| | |
|-------------------|----|
| Introduction..... | 13 |
|-------------------|----|

Part one : Light for plant : Characterization and measurements

| | |
|--|----|
| The solar radiation : characterization and distribution in the canopy..... | 17 |
|--|----|

R. Bonhomme

| | |
|--|----|
| Canopy radiation balance : its components and their measurement..... | 29 |
|--|----|

M. Chartier, J.M. Allirand and C. Varlet-Grancher

| | |
|---|----|
| Ultraviolet solar radiation : characterization and canopy distribution..... | 45 |
|---|----|

R.H. Grant

| | |
|--|----|
| Polarization of light by vegetation..... | 63 |
|--|----|

V.C. Vanderbilt, G.M. Rondeaux, F. Baret and L. Grant

| | |
|---|----|
| Measurement of plant canopy fluorescence..... | 77 |
|---|----|

G. Guyot

| | |
|-------------------------------------|----|
| Solar radiation in greenhouses..... | 93 |
|-------------------------------------|----|

A. Baille and M. Tchamitchian

| | |
|---|-----|
| Artificial light sources for crop production..... | 107 |
|---|-----|

A. Baille

| | |
|--|-----|
| A two channel radiometer for the measurement of red/far red or nir/red ratios..... | 121 |
|--|-----|

M. Méthy, J. Fabreguettes, F. Jardon and J. Roy

Part two : Structure of plant canopy and radiative transfers

Structure of plant canopy

| | |
|--|-----|
| The geometrical structure of plant canopies : characterization and direct measurement methods..... | 131 |
|--|-----|

H. Sinoquet and B. Andrieu

| | |
|---|-----|
| Geometrical canopy modelling in radiation simulation studies..... | 159 |
|---|-----|

F. Aries, L. Prévot and P. Monestiez

| | |
|--|-----|
| Cauchy's theorems and estimation of surface areas of leaves, needles and branches..... | 175 |
|--|-----|

A.R.G. Lang

| | |
|---|-----|
| Three-dimensional digitizing systems for plant canopy geometrical structure : a review..... | 183 |
|---|-----|

B. Moulia and H. Sinoquet

| | |
|---|-----|
| Estimating the vertical profil of the leaf inclination distribution function : the silhouette method..... | 195 |
| <i>L. Prévot and Y. Brunet</i> | |
| Calsid2D and Calsi3D : programs for computing the canopy geometrical structure from the silhouette method..... | 201 |
| <i>H. Sinoquet</i> | |
| Radiative transfer within crop canopies | |
| Modelling radiative transfer within homogeneous canopies : basic concepts..... | 207 |
| <i>H. Sinoquet, C. Varlet-Grancher and R. Bonhomme</i> | |
| Modelling radiative transfer in heterogeneous canopies and intercropping systems..... | 229 |
| <i>H. Sinoquet</i> | |
| Radiative exchange in forest canopies: the case of coniferous forests..... | 253 |
| <i>P. Berbigier</i> | |
| Simulation of crop reflectance (including hot spot effect)..... | 263 |
| <i>A. Kuusk</i> | |
| Simulated plants and radiative transfer simulations..... | 271 |
| <i>J. Dauzat</i> | |
| An interactive system for a model of radiation balance in a canopy..... | 279 |
| <i>J.M. Allirand and G. Gosse</i> | |
| Rayrang : a simulation model for the radiative balance of row crops..... | 281 |
| <i>H. Sinoquet</i> | |
| Indirect methods for crop structure studies | |
| Indirect methods of estimating crop structure from optical measurements..... | 285 |
| <i>B. Andrieu and F. Baret</i> | |
| Measurement of plant canopy reflectance..... | 323 |
| <i>G. Guyot and Xing-Fa Gu</i> | |
| Estimating vegetation biophysical parameters by inversion of a reflectance model on high spectral resolution data..... | 339 |
| <i>S. Jacquemoud and F. Baret</i> | |
| Modelling leaf angle distribution with non-vertical symmetry..... | 351 |
| <i>M. Steven, C.S.T. Daughtry and F. Baret</i> | |
| Gap fraction measurement from hemispherical infrared photography and its use to evaluate PAR interception efficiency..... | 359 |
| <i>F. Baret, B. Andrieu, J.C. Folmer, J.F. Hanocq and C. Sarrouy</i> | |

| | |
|---|-----|
| Canopy geometry and the interception of PAR in a temperate deciduous forest : an interpretation of hemispherical photographs..... | 373 |
| <i>J.M.N. Walter</i> | |

Part three : Radiative transfer and crop functioning: some examples

| | |
|---|-----|
| Radiative exchange and microclimate in vegetation canopies..... | 387 |
| <i>M. Fuchs</i> | |

| | |
|--|-----|
| Radiative exchange and photosynthesis..... | 401 |
| <i>F.A. Daudet and M. Tchamitchian</i> | |

| | |
|--|-----|
| Chlorophyll-a fluorescence as a probe for photosynthesis leaf metabolism and plant vitality..... | 419 |
| <i>C. Foyer</i> | |

| | |
|---|-----|
| Spectral modification of light within plant canopies: how to quantify its effects on the architecture of the plant stand..... | 427 |
| <i>C. Varlet-Grancher, B. Moulia, H. Sinoquet and G. Russell</i> | |

| | |
|---|-----|
| Photic effect of solar U.V. radiations on the survival of spores of entomopathogenic hyphomycete..... | 453 |
| <i>M. Rougier, J. Fargues, R. Goujet and N. Smits</i> | |

| | |
|---|-----|
| Absorbed radiation and crop growth..... | 459 |
| <i>G. Russell</i> | |

| | |
|---|-----|
| Some implications of canopy structure on crop-weed competition..... | 471 |
| <i>L. Assémat</i> | |

| | |
|--|-----|
| Introducing remotely sensed estimates of canopy structure into plant models... | 479 |
| <i>M. Guérif and R. Delécolle</i> | |

| | |
|--|-----|
| Estimation of wheat agronomical variables using radiometric data : choice of variables, in situ measurements, and accuracy of estimates..... | 491 |
| <i>P. Boissard, Ph. Huet and J.G. Pointel</i> | |

Appendix :

| | |
|--|-----|
| 1 : Functions subroutines and a program for easy computation of commonly required data related to the sun..... | 501 |
| <i>Ph. Grebet</i> | |

| | |
|--|-----|
| 2 : Characteristics of currently sold radiation measurement devices..... | 513 |
| <i>M. Chartier, J.M. Allirand and C. Varlet-Grancher</i> | |
