

Advances in Fluid Mechanics

Laminar and Turbulent Boundary Layers

Editor: M. Rahman

Computational
Mechanics Publications

CONTENTS

Preface	xi
Chapter 1	
Some aspects of perturbation solutions arising in 2D laminar boundary layers	1
<i>M. Rahman</i>	
Chapter 2	
Weak discontinuities and rays in hyperbolic systems - with applications	47
<i>A. Jeffrey</i>	
Chapter 3	
Boundary layer flow along a circular cylinder	77
<i>M. Zamir and S. Sawchuk</i>	
Chapter 4	
On developing laminar Herschel-Bulkley fluid flow	91
<i>R. C. Gupta</i>	
Chapter 5	
Wave impact on a square block: a numerical study	119
<i>C. M. Lemos and R. Taborda</i>	
Chapter 6	
Entry length and flow development in tubes of rectangular and elliptic cross sections	155
<i>R. Quadir and M. Zamir</i>
