FOREWORD	V
<i>Epidemiology and pathogenesis</i>	1
Epidemiology of foot lesions in diabetic patient : cost, frequency, and importance of prevention	1
Pathogenesis of the lesions in diabetic foot	14
<i>Neuropathy and arteriopathy</i>	23
Clinical pattern of the diabetic foot	23
Diabetic neuropathy : the point of view of the neurologist	26
Sensory, motor and autonomous neuropathies : interest in the diabetic foot lesions	31
Plantar sensory and diabetic foot	38
Vascular explorations of the diabetic foot	43
Assessment of microvascular and neurological disturbances of the diabetic foot in a rehabilitation center	48
Microrheological data and amputation level in diabetic patient with critical ischemia	55
<i>Perforating ulcer and bone and joint involvement</i>	61
Magnetic resonance imaging and diabetic plantar perforating ulcer	61
Frequency and clinical pattern of foot involvement in very aged diabetic patients	67
Plantar perforating ulcer in elderly	73
Neuropathic osteo-arthropathy in the diabetic foot	77
Spontaneous fracture and neuropathic arthropathy in diabetic patient	91
Fractures in diabetic foot	94
<i>Prevention and care management</i>	99
Vulnerability of the diabetic foot : predictive factors, interest of preventive and educational measures	99
General measures : their interest for the treatment of diabetic foot lesions	103
Infectious problems	112
Wound healing in diabetic patient	114
Chiropodist management	117
Foot local cares in an diabetological unit	121
Hygiene and footwear proposals for diabetic patient	126

Multidisciplinary management of the diabetic foot : the experience of St-Luc Hospital (Bruxelles)	128
The Wound Care Centers : a possibility to improve the management of diabetic foot	136
Surgical treatment of diabetic foot	141
Ortheses and prostheses	149
Analysis of diabetic foot with the baropodometer BPM 90	149
Plantar orthosis and footwear of diabetic foot during rehabilitation management	153
Under-patella stance orthoses in the management of diabetic plantar perforating ulcers	160
Orthotic appliance of the foot in arteriopathic diabetic patients	167
Incomplete amputations of the diabetic foot	175
Relations foot/shoes after incomplete amputation of the fore-foot in diabetic ..	180
INDEX	189
