jandl 8-1
9. Internet Still Image and Video Formats
   Guido Heising and Kai Uwe Barthel 9-1

1.5 Web Programming

10. The Fundamentals of Web Services
    Klaus-Peter Eckert 10-1
11. Programming Web Services with .net and Java
    Klaus-Peter Eckert 11-1

1.6 Multidimensional Database Technology
12. Multidimensional Databases
Torben Bach Pedersen and Christian S. Jensen 12-1

SECTION 2 The Internet and IP Networks

2.1 Introduction to the Internet
13. TCP/IP Architecture, Protocols, and Services
Christian Kurz and Helmut Hlavacs 13-1
14. The Fundamentals of the Quality of Service
Wolfgang Kampichler 14-1

2.2 Internet Core Protocols
15. The Internet Protocol
Jürgen Falb 15-1
16. The Transmission Control Protocol
Aleksander Malinowski and Bogdan M. Wilamowski 16-1
17. The User Datagram Protocol
Aleksander Malinowski and Bogdan M. Wilamowski 17-1
18. ARP — Address Resolution Protocol
Jürgen Falb 18-1
19. IPv6, IPSec, and VPNs
Walter Penzhorn and Johann Amsenga 19-1
20. Overview and Classification of IP Routing Protocols — IP Routing: Interior and Exterior Routing Protocols
Lucia Lo Bello and Enzo Palumbo 20-1
21. Multicast
Tanja Zseby 21-1
22. A Survey of Congestion and QoS Control Mechanisms for the Internet
Dorgham Sisalem and Adam Wolisz 22-1
23. Mobile IP Routing
Karin A. Hummel and Helmut Hlavacs 23-1
24. IP-Mobility for Cellular and Wireless Networks
Andreas Festag and Adam Wolisz 24-1

2.3 Quality of Service in IP networks
25. IP-QoS: Scalable and Flexible Quality-of-Service with Differentiated Services
Klaus Wehrle 25-1
26. MPLS — Multiprotocol Label Switching
José Ruela and Manuel Ricardo 26-1
27. The Integrated Services Architecture and RSVP
Henning Sanneck 27-1
28. RTP, RTCP, and RTSP — Internet Protocols for Real-Time Multimedia Communication
Arjan Durresi and Raj Jain 28-1

2.4 Internet Applications and Application Services
29. Mail Transfer Protocols and File Transfer Protocol
Suvendi Chinnappen 29-1
30. The Hypertext Transfer Protocol and Uniform Resource Identifier
Karl M. Goeschka 30-1

2.5 Management of IP Networks
31. Network Management: Basic Notions and Frameworks
Mai Hoang 31-1
32. Simple Network Management Protocol SNMP
Michael Kunes 32-1
33. The Dynamic Host Configuration Protocol
Michael Eyrich 33-1

2.6 Network Security
34. Network Security and Secure Applications
Christopher Kruegel 34-1
35. Internet Firewalls
Günter Schäfer 35-1

2.7 *Ad Hoc* Networking
36. *Ad Hoc* Networks
Holger Karl 36-1

PART II INDUSTRIAL INFORMATION TECHNOLOGY

SECTION 3 Industrial Communication Systems

3.1 Introduction to Data Communication Networks
37. Principles of Lower-Layer Protocols for Data Communications
Andreas Willig and Hagen Woesner 37-1
38. Wireless Local Area Networks and Wireless Personal Area Networks (WLANs and WPANs)
Kirsten Matheus 38-1

3.2 Field Area Networks
39. PROFIBUS — Open Solutions for the World of Automation
Ulrich Jecht, Wolfgang Stripf and Peter Wenzel 39-1
40. The WORLDFIP Fieldbus
Jean-Pierre Thomesse 40-1

41. FOUNDATION Fieldbus: History and Features
Salvatore Cavalieri 41-1
42. Operating Principles and Features of CAN Networks
Gianluca Cena and Adriano Valenzano 42-1
43. LonWorks/EIA-709 Networks *EIA 709 Protocol (LonTalk)*
Dietmar Loy 43-1
44. Time-Triggered Communication Networks
Hermann Kopetz and Günther Bauer 44-1
45. IEEE 1394 for Factory Automation
Michael Scholles, Uwe Schelinski and Petra Nauber 45-1
46. Which Network for Which Application
Jean-Dominique Decotignie 46-1
47. Networked Control Systems Overview
Pau Martí, Ricard Villà, Josep M. Fuertes and Gerhard Fohler 47-1

3.3 Ethernet and Wireless/Mobile Network Technologies
48. The Quest for Real-Time Behavior in Ethernet
P. Pedreiras, L. Almeida and J. A. Fonseca 48-1
49. Switched Ethernet in Automation Networking
Tor Skeie, Svein Johannessen and Øyvind Holmeide 49-1
50. Wireless LAN Technology for the Factory Floor
Andreas Willig 50-1
51. Bluetooth
Thomas Jatschka and Robert Tschofen 51-1

3.4 Linking Factory Floor with the Internet and Wireless Fieldbusses
52. Linking Factory Floor and the Internet
Thilo Sauter 52-1
53. LonWorks™ over IP
Dietmar Loy and Stefan Soucek 53-1
54. Interconnection of Wireline and Wireless Fieldbusses
Jean-Dominique Decotignie 54-1

3.5 Security and Safety Technologies in Industrial Networks
55. Security in Automation Networks
Christian Schwaiger 55-1
56. PROFIsafe — Safety Technology with PROFIBUS
Wolfgang Stripf and Herbert Barthel 56-1

3.6 Automotive and Industrial Applications
57. A Comparative Case Study of Distributed Network Architectures for Different Automotive Applications
Jakob Axelsson, Joakim Fröberg, Hans Hansson, Christer Norström, Kristian Sandström and Björn Villing 57-

58. The Standard Message Specification for Industrial Automation Systems — ISO 9506 (MMS)
Karlheinz Schwarz 58-1

SECTION 4 The Internet, Web, and IT Technologies in Industrial Automation and Design

4.1 Internet and Web-Based Technologies in Industrial Automation
59. Remote Monitoring and Control over the Internet
Hans-Arno Jacobsen 59-1
60. Internet-Based Telemanipulation
P. Korondi, P. Szemes and P. Hashimoto 60-1
61. Knowledge Connect — An Approach for an Industrial^{IT} Service Tool
Carsten Beuthel, Paul George and Ulrich Topp 61-1

4.2 Component Technologies in Industrial Automation
62. OPC — Openness, Productivity, and Connectivity
Jürgen Lange and *Frank Iwanitz*..... 62-1

4.3 Java Technology and Industrial Applications
63. Java Technology and Industrial Applications
Jörn Peschke and Arndt Lüder..... 63-1

4.4 Standards for Programmable Logic Controllers and System Design
64. The GRAFCET Specification Language
Paulo Portugal and Adriano Carvalho 64-1
65. Programming with the IEC 61131-3 Languages and the MatPLC
Mário de Sousa and Adriano Carvalho 65-1
66. Acheiving Reconfigurability of Automation Systems by Using the New International Standard IEC 61499: A Developer's View
Hans-Michael Hanisch and Valeriy Vyatkin 66-1

4.5 Virtual Reality in Design and Manufacturing
67. Applications of Haptics in Design and Manufacturing
T. Kesavadas, Arvind Balijepalli and Cartik Sharma 67-1
68. Implementation of a Virtual Factory Communication System using the Manufacturing Message Specification Standard
Dong-Sung Kim, Zygmunt J. Haas and Wook Hyun Kwon 68-1

4.6 Security in Automation Systems
69. IT Security for Automation Systems
Martin Naedele 69-1

SECTION 5 Intelligent Sensors and Sensor Networks

5.1 Intelligent Sensor and Device Technology

70. A Smart Transducer Interface Standard for Sensors and Actuators
Kang Lee 70-1

71. Integration Technologies of Field Devices in Distributed Control and Engineering Systems
Christian Diedrich 71-1

72. Intelligent Sensors: Analysis and Design
E. Dekneuvel 72-1

5.2 Intelligent Sensors in Robotics

73. Robot Vision
Ray Jarvis 73-1

74. Robot Tactile Sensing
R. Andrew Russell 74-1

75. Giving Robots a Sense of Smell
R. Andrew Russell 75-1

76. Ultrasonic Sensors in Robotics
Lindsay Kleeman 76-1

5.3 Sensor Systems and Networks

77. Intelligent Space and Mobile Robots
Joo-Ho Lee, Kazuyuki Morioka and Hideki Hashimoto 77-1

78. A Survey on Self-Organizing Wireless Sensor Networks
Shashidhar Gandham, Ravi Musunuri, Praveen Rentala and Udit Saxena 78-1

79. Software for Wireless Sensor Networks
Jan Blumenthal, Frank Golatowski, Marc Haase and Matthias Handy 79-1

5.4 Multisensor Data Fusion

80. Introduction to Multisensor Data Fusion
Pascal Vasseur, El Mustapha Mouaddib and Claude Pegard 80-1

SECTION 6 Real-Time Embedded Systems

6.1 Embedded Systems

81. Real-Time Systems
Hans Hansson, Mikael Nolin and Thomas Nolte 81-1

82. Design of Embedded Systems
Luciano Lavagno and Claudio Passerone 82-1

83. Models of Computation for Embedded Systems
Luís Gomes and João Paulo Barros 83-1

84. Hardware-level Design Languages
Luís Gomes and Anikó Costa 84-1
85. Languages for Embedded Systems
Stephen Edwards 85-1
86. Verification Languages
Aarti Gupta, Ali Alphan Bayazit and Yogesh Mahajan 86-1
87. Embedded Software in the SoC World.
The Concept of HdS in View of the HW and SW Design Challenge
Frank Pospiech 87-1
88. Internal Architecture and Features of Real-Time Embedded Operating Systems
Ivan Cibrario Bertolotti 88-1
89. Power Aware Embedded Computing
Margarida F. Jacome and Anand Ramachandran 89-1

6.2 Security in Embedded Systems
90. HTTP Digest Authentication — Theory and Practice
Thomas P. von Hoff and Mario Crevatin 90-1
91. Security in Embedded Systems
Andreas Steffen 91-1

6.3 System-on-Chip and Network-on-Chip Design
92. System-on-Chip and Network-on-Chip Design
Grant Martin 92-1
93. Platform-Based and Derivative Design
Luca P. Carloni, Fernando De Bernardinis,
Alberto L. Sangiovanni-Vincentelli and Marco Sgori 93-1
94. Hardware/Software Interfaces Design for SoC
Wander O. Cesário, Flávio R. Wagner and A.A. Jerraya 94-1
95. Network On-Chip Design for Gigascale Systems-on-Chip
Davide Bertozzi, Luca Benini and Giovanni De Micheli 95-1

6.4 Networked Embedded Systems
96. An Introductory Survey of Networked Embedded Systems
Hiren D. Patel, Sumit Gupta, Sandeep K. Shukla and Rajesh Gupta 96-1

SECTION 7 Integration Technologies

7.1 E-Technologies in Enterprise Integration
97. Introduction to e-Manufacturing
Muammer Koç, Jun Ni, Jay Lee and Pulak Bandyopadhyay 97-1

7.2 IT Technologies in Enterprise Integration
98. XML for the Exchange of Automation Project Information
Alexander Fay 98-1

99. Enterprise-Manufacturing Data Exchange Using XML
David Emerson 99-1
100. Web Services for Integrated Automation Systems — Challenges, Solutions and Future
Zaijun Hu and Eckhard Kruse 100-1
101. Integration Between Production and Business Systems
Claus Vetter and Thomas Werner 101-1

7.3 Network-Based Integration Technologies
102. Principles and Features of PROFINET
Manfred Popp, Joachim Feld and Ralph Büsgen 102-1
103. The IDA Standard
Martin Buchwitz 103-1
104. Open System Architecture for Controls within Automation Systems (OSACA)
Michael Seyfarth and Andreas Kahmen 104-1
105. Open Controller Enabled by an Advanced Real-Time Network (OCEAN)
Fabrizio Meo 105-1

7.4 Agent-Based Technologies in Industrial Automation
106. Holonic Manufacturing Systems: A Technical Overview
Robert W. Brennan, James H. Christensen, William A. Gruver, Dilip B. Kotak, Douglas H. Norrie and Edwin H. van Leeuwen 106-1
107. From Holonic Control to Virtual Enterprises: The Multi-Agent Approach
Pavel Vrba and Vladimir Marik 107-1
108. Multiagent-based Architecture for Plant Automation
Axel Klostermeyer and Eckehardt Klemm 108-1
109. Collaborative (Agent-Based) Factory Automation
Armando Walter Colombo, Ronald Schoop and Ralf Neubert 109-1

7.5 Industrial Information Technology Solutions for Energy and Power Systems
110. Smart Power Systems Rely on Standards for Information Models and Messaging — IEC 61850
Karlheinz Schwarz 110-1
111. The JEVIS Service Platform — Distributed Energy Data Acquisition and Management
Peter Palensky 111-1
112. Industrial IT-Based Network Management
Yauheni Veryha and Peter Bort 112-1
