PETER NORTON'S®

GUIDE TO DELPHI™ 2

Everything You Want to Know About Delphi 2—in Plain English!

Discover how to build your own components

Learn to program with Delphi 2's RAD environment and the Windows® 95 architecture

Master database management under Delphi 2

CD-ROM included

SAMS Premier

2-005-130-1

Contents

Introduction 1

What's in This Book 2
What You'll Need 3
Conventions Used in This Book 4
Icons 5
An Overview of Hungarian Notation 7

Part I Delphi Nuts and Bolts 11

1 Introducing Delphi 13

An Overview of Pascal's History 14
What Is Delphi? 15
What Will Delphi Do for You? 17
New Features for this Version 18
Performance 18
Programmer Productivity Enhancers and Ease of Use Features 22
Delphi Developer and Delphi Client Server Suite Productivity Enhancers 28
Database 29
Client-Server Development 32
Delphi Strengths and Weaknesses 33
Compared to C/C++ 34
Compared to Visual Basic 35
Compared to CA-Visual Objects 35
32-Bit Versus 16-Bit 36
Summary 36

2 The Delphi IDE 39

An Overview of the Delphi Speed Bar 40
Using the Object Inspector 48
Configuring Your Environment 50
Preferences 50
Library 52
Editor 53
Display 55
Colors 56
Palette 56
Browser 56
Adding New Tools 57
Summary 59

3 Building a Basic Program 61

Using the Gallery 63
Using Templates in Your Project 65
Adding a New Template 67
Adding a Tab to the New Items Dialog 69

Removing an Old Template 71
Changing Form Defaults 72
Defining a Project 72
Creating the Initial Window 73
Adding Components (Controls) 75
Arranging the Controls 75
Aligning Components 77
Sizing Components 77
Scaling Your Project 78
Changing the Creation Order 79
Viewing a Component as Text 80
Designing Menus 80
Using an Existing Menu 81
Creating a New Menu 82
Summary 83

4 Adding Some Bells and Whistles 85

Deciding What To Add 86
Message Boxes That Communicate 87
Dialogs for Quick Selections 97
Client Windows to Display Special Data 103
Using Image Edit for Cursors, Icons, and Bitmaps 104
Special Image Edit Considerations for Resource Files 107
Executing Tasks in the Background Using TThread 110
Summary 112

Part II Delphi and the Windows Environment 113

5 Accessing the Windows API 115

What Is the Windows API? 117
A Quick Overview of the API Components 120
Rings of Protection 120
Architecture 121
The Plug and Play BIOS 130
Getting 16-Bit and 32-Bit Applications to Work Together 132
Windows and DLLs 134
Direct API Access 135
Looking at the Windows Flags 136
Manipulating the Serial Port 141
Checking the Status of Windows Objects 146
Other Types of Direct API Access 149
Getting a Handle on Windows Resources 150
Starting a Conversation with Windows 150
Understanding the Message Queue 151
Window Management Messages 152
Using the PostMessage() and PostThreadMessage() Functions 153
Other Types of Windows Messages 156
Replacing the Application Window 157
Understanding the Application Window 158
Subclassing the Delphi Window 159

Hooking What You Need 161
Creating a Hook 162
Understanding the SendKeys() Function 163
Summary 164

6 Common Dialogs 165

Common Dialog Box Overview 167
Using Common Versus Custom Dialogs 168
Accessing the Common Dialogs 169
Color 169
Find 175
Fonts 177
Open 181
Print 185
Print Setup 188
Replace 190
Save As 191
Summary 195

7 The Windows GDI 201

An Architectural Overview of the GDI 202
Communication Is Key 203
Graphics Standards 205
The Windows 95 Graphics Architecture 208
Windows NT Graphics Architecture 212
Creating a Device Context 215
Using Graphics Drawing Primitives 222
Selecting Colors, Pens, and Brushes 231
Displaying and Creating Metafiles 237
Summary 241

8 Printer Magic 243

An Architectural Overview of the Printer Subsystem 245
Creating Standard Reports 251
Using ReportSmith 267
New Features 267
Getting Connected 269
Getting ReportSmith and Delphi to Talk 271
Creating a ReportSmith Report 274
Summary 282

9 Miscellaneous Windows Services 283

An Overview of the Miscellaneous Services 284
The Version Function Group 285
Windows and Screen Savers 286
Accessing the Accessibility Features 289
Accessing Low Level Routines 294
Using an External Declaration 294
Getting the Address of and Loading the DLL 296

Compressing and Decompressing Files 297
Summary 308

Part III Putting Delphi to Work in Applications 311

10 Using Delphi with OLE 313

Delphi and DDE 314
DDE Clients 316
DDE Servers 331
Compound Documents: The Microsoft Strategy 334
The User Perspective of OLE 335
Clients and Servers 340
Linking Versus Embedding 342
Kinds of OLE Services 343
Application Interoperability 343
Differences Between OLE 1 and OLE 2 345
OLE Components 348
Using an OLE Container 349
OLE Automation Controller 355
OLE Automation In-Process Servers 360
OLE Automation Out-of-Process Servers 366
Understanding the Windows 95 Registry 368
HKEY_CLASSES_ROOT 371
HKEY_CURRENT_USER 372
HKEY_LOCAL_MACHINE 373
HKEY_USERS 374
HKEY_CURRENT_CONFIG 375
HKEY_DYN_DATA 376
A Detailed Look at the OLE Part of the Registry 377
Special Extension Subkeys 377
Summary 386

11 Delphi and Multimedia Programming 387

Wave File Programming 389
Configuring Your Sound Board 389
Creating a Simple Wave File Player 391
Other Wave File Recording Methods 400
MIDI Programming Considerations 415
Video File Programming 417
MPEG Support 418
Video Programming Example 418
Accessing the CD-ROM Drive 420
Summary 425

12 Database Management Under Delphi 427

Data Access Components 429
Data Control Components 435
QuickRpt Components 441

Using Database Desktop 445
A Quick Look at Opening Standard Tables 446
Using Other Sources of Data 450
Understanding the Restructure Dialog 451
Using Pictures to Verify Data Entry 454
Creating Lookup Table Links 456
Defining Secondary Indexes 459
Adding Referential Integrity 464
Accessing DBMS Through ODBC 466
Using the BDE Configuration Utility 469
Defining an ODBC Source 470
Defining a Data Source 471
Using Database Explorer 474
Adding Databases 475
Creating a Data Dictionary 478
Defining Attributes 482
Building a Form Using Native Capabilities 485
Using the Database Form Expert 486
What's Missing in this Application? 489
The TDataModule Approach 492
Quick Reports—the Way to Go When Speed is Important 494
Summary 496

13 Delphi on a LAN **497**

An Architectural Overview of Windows 95 Networking 499
Peer-to-Peer Support 504
Windows NT as a Server 510
Login Scripts 511
Two Additional Areas of Support 515
Accessing the Network Part of the Windows API 517
Creating Administrator Specific Application Features 524
System Security and the Administrator 525
Accessing Network Resources and Security Using Delphi 532
NetWare Specific Programming Considerations 541
Summary 542

14 Packaging Your Application **545**

Creating Help Files 547
Using the Microsoft Help Compiler and RTF Files 551
Using the Microsoft Help Workshop 563
Adding Context Sensitive Help to Your Application 573
Using InstallShield Express Lite 578
Summary 585

Part IV Enhancing Delphi **587**

15 Creating Your Own DLLs Using Delphi **589**

What Is a DLL? 590
PCHAR Versus Pascal Strings 593
Creating a DLL Using Delphi 593

Accessing the DLL from Delphi 597
Passing Data Between the DLL and Delphi 599
Advantages to Using a Delphi DLL 604
Creating a SendKeys() Function Using a Delphi DLL 605
Summary 617

16 Creating Your Own DLLs Using C 619

Using C Versus Delphi to Build Your DLL 621
DLL Programming Considerations 622
Designing and Building Complex Math Functions 627
Creating the Math Routine DLL 627
Deciding on a Math Programming Technique 632
Testing the Math Routines 634
Summary 646

17 Building a Delphi VBX 647

What Are Components? 649
Advantages of Using Components in Place of VBXs or OCXs 650
Disadvantages of Using Components in Place of VBXs or OCXs 651
Removing and Installing Existing Components 652
Removing a Component from the Palette 653
Adding a New Component Palette Page 654
Adding a Component to the Palette 655
Using Libraries 656
Creating a New Library 656
Rebuilding a Library 658
Removing a Module from a Library 658
Inserting a Module into the Library 660
Installing and Removing OCXs 661
Components and Delphi Classes 663
Creating New Components Using Delphi 665
Creating Components to Access DLLs 672
Summary 680

18 Delphi and OCXs 681

OLE—The OCX Difference 683
Understanding the Component Object Model (COM) 685
Importing the Control 689
Using OCX Controls in Applications 690
Creating Your Own OCX Using C++ 696
Creating the Project 697
Modifying the Default About Box 698
Adding Properties and Events 699
Defining the Property Page 701
Adding Some Code 702
How Does the OCX Work? 710
Testing the OCX 712
Summary 714

Part V Appendixes 715

A A Guide to VBXs and OCXs 717

Components—The Third-Party Solution for Delphi 721
VBXs—Available Today 727
OCXs—The Wave of the Future 736
Tools That You Can Use Today 740

B Glossary 743

Index 765
