<i>Preface</i>	x
<i>Structure and content of the book</i>	xiii
<i>Target readership</i>	xv
<i>Acknowledgements</i>	xvii
<i>Reader's guide</i>	xix
1 Introduction	1
1.1 The point of systems analysis and design	1
1.2 Systems and information systems	2
1.3 Analysis, systems analysis, and the systems analyst	5
1.4 Systems design	8
1.5 PG TOPIC: Quality added and quality chains	8
2 The systems development life cycle and the systems analyst	13
2.1 The systems development life cycle	13
2.2 The SDLC in detail	14
2.3 Systems development life cycles	16
2.4 Other life cycles	18
2.5 The role of the systems analyst	21
2.6 SSADM	22
2.7 Other methodologies	23
2.8 PG TOPIC: Which methodology?	23
2.9 Tutorial 2.1	24
3 Requirements analysis: the discovery of what is needed	25
3.1 The purpose of requirements analysis	25
3.2 System investigation	26
3.3 Requirements catalogue	30
3.4 Functional requirements and non-functional requirements	31
3.5 Example of an entry in the Requirements Catalogue	32
3.6 PG TOPIC: The impossibility of complete requirements analysis?	33
3.7 Tutorial 3.1	34

4	Report writing and presentations for the systems analyst	35
4.1	The systems analyst speaks	35
4.2	Writing formal reports	36
4.3	What formal reports are not	36
4.4	Structuring reports	36
4.5	Section numbering	38
4.6	Citations and references	39
4.7	Standard of English	41
4.8	Notes on English	42
4.9	Presentations	47
4.10	Initial considerations	47
4.11	Structure of the presentation	47
4.12	Non-verbal behaviour	48
4.13	Verbal behaviour	48
4.14	Use of visual aids	48
4.15	Preparation and practice	49
4.16	Assessment guide for group presentations	49
5	Soft systems techniques	51
5.1	Hard and soft systems techniques	51
5.2	Soft methodologies	52
5.3	Soft Systems Methodology	53
5.4	The seven stage model	53
5.5	SSM in information systems development	58
5.6	PG TOPIC: Soft versus hard	59
6	Entity relationship diagrams I: logical data structures	61
6.1	Entities	61
6.2	Relationships between entities	62
6.3	Entity Relationship Diagram (ERD)	62
6.4	A preliminary example	62
6.5	The ERD notation	63
6.6	Entities and relationships	65
6.7	Entities, attributes, values, and keyfields (identifiers)	65
6.8	Logical and physical data models	66
6.9	Developing the ERD	66
6.10	Many-to-many relationships	67
6.11	Example 6.1	70
6.12	Tutorial 6.1	71
6.13	PG TOPIC: What is an entity?	71
7	Entity relationship diagrams II: more complex relationships	73
7.1	Developing ERDs (continued)	73
7.2	Optional relationships	74
7.3	More on optional relationships	74
7.4	Exclusive relationships	75
7.5	Recursive relationships	76
7.6	One-to-one relationships	76
7.7	Review of entity relationship diagrams	77

7.8	Example 7.1	77
7.9	Data relationships	79
7.10	Tutorial 7.1	83
8	Data flow diagrams I: basic ideas	85
8.1	Diagrams of data flows	85
8.2	The initial example	85
8.3	The components of data flow diagrams	87
8.4	Data flows	87
8.5	Data stores	88
8.6	External entities	90
8.7	Processes	91
8.8	Tutorial 8.1	92
9	Data flow diagrams II: levels of data flow diagrams	93
9.1	Levels in data flow diagrams	93
9.2	Level 1 DFD	94
9.3	Context level DFD	94
9.4	Functional decomposition	95
9.5	Balancing DFDs	95
9.6	Lower levels of DFD	96
9.7	Developing the DFD hierarchy	97
9.8	Stopping the decomposition	98
9.9	Developing data flow diagrams	100
9.10	Checking the DFD	101
9.11	Tutorial 9.1	102
9.12	PG TOPIC: Questions about DFDs	103
10	Entity life histories and object oriented techniques	105
10.1	The problem of time	105
10.2	Entity Life Histories: One of the three views of the system	106
10.3	The dynamic view of the system	107
10.4	ELH notation	107
10.5	Terminology	111
10.6	Constructing ELHs	111
10.7	Cross-checking models	112
10.8	Comparing LDSs and DFDs	112
10.9	PG TOPIC: Do ELHs solve the problem of time?	114
10.10	Tutorial 10.1	116
10.11	PG TOPIC: An object-oriented technique	117
10.12	Use-case diagrams	117
11	Process descriptions	119
11.1	The need to describe processes	119
11.2	Problems with ordinary English	120
11.3	Decision tables	121
11.4	Decision trees	126
11.5	Structured English	130

11.6	PG TOPIC: Which technique to use?	139
11.7	Tutorial 11.1	140
12	Logicalization	143
12.1	Physical and logical systems models	143
12.2	The current logical DFD	144
12.3	The process of logicalization	144
12.4	The order of logicalization	155
12.5	PG TOPIC: The need to logicalize	156
12.6	Example 12.1	157
12.7	Tutorial 12.1	157
13	Design of information systems	161
13.1	The need for design	161
13.2	IS design from the systems analysis	162
13.3	Specifying the proposed information system	163
13.4	The desirable features of good IS design	163
13.5	The design of the architecture of the system	164
13.6	Business and Technical System Options (BSOs and TSOs)	165
14	Relational data analysis (normalization)	169
14.1	Designing data tables	169
14.2	Normal forms	170
14.3	Un-normalized form	171
14.4	First normal form	174
14.5	Second normal form	174
14.6	Third normal form	176
14.7	Testing for third normal form	178
14.8	Worked examples for RDA	178
14.9	Rationalizing normalized tables	182
14.10	Converting normalized tables to a logical data structure	185
14.11	PG TOPIC: Different approaches to normalization	186
14.12	Tutorial 14.1	187
14.13	Tutorial 14.2	188
15	Proposed data requirements	189
15.1	The data for the new system	189
15.2	Rationalization and optimization	189
15.3	The logical data module of the proposed system	191
15.4	Tutorial 15.1	192
16	Processing requirements	195
16.1	Processing in the required system	195
16.2	Required logical and physical data flow diagrams	196
16.3	Worked example for the video shop system	198
16.4	Specifying the program	200
16.5	The program specification	204
16.6	Tutorial 16.1	208

17	Storage of data	209
17.1	Data storage	209
17.2	Conventional files	209
17.3	Types of files	212
17.4	Databases	212
17.5	Data codes	213
17.6	The sizing of files	215
17.7	PG TOPIC: Sizing is more complicated	216
17.8	Tutorial 17.1	217
18	User interfaces	219
18.1	Designing the user interface	219
18.2	Methods of interface design	219
18.3	The elements of interface design	220
18.4	Considerations for good screen design	223
19	System installation	227
19.1	Implementing the design	227
19.2	Installation	227
19.3	Planning the installation	228
19.4	Changeover methods	228
19.5	Tutorial 19.1	232
19.6	Tutorial 19.2	232
20	Documentation	233
20.1	The importance of documentation	233
20.2	System documentation	233
20.3	User documentation	234
20.4	Other information	234
20.5	Tutorial 20.1	235
21	Epilogue	237
	References	239
	Index	241
