## Contents

|          |                                        |           |
|----------|----------------------------------------|-----------|
| <b>1</b> | <b>Introduction</b>                    | <b>1</b>  |
| 1.1      | Introduction                           | 1         |
| 1.2      | A Short History of Computing           | 1         |
| 1.2.1    | The Pre-history of Computing           | 1         |
| 1.2.2    | The Early History of Digital Computing | 3         |
| 1.2.3    | Modern Computing                       | 4         |
| 1.3      | A History of Matlab                    | 5         |
| 1.4      | Why Matlab?                            | 6         |
| <b>2</b> | <b>Matlab Programming Environment</b>  | <b>7</b>  |
| 2.1      | Introduction                           | 7         |
| 2.2      | The Matlab Environment                 | 7         |
| 2.3      | The Diary Command                      | 8         |
| 2.4      | An Introduction to Scalars             | 8         |
| 2.5      | Basic Arithmetic                       | 11        |
| 2.5.1    | Priority of Commands                   | 11        |
| 2.5.2    | Reissuing Previous Commands            | 12        |
| 2.5.3    | Built-in Constants                     | 12        |
| 2.5.4    | Finding Unknown Commands               | 13        |
| 2.6      | The Logistic Equation                  | 13        |
| 2.7      | Clearing Variables and Quitting Matlab | 14        |
| <b>3</b> | <b>Vectors</b>                         | <b>17</b> |
| 3.1      | Introduction                           | 17        |
| 3.2      | Vectors in Matlab                      | 17        |
| 3.2.1    | Creating Vectors in Matlab             | 17        |
| 3.2.2    | Creating Regular Vectors               | 18        |
| 3.2.3    | Special Vectors and Memory Allocation  | 19        |
| 3.3      | Vector Indices                         | 19        |
| 3.4      | Strings as Vectors                     | 20        |
| 3.5      | Saving Your Workspace                  | 21        |

|          |                                               |           |
|----------|-----------------------------------------------|-----------|
| 3.6      | Graphical Representation of Vectors .....     | 22        |
| 3.6.1    | Polynomials .....                             | 22        |
| <b>4</b> | <b>Matrices .....</b>                         | <b>25</b> |
| 4.1      | Introduction .....                            | 25        |
| 4.2      | Creating a Matrix and Indexing .....          | 25        |
| 4.2.1    | Simplified Methods of Creating Matrices ..... | 26        |
| 4.2.2    | Sparse Matrices .....                         | 27        |
| 4.3      | Indexing a Matrix .....                       | 28        |
| 4.3.1    | Higher Dimensional Matrices .....             | 28        |
| 4.4      | Simple Matrix Routines .....                  | 29        |
| 4.5      | Visualizing a Matrix .....                    | 29        |
| 4.5.1    | Spy .....                                     | 29        |
| 4.5.2    | Imagesc and Print .....                       | 30        |
| 4.6      | More Complex Data Structures .....            | 30        |
| 4.6.1    | Structures .....                              | 30        |
| 4.6.2    | Cell Arrays .....                             | 31        |
| <b>5</b> | <b>Matrix-Vector Operations .....</b>         | <b>35</b> |
| 5.1      | Introduction .....                            | 35        |
| 5.2      | Matrix Vector Multiplication .....            | 35        |
| 5.3      | Basic Vector Operations .....                 | 36        |
| 5.3.1    | Vector Arithmetic .....                       | 37        |
| 5.3.2    | Vector Transpose .....                        | 37        |
| 5.3.3    | Vector-Vector Operations .....                | 37        |
| 5.4      | Basic Matrix Operations .....                 | 39        |
| 5.4.1    | Simple Matrix Functions .....                 | 39        |
| 5.5      | Matrix-Vector Operations .....                | 40        |
| 5.5.1    | Outer Products .....                          | 41        |
| 5.5.2    | Matrix Inverse .....                          | 41        |
| 5.6      | Other Linear Algebra Functions .....          | 42        |
| 5.7      | Matrix Condition .....                        | 43        |
| <b>6</b> | <b>Scripts and Functions .....</b>            | <b>47</b> |
| 6.1      | Introduction .....                            | 47        |
| 6.2      | Scripts .....                                 | 47        |
| 6.3      | Good Programming Habits .....                 | 48        |
| 6.3.1    | Comments and Variables .....                  | 48        |
| 6.3.2    | Catching Errors and Displaying Text .....     | 49        |
| 6.4      | Script Example-The Random Walk .....          | 50        |
| 6.5      | Functions .....                               | 51        |
| 6.5.1    | Input-Output .....                            | 51        |
| 6.5.2    | Inline Functions .....                        | 52        |

|                                                         |           |
|---------------------------------------------------------|-----------|
| <b>Contents</b>                                         | <b>xi</b> |
| 6.5.3 The Matlab Path .....                             | 52        |
| 6.5.4 Function Naming and Size .....                    | 53        |
| 6.6 Debugging .....                                     | 53        |
| 6.7 User Input .....                                    | 54        |
| 6.7.1 input .....                                       | 54        |
| 6.7.2 ginput .....                                      | 54        |
| 6.8 Function Example .....                              | 55        |
| <b>7 Loops</b> .....                                    | <b>59</b> |
| 7.1 Introduction .....                                  | 59        |
| 7.2 The for Loop .....                                  | 59        |
| 7.2.1 For Loops over Non-integers .....                 | 60        |
| 7.2.2 Variable Coding .....                             | 60        |
| 7.2.3 For Loops over a Vector .....                     | 61        |
| 7.2.4 Storing Results in a Vector .....                 | 61        |
| 7.3 Euler Integration Method .....                      | 62        |
| 7.3.1 Numerical Integration of Protein Expression ..... | 63        |
| 7.4 The Logistic Equation Revisited .....               | 64        |
| 7.5 Nested Loops .....                                  | 65        |
| 7.5.1 Looping over Matrices .....                       | 65        |
| 7.5.2 Parameter Variation .....                         | 66        |
| 7.6 The While Loop .....                                | 68        |
| <b>8 Conditional Logic</b> .....                        | <b>71</b> |
| 8.1 Introduction .....                                  | 71        |
| 8.2 Logical Operators .....                             | 71        |
| 8.2.1 Random Booleans .....                             | 72        |
| 8.2.2 Logical Operations on Strings .....               | 72        |
| 8.2.3 Logic and the Find Command .....                  | 73        |
| 8.3 If, elseif and else .....                           | 73        |
| 8.3.1 The Integrate and Fire Neuron .....               | 74        |
| 8.3.2 Catching Errors .....                             | 75        |
| 8.3.3 Function Flexibility .....                        | 75        |
| 8.4 While Loops .....                                   | 76        |
| 8.4.1 Steady-State of Differential Equations .....      | 76        |
| 8.4.2 Breaking a Loop .....                             | 77        |
| 8.4.3 Killing Runaway Loops .....                       | 78        |
| 8.5 Switch Statements .....                             | 78        |
| <b>9 Data In, Data Out</b> .....                        | <b>83</b> |
| 9.1 Introduction .....                                  | 83        |
| 9.2 Built In Readers and Writers .....                  | 83        |
| 9.3 Writing Arrays and Vectors .....                    | 84        |

|           |                                              |            |
|-----------|----------------------------------------------|------------|
| 9.3.1     | Diffusion Matrices .....                     | 84         |
| 9.3.2     | Excitable Membrane Propagation .....         | 88         |
| 9.4       | Reading in Arrays and Vectors .....          | 90         |
| 9.4.1     | Irregular Text Files .....                   | 90         |
| 9.5       | Reading and Writing Movies and Sounds .....  | 91         |
| 9.5.1     | Sounds .....                                 | 93         |
| 9.5.2     | Reading in Images .....                      | 93         |
| 9.6       | Binary Files .....                           | 93         |
| 9.6.1     | Writing Binary Files .....                   | 94         |
| 9.6.2     | Reading Binary Files .....                   | 94         |
| 9.6.3     | Headers .....                                | 95         |
| <b>10</b> | <b>Graphics .....</b>                        | <b>97</b>  |
| 10.1      | Introduction .....                           | 97         |
| 10.2      | Displaying 2D Data .....                     | 97         |
| 10.2.1    | Figure Numbers and Saving Figures .....      | 99         |
| 10.2.2    | Velocity Maps .....                          | 101        |
| 10.2.3    | Log and Semi-Log Plots .....                 | 101        |
| 10.2.4    | Images .....                                 | 102        |
| 10.2.5    | Other 2D Plots .....                         | 103        |
| 10.2.6    | Subplots .....                               | 104        |
| 10.3      | Figure Handles .....                         | 104        |
| 10.3.1    | The Hierarchy of Figure Handles .....        | 105        |
| 10.3.2    | Generating Publication Quality Figures ..... | 107        |
| 10.4      | Displaying 3D Data .....                     | 108        |
| <b>11</b> | <b>Toolboxes .....</b>                       | <b>111</b> |
| 11.1      | Introduction .....                           | 111        |
| 11.2      | Statistical Analysis and Curve Fitting ..... | 112        |
| 11.2.1    | Data Fits to Nonlinear Function .....        | 112        |
| 11.2.2    | Interpolation and Splines .....              | 114        |
| 11.3      | Differential and Integral Equations .....    | 116        |
| 11.3.1    | Integrals and Quadrature .....               | 117        |
| 11.4      | Signal Processing Toolbox .....              | 118        |
| 11.5      | Imaging Processing Toolbox .....             | 119        |
| 11.6      | Symbolic Solver .....                        | 120        |
| 11.7      | Additional Toolboxes and Resources .....     | 122        |
| 11.7.1    | Matlab Central and Other Online Help .....   | 123        |
