

Dictionary of  
**CHEMICAL  
ENGINEERING**

*English / French / German / Spanish*

**AKSEL L. LYDERSEN**  
and  
**INGRID DAHLØ**

**WILEY**

*Publishers Since 1807*

# Contents

## Preface

Preface	vii
Dictionary	1
Symbols	206
SI units, symbols, and prefixes	208
Conversion factors	209
French index	213
German index	226
Spanish index	239

About half of the figures are from two textbooks by one of the authors (A. L. Lydersen: *Fluid Flow and Heat Transfer*, John Wiley & Sons, Chichester, 1979, and *Heat Transfer in Engineering Practice*, John Wiley & Sons, Chichester, 1983). The rest were drawn for the Norwegian dictionary and for the present one. The last 45 pages contain a list of symbols, a conversion table, and French, German and Spanish indexes.

The authors are grateful for valuable suggestions from staff in industry and at the Norwegian Institute of Technology. We also give special thanks to Professor Jacques F. Bermanet, Laboratoire de Sciences du Genie Chimique, Nancy, France, to Professor Wolfgang Ralowski, Institut für technische Chemie der Universität Erlangen-Nürnberg, Erlangen, Germany, and to Professor José Coca, Department of Chemical Engineering, Universidad de Oviedo, Oviedo, Spain, for adding the French, German and Spanish terms.

It is our hope that the dictionary will be useful to engineers, students, teachers, and translators.

Tromsø and Oslo, April 1992
