Swimming Pools

Philip H. Perkins

Fourth edition

This edition published in 2000 by E & FN Spon
11 New Fetter Lane, London EC4P 4EE

Simultaneously published in the USA and Canada by Routledge
29 West 35th Street, New York, NY 10001
E & FN Spon is an imprint of the Taylor & Francis Group

First edition 1971

Second edition 1978

Third edition 1988 (Elsevier Applied Science Publishers Ltd)

Contents

<i>Preface</i>	xii
1 The planning and layout of swimming pools	1
General considerations	1
1.1 Introduction	1
1.2 Basic requirements for all swimming pools	1
1.3 Pools for private houses, clubs, hotels and schools	3
1.4 Covered pools for private houses, hotels, clubs and schools	7
1.5 Teaching/learner pools	11
1.6 Public swimming pools	11
1.7 Floor gradients	15
1.8 The drainage of walkways and wet areas	16
1.9 Hydrotherapy pools	16
1.10 Pools used for sub-aqua activities	18
1.11 Facilities for the disabled	19
1.12 Swimming pools with movable floors	20
1.13 Wave-making machines	21
Recommended procedure for getting a pool built: contracts and dealing with disputes	22
1.14 Introduction	22
1.15 Contracts: how to proceed	22
1.16 Dealing with disputes	23
Further reading	27
2 Basic characteristics of the materials used in the construction of swimming pools	29
2.1 Introduction	29
2.2 Portland cements	30
2.3 Aggregates from natural sources for concrete and mortar	32
2.4 Admixtures	33

2.5	Additions	35
2.6	Water for mixing concrete, mortar and grout	37
2.7	Steel reinforcement	38
2.8	Spacers	40
2.9	Non-ferrous metals	40
2.10	Bimetallic corrosion	40
2.11	Curing compounds for concrete and mortar	41
2.12	Polymers	42
2.13	Reactive resins	43
2.14	Joint fillers	44
2.15	Joint sealants	45
2.16	Ceramic tiles	46
2.17	British standards and euro codes	46
	References	47
	Further reading	47
3	Factors affecting the durability of reinforced concrete and cement-based materials used in the construction of swimming pools	48
3.1	Introduction	48
3.2	Corrosion of steel reinforcement in concrete	49
3.3	Carbonation of concrete	51
3.4	Chloride-induced corrosion of reinforcement	51
3.5	Deterioration of the concrete	53
3.6	Chemical attack on cement-based mortar	56
3.7	Swimming pool water and chemicals used in water treatment	56
3.8	Moorland water and the Langelier Index	57
3.9	Alkali-silica reaction	59
	Further reading	60
4	Construction of swimming pool shells in insitu reinforced concrete	61
4.1	Introduction	61
4.2	Site investigations	62
4.3	Under-drainage of site	63
4.4	Flotation (uplift) of the pool shell	64
4.5	General comments on design and construction	64
4.6	Concrete construction in cold weather	71
4.7	Concrete construction in hot weather	72
4.8	Plastic cracking	73
4.9	Thermal contraction cracking	74
4.10	Swimming pools with floor slabs supported on the ground	76
4.11	Construction of the walls of the pool	78

4.12	Construction of walkway slabs and floors of wet changing areas	80
4.13	Curing the concrete floor and walls of the pool	82
4.14	Construction of suspended pool shells	83
4.15	Thermal insulation of swimming pool shells	85
4.16	Under-water lighting and under-water windows	86
	Further reading	86
5	Construction of swimming pool shells in reinforced sprayed concrete and other materials	88
	Reinforced sprayed concrete (shotcrete)	88
5.1	Introduction	88
5.2	Design and specification	90
5.3	Methods of application	91
5.4	Execution of the work	92
5.5	Thermal insulation	95
5.6	Pipework	95
5.7	Testing for watertightness	95
5.8	Under-water lighting	95
	Swimming pools constructed with reinforced hollow concrete block walls and insitu reinforced concrete floor	96
5.9	Introduction	96
5.10	Construction of the floor	97
5.11	Construction of the walls	97
5.12	Pipework	99
5.13	Under-water lighting	99
5.14	Curing the concrete and protecting the blockwork	99
5.15	Testing for watertightness	99
5.16	Back-filling around the walls	99
5.17	Thermal insulation	100
	Sandwich type construction with insitu reinforced concrete core wall and concrete blocks as permanent formwork	100
5.18	Introduction	100
5.19	Construction of the floor	101
5.20	Pipework	101
5.21	Construction of the walls	101
5.22	Under-water lighting	102
5.23	Finishes to floor and walls	102
5.24	Testing for watertightness	102
5.25	Back-filling around the walls	103

5.26 Thermal insulation	103
Other methods of construction	103
5.27 General comments	103
5.28 Pools constructed with mass (gravity) type walls	103
5.29 Curing the concrete	104
5.30 Testing for watertightness	104
5.31 Pools constructed in very stable ground such as chalk or rock	104
5.32 Pools constructed of precast post-tensioned concrete units	106
5.33 Pool shells of steel	106
Further reading	106
6 External works	107
6.1 General considerations	107
6.2 Paving	108
6.3 Surface water drainage	117
6.4 Walling	118
Further reading	121
7 Finishing the pool shell and associated structures; problems with pool hall roofs	122
Finishing the pool shell and associated structures	122
7.1 Cement-sand rendering to insitu concrete walls	123
7.2 Cement-sand rendering to sprayed concrete walls	130
7.3 Cement-sand rendering to concrete block walls	130
7.4 Cement-sand screeds on insitu concrete floors	131
7.5 Cement-sand screeds on sprayed concrete floors	132
7.6 Ceramic tiles and mosaic	132
7.7 Walkways and wet changing areas	138
7.8 Testing the completed tiling	138
7.9 Marbelite	139
7.10 Coatings and paints	140
7.11 Sheet linings to swimming pools	144
7.12 Glass-fibre polyester resin linings	145
7.13 Finishes to walls of pool halls	146
The roofs of swimming pool halls	149
7.14 General considerations	149
7.15 Pressurised roof voids	149
7.16 The warm-deck roof	149
Further reading	150

8	Water circulation and water treatment	151
	Water circulation	151
	8.1 Flow-through pools	152
	8.2 Pools where the pool water is in continuous circulation	154
	8.3 Ducts for pipework	159
	Water treatment	160
	8.4 Layout of treatment plant	162
	8.5 Filtration and filters	163
	8.6 Chemical dosing of the pool water	166
	8.7 The disinfection of pool water	168
	8.8 Chlorination	169
	8.9 Ozone	170
	8.10 Bromine	171
	8.11 Chlorine dioxide	171
	8.12 Metallic ions (silver and copper)	171
	8.13 Ultra-violet radiation	172
	8.14 The base-exchange process for softening pool water	173
	8.15 Sulphates in swimming pool water	174
	Further reading	174
9	Notes on heating swimming pools and energy conservation	176
	9.1 Heating open-air swimming pools	176
	9.2 Heating the water in indoor swimming pools	177
	9.3 Heating and ventilation of pool halls and adjoining areas	177
	9.4 Solar heating of swimming pools	179
	Further reading	180
10	Maintenance and repairs to swimming pools	181
	Maintenance of swimming pools	181
	10.1 General considerations	181
	10.2 Routine supervision: smaller pools	181
	10.3 Shut-down periods	182
	10.4 Algal growths: prevention and removal	183
	10.5 Foot infections	184
	Repairs to external works: paving	184
	10.6 Remedial work to insitu concrete paving for pedestrians	185
	10.7 Remedial work to insitu concrete paving for light commercial vehicles	186
	10.8 Remedial work for precast concrete flag paving	186

10.9 Remedial work to precast concrete block paving	186
10.10 Remedial work to clay pavers	187
10.11 Remedial work to slippery paving	187
10.12 Preventing trips and falls	188
Repairs to external works: walling	189
10.13 Remedial work to free-standing walls	189
10.14 Remedial work to earth-retaining walls	189
Remedial work to pools under construction	190
10.15 General comments	190
10.16 Remedial work to thermal contraction cracks	190
10.17 Remedial work to drying shrinkage cracks	191
10.18 Remedial work to honeycombed concrete	192
10.19 Inadequate concrete cover to the reinforcement	193
Remedial work to existing pools: tracing leaks and investigations	194
10.20 Introduction	194
10.21 Tracing leaks	196
10.22 General investigations	197
Remedial work to existing pools: repairs following leak tracing and investigations	200
10.23 Remedial work to leakage	200
10.24 Improving support to the pool floor	203
10.25 Structural lining to the pool shell	203
10.26 Remedial work to finishes	203
Further reading	205
Appendix 1 Conversion factors and coefficients	206
Appendix 2 Testing swimming pools shells, walkway slabs and other wet areas for watertightness. Commissioning swimming pools	208
Introduction	208
Testing new pools	208
Testing existing pools	209
The leakage test procedure	209
General comments on testing	210
Watertightness test for walkway slabs and other wet areas	211
Commissioning swimming pools (filling and emptying)	211
Appendix 3 Investigations, sampling and testing	213
General considerations	213

Sampling and laboratory testing	213
Cover-meter survey	214
Appendix 4 The consultant/designer as an expert witness	215
Introduction	215
The form of the Expert's Report	217
The expert witness and the Construction Act 1996	217
Appendix 5 Notes on safety in swimming pools	218
Introduction	218
Water depths for diving	219
Signs for water depths in the pool	219
Other safety signs	219
Outlets for water in the pool floor	219
Water slides and play equipment	219
Slipping and tripping on floors of walkways, changing rooms etc.	220
Chemicals in water treatment	221
Appendix 6 List of organisations relevant to this book	223
<i>Index</i>	224
