Contents

Foreword

xv

Preface

xix

Chapter 1 Introduction and Overview

1

- 1.1 Introduction 1
- 1.2 Internetworking 2
- 1.3 Design Methodology 2
- 1.4 Goals 3
- 1.5 A Target System 3
- 1.6 User Interface 3
- 1.7 Internetwork Communication 9
- 1.8 Design Plan 9
- 1.9 Summary 11

Chapter 2 An Overview of Network Hardware

13

- 2.1 Introduction 13
- 2.2 Two Approaches To Network Communication 13
- 2.3 Long-Haul And Local-Area Networks 14
- 2.4 Ethernet Packet-Switched Network Technology 15
- 2.5 Properties Of An Ethernet 18
- 2.6 Collision Detection And Recovery 18
- 2.7 Ethernet Capacity 19
- 2.8 Ethernet Addresses 19
- 2.9 Ethernet Frame Format 20
- 2.10 DEQNA Ethernet Interface 21

- 2.11 *Format Of DEQNA Command Lists* 23
- 2.12 *Summary* 23

Chapter 3 Physical Transport

27

- 3.1 *Introduction* 27
- 3.2 *Blocks And Frames* 27
- 3.3 *An Example Implementation Using Xinu* 29
- 3.4 *Ethernet Definitions* 32
- 3.5 *Frame Format In Memory* 34
- 3.6 *The Ethernet Frame Type* 34
- 3.7 *Ethernet Device Control Block* 34
- 3.8 *Upper-Half Input Routine* 35
- 3.9 *Upper-Half Output Routine* 38
- 3.10 *The Lower-Half Routines* 40
- 3.11 *Device And Driver Initialization* 43
- 3.12 *Ethernet Device Driver Configuration* 46
- 3.13 *Summary* 46

Chapter 4 Internetworking

49

- 4.1 *Introduction* 49
- 4.2 *Why An Internet?* 50
- 4.3 *The DARPA Internet* 51
- 4.4 *Network Byte Order* 59
- 4.5 *Computing A Network Address* 61
- 4.6 *The Unanswered Questions* 62
- 4.7 *Summary* 63

Chapter 5 Address Determination at Boot Time

65

- 5.1 *Introduction* 65
- 5.2 *A Mechanism For Timing Responses* 66
- 5.3 *Reverse Address Resolution Protocol (RARP)* 68
- 5.4 *Summary* 75

Chapter 6 Address Resolution at Run Time

77

- 6.1 *Introduction* 77
- 6.2 *ARP: An Address Resolution Protocol* 78

- 6.3 *ARP Implementation* 79
- 6.4 *ARP And RARP Initialization* 86
- 6.5 *Summary* 87

Chapter 7 The Internet Protocol and Routing 89

- 7.1 *Introduction* 89
- 7.2 *A Virtual Network* 89
- 7.3 *Internet Datagram* 90
- 7.4 *Sending An IP Datagram* 93
- 7.5 *Routing* 94
- 7.6 *Summary* 98

Chapter 8 Internet Control Messages 101

- 8.1 *Introduction* 101
- 8.2 *Extranormal Communication* 101
- 8.3 *Internet Control Message Protocol* 102
- 8.4 *An Implementation Of ICMP* 104
- 8.5 *Summary* 107

Chapter 9 User Datagram Protocol 109

- 9.1 *Introduction* 109
- 9.2 *Identifying The Ultimate Destination* 109
- 9.3 *The Important Concept Of Unreliable Delivery* 110
- 9.4 *DARPA User Datagram Protocol* 111
- 9.5 *Summary* 115

Chapter 10 Network Input and Protocol Demultiplexing 117

- 10.1 *Introduction* 117
- 10.2 *A Network Input Process* 117
- 10.3 *Demultiplexing* 120
- 10.4 *Implementation Of The Network Input Process* 120
- 10.5 *The Details Of Datagram Demultiplexing* 127
- 10.6 *The Needed Interface* 129
- 10.7 *Summary* 129

Chapter 11	Device Interface for Datagram Communication	131
11.1	<i>Datagram Interface And Copying</i>	131
11.2	<i>Data Or Datagram Oriented User Interface</i>	132
11.3	<i>Datagram Pseudo-Device Interface</i>	133
11.4	<i>Datagram Pseudo-Device Implementation</i>	133
11.5	<i>Datagram Pseudo-Device Interface Configuration</i>	149
11.6	<i>Summary</i>	150
Chapter 12	The Client-Server Interaction Paradigm	153
12.1	<i>Introduction</i>	153
12.2	<i>The Client-Server Model</i>	154
12.3	<i>UDP Echo Server</i>	154
12.4	<i>Echo Server Implementation</i>	155
12.5	<i>Time And Date Service</i>	156
12.6	<i>RARP Client</i>	164
12.7	<i>The ICMP Echo Server And Client-Server Model</i>	165
12.8	<i>Alternatives To The Client-Server Model</i>	166
12.9	<i>A Machine Status Service</i>	166
12.10	<i>Implementation Of The Machine Status Service</i>	167
12.11	<i>Summary</i>	175
Chapter 13	A Stateless File Server	177
13.1	<i>Introduction</i>	177
13.2	<i>Remote Files Vs. Remote Disks</i>	177
13.3	<i>The Property Of Statelessness In Servers</i>	179
13.4	<i>Statelessness In A File Server</i>	180
13.5	<i>File Requests And Responses</i>	180
13.6	<i>Efficient, Stateless File Access</i>	181
13.7	<i>UNIX Implementation Of A File Server</i>	182
13.8	<i>Handlers For File Operations</i>	198
13.9	<i>Server Initialization</i>	208
13.10	<i>Summary</i>	212
Chapter 14	Remote File Access	215
14.1	<i>Introduction</i>	215
14.2	<i>Remote File Pseudo-Devices</i>	215

14.3	<i>Maintaining State Information</i>	216
14.4	<i>Remote File Pseudo-Device Support Routines</i>	216
14.5	<i>Composing Request Packets</i>	220
14.6	<i>A Universal Remote I/O Routine</i>	223
14.7	<i>Opening A Remote File</i>	224
14.8	<i>Closing A Remote File</i>	225
14.9	<i>Reading From A Remote File</i>	227
14.10	<i>Writing To A Remote File</i>	227
14.11	<i>Single Character Transfer Operations</i>	228
14.12	<i>Seeking In A Remote File</i>	230
14.13	<i>Operations On Remote Files</i>	230
14.14	<i>Remote File Device Initialization</i>	233
14.15	<i>Remote File Pseudo-Device Configuration</i>	235
14.16	<i>Summary</i>	236
 Chapter 15 A Syntactic Namespace		239
15.1	<i>Introduction</i>	239
15.2	<i>The Problem With File Names</i>	240
15.3	<i>Naming System Design Alternatives</i>	241
15.4	<i>A Syntactic Namespace</i>	242
15.5	<i>Patterns And Replacements</i>	242
15.6	<i>Prefix Patterns</i>	243
15.7	<i>Implementation Of A Simple Syntactic Namespace</i>	243
15.8	<i>Choosing Initial Prefix Mappings</i>	252
15.9	<i>Additional File Manipulation Commands</i>	254
15.10	<i>Advantages Of The Namespace Approach</i>	257
15.11	<i>The Limits Of Fixed Prefix Patterns</i>	258
15.12	<i>Generalized Patterns</i>	258
15.13	<i>Configuring The Namespace Pseudo-Device</i>	259
15.14	<i>Summary</i>	260
 Chapter 16 User Interface Design		263
16.1	<i>Introduction</i>	263
16.2	<i>What Is A User Interface?</i>	263
16.3	<i>The Definition Of Goodness</i>	264
16.4	<i>What We Seek</i>	264
16.5	<i>Interface Hardware</i>	265
16.6	<i>The Two-Tier Interface Model</i>	268
16.7	<i>Syntactic Flexibility</i>	268
16.8	<i>Semantic Features And Issues</i>	269
16.9	<i>Syntactic Features And Issues</i>	272

- 16.10 *Modifying The Syntactic Interface* 276
- 16.11 *Summary* 278

Chapter 17 An Example User Interface: The Xinu Shell 281

- 17.1 *Introduction* 281
- 17.2 *The Assumed Interface Hardware* 281
- 17.3 *A Basic Design Decision* 282
- 17.4 *Overview Of Shell Organization And Operation* 282
- 17.5 *Imperative Vs. Interrogative Interaction Form* 282
- 17.6 *Command Syntax* 283
- 17.7 *Shell Semantics* 285
- 17.8 *Implementation Of The Xinu Shell* 286
- 17.9 *Summary* 305

Chapter 18 An Example Set Of Shell Commands 309

- 18.1 *Introduction* 309
- 18.2 *Command And Procedure Names* 309
- 18.3 *Types Of Commands* 310
- 18.4 *Command Implementation* 311
- 18.5 *General Information Commands* 311
- 18.6 *System Information Commands* 320
- 18.7 *Computational Commands* 333
- 18.8 *Summary* 355

Chapter 19 Resolving High-Level Machine Names 359

- 19.1 *Introduction* 359
- 19.2 *Naming Machines* 359
- 19.3 *Flat Namespace* 360
- 19.4 *Hierarchical Names* 361
- 19.5 *Distributed Hierarchical Namespace* 361
- 19.6 *Subset Authority* 362
- 19.7 *Nameservers* 362
- 19.8 *Efficient Distributed Name Resolution* 363
- 19.9 *Name Abbreviation* 364
- 19.10 *The DARPA Domain Name System* 364
- 19.11 *Domain Nameservers* 365
- 19.12 *DARPA Domain Name Resolution* 365
- 19.13 *Pointer Queries And Inverse Mappings* 366

- 19.14 *Example Domain Name Resolution Software* 366
- 19.15 *Compressed Name Format* 369
- 19.16 *Mapping An Internet Address To A Domain Name* 369
- 19.17 *Obtaining A Machine Name* 372
- 19.18 *Summary* 373

Chapter 20 Higher-Level Protocols 375

- 20.1 *Introduction* 375
- 20.2 *Reliable End-To-End Communication* 375
- 20.3 *The DARPA Transmission Control Protocol (TCP)* 376
- 20.4 *Remote Interactive Computing* 377
- 20.5 *DARPA TELNET Protocol* 377
- 20.6 *4.2 UNIX Rlogin* 378
- 20.7 *File Transport* 378
- 20.8 *DARPA File Transport Protocol (FTP)* 379
- 20.9 *Mail Transport Protocols* 380
- 20.10 *DARPA Simplified Mail Transport Protocol (SMTP)* 380
- 20.11 *Protocol Dependencies* 380
- 20.12 *Summary* 381

Appendix 1 Differences Between Xinu Versions 6 and 7 383

Appendix 2 Xinu Programmer's Manual 413

- Cross-Development Commands* 419
- System Calls* 444
- Library Procedures* 502
- Device Descriptions* 529

Appendix 3 Summary of Protocol Formats 539

- DARPA ARP and RARP Protocol Format* 541
- Ethernet Link-Level Protocol Format* 542
- Xinu Ethernet Downloader (ELOAD) Protocol Format* 543
- Xinu File Server (FS) Protocol Format* 545
- DARPA ICMP Protocol Format* 546
- DARPA IP Protocol Format* 547
- Xinu PURPLE Downloading Protocol Format* 549
- DARPA UDP Protocol Format* 551
