ISBN: 978-1-98469-494-2

This book contains information obtained from highly regarded resources. A wide variety of references are listed. Reasonable efforts have been made to publish reliable data and information, but the authors, editors, and the publisher cannot assume responsibility for the legality of all materials or the consequences of their use. The authors, editors, and the publisher have attempted to trace the copyright holders of all material in this publication and express regret to copyright holders if permission to publish has not been obtained. If any copyright material has not been acknowledged, let us know so we may rectify in any future reprint.

Notice: Registered trademark of products or corporate names are used only for explanation and identification without intent of infringement. Case Studies and/or Images presented in the book are the proprietary information of the respective organizations, and have been used here specifically and only for educational purposes. Although care has been taken to check accuracy of formulas and procedures, the detailed methods should be tested further on a small scale before being adopted commercially.

TABLE OF CONTENTS

<i>Glossary</i>	<i>xi</i>
<i>Preface</i>	<i>xv</i>

Chapter 1 Introduction to 3D Printing **1**

Introduction.....	1
1.1 History Of 3D Printing.....	2
1.2 General Principles Of 3D Printing	7
1.2.1 Modeling.....	8
1.2.2 Printing	8
1.2.3 Finishing	9
1.2.4 Materials	10
1.2.5 Multi-material 3D Printing	11
1.2.6 4D Printing.....	12
1.3 3D Printing Process	12
1.4 The Transformative Role Of 3D Printing Technology in Architecture.....	17
1.5 The Potential Of 3D Printing In Architecture.....	20
1.5.1 Additive Manufacturing for Multi-Story Buildings.....	20
1.5.2 Generative AI in Architecture.....	20
1.5.3 Future Trends of 3D Printing in Construction	21
1.6 Ways of Using 3D Printing By Architects	22
1.7 The Future of 3D Printing In Architecture: Opportunities And Challenges.....	24
1.7.1 Opportunities and Advantages of 3D Printing.....	25
1.7.2 The Challenges Faced by Experts	26
1.7.3 3D Printing in the Future	27

Summary.....	33

Chapter 2 3D Printing Technologies for Architecture 37

Introduction.....	37
2.1 Overview of Different 3D Printing Technologies (FDM, SLA, SLS, etc.)	38
2.1.1 FDM (Fused Deposition Modeling).....	38
2.1.2 SLA (Stereolithography).....	39
2.1.3 SLS (Selective Laser Sintering)	41
2.1.4 DMLS (Direct Metal Laser Sintering).....	44
2.1.5 3D Printer Selection.....	45
2.2 Material Properties	46
2.2.1 Thermoplastic Polymers.....	47
2.2.2 Photopolymerizable Resins	50
2.2.3 Metals.....	52
2.2.4 Ceramics	54
2.2.5 Application-Specific 3D Printing Materials.....	55
2.2.6 Material Developments	56
2.3 Selection Criteria for 3D Printing Methods in Architecture.....	57
2.3.1 Step 1: Define Performance Requirements	58
2.3.2 Step 2: Translate Performance Requirements to Material Requirements.....	59
2.3.3 Step 3: Make a Selection	60
2.4 Comparison of Traditional Construction Techniques vs. 3D Printing.....	60
2.4.1 Advantages Of 3D Printing Over Traditional Manufacturing..	61
2.4.2 Advantages of Traditional Manufacturing Over 3D Printing ..	62
2.4.3 Some Comparisons Between 3D Printing and Traditional Manufacturing.....	63
2.4.4 Choosing the Right Construction Method for Your Project.....	64
Summary.....	67
Learn More Online	68
References	68

Chapter 3 Design Principles for 3D Printed Architecture 69

Introduction.....	69
-------------------	----

3.1 Overview of Designing for 3D Printing	71
3.1.1 Design Considerations for 3D Printing.....	72
3.1.2 General Design Consideration for 3D Printing.....	73
3.1.3 How to design parts for FDM 3D printing.....	75
3.1.4 How to design parts for SLA 3D printing.....	83
3.1.5 Designing for SLA Printing.....	85
Print Features	85
3.1.6 SLA Materials.....	88
3.1.7 How to design parts for material jetting 3D printing	90
3.2 The Design of the 3d Printer for Use in Gastronomy	92
3.2.1 Concept of A 3D Printer	93
3.2.2 Material Extrusion Methods	94
3.2.3 Printer Control.....	96
3.2.4 Sustainable Design Considerations Using 3D Printing	97
Summary	102
Learn More Online	103
References	103

Chapter 4 Large-Scale 3D Printing for Construction 105

Introduction.....	105
4.1 Overview Of Large-Scale 3D Printing For Construction	106
4.1.1 Methodology	107
4.1.2 Types of Printers.....	110
4.2 Materials Used In 3D Printing	117
4.2.1 Cementitious Materials	117
4.2.2 Wire-and-Arc AM.....	119
4.2.3 Composite 3D Printing Materials	120
4.3 Three-Dimensional Printing Process	122
4.3.1 Robotic Arm Concrete 3D Printing for Construction Application.....	123
4.3.2 Gantry Concrete 3D Printing for Construction Application...	123
4.3.3 Wire-and-Arc Additive Manufacturing	127
4.3.4 Composite Structure 3D Printing.....	128
4.3.5 Mechanical Properties	128
Summary.....	134
Learn More Online	135
References	135

Chapter 5 Materials and Sustainability in 3D Printing

137

Introduction.....	137
5.1 3D PRINTING MATERIALS.....	138
5.1.1 Material Advancements in 3D Printing	138
5.1.2 Material Selection for 3D Printing	139
5.1.3 3D Printing Materials: Definitions and Test Methods	139
5.1.4 Direct Metal Laser Sintering (DMLS) Materials	140
5.1.5 Stereolithography (SLA) & Carbon DLS Materials.....	145
5.1.6 Selective Laser Sintering (SLS) & Multi Jet Fusion (MJF) Materials.....	148
5.1.7 PolyJet (PJ) Materials	151
5.2 3D Printing Sustainability	152
5.2.1 How Can 3D Printing Progress Sustainability?.....	152
5.2.2 Sustainability in 3D Printing For Business	154
5.2.3 Sustainability in 3D Printing For Consumers	156
5.2.4 3D Printing Sustainability Issues	157
5.3 How Sustainable Is 3D Printing?.....	158
5.3.1 Know Your Printer	158
5.3.2 Why sustainable?.....	159
5.3.3 3D Printing isn't Totally Environmentally Friendly.....	163
5.3.4 Eco-friendly and Sustainability Benefits of 3D Printing.....	165
5.3.5 Environmentally Friendly Alternatives to 3D Printing	166
5.3.6 3D printing has a Positive Impact on the Environment	167
5.3.7 The Future of 3D Printing and Sustainability	168
Summary.....	173

Chapter 6 3D Printing Facades: Design, Fabrication, and Assessment Methods

177

Introduction.....	177
6.1 Understanding 3D Printing Facades.....	178
6.1.1 Site-specific Facades.....	178
6.1.2 3D Printed Facades	179
6.2 Design For 3D Printed Facade	179
6.2.1 Computational Design	180
6.2.2 Performance Integration.....	181
6.2.3 Fabrication Informed Design.....	183

6.3 Fabrication Processes, Materials, And Applications	184
6.3.1 Thermoplastics.....	184
6.3.2 Clay-based Materials	189
6.3.3 Concrete.....	193
6.3.4 Metal.....	197
6.3.5 Alternative Processes	200
6.4 Performance Assessment For 3Dp Facades	203
6.4.1 Performance Indicators and Standards.....	204
6.4.2 Need for New Modeling Approaches.....	204
Summary.....	209

Chapter 7 3D Printing in Urban Planning and Infrastructure

213

Introduction.....	213
7.1 3D Printing in Urban Planning.....	214
7.1.1 Large-Scale Models for City Planning.....	214
7.1.2 Simulating Environmental and Infrastructure Impacts	216
7.1.3 Facilitating Smart City Development.....	217
7.1.4 3D Printing in Public Infrastructure.....	217
7.2 Bridging in 3D Printing	218
7.2.1 Reasons behind the Poor Bridging	219
7.2.2 Temperature, Material and Printing Speed Are Decisive Factors.....	220
7.2.3 Why 3D Printer Ventilation Is Recommended When Bridging	221
7.2.4 3D Printing Parks and Public Spaces.....	222
7.3 Integrating 3D Printing with Smart City Technologies.....	223
7.3.1 Digital Twins (DTs) in 3D Printing for Smart Cities	224
7.3.2 Three-Dimensional Printing in Industry 4.0 for Smart Cities.....	226
7.3.3 Smart 3D Printing Materials for Smart Cities	227
7.3.4 Three-Dimensional Printing in Soft Robotics for Smart Cities.....	230
7.3.5 Wire-Arc Additive Manufacturing (WAAM) for Smart Cities.....	232
7.3.6 Machine Learning (ML) in 3D Printing for Smart Cities.....	234
7.3.7 Three-Dimensional Printing in Structural Health Monitoring (SHM) for Smart Cities.....	236

7.3.8 Repair Strategies in 3D Printing for Smart Cities	237
Summary	241

Chapter 8 3D Printing and Innovation in Architecture 245

Introduction.....	245
8.1 Ai, Robotics, And 3D Printing Powering Architecture, Engineering, And Construction (Aec) Innovation	246
8.1.1 Artificial intelligence (AI): New Brain behind Manufacturing and AEC.....	247
8.1.2 Robotics: Taking on the Heavy Lifting in Manufacturing and Construction	248
8.1.3 3D Printing: Redefining Production and Construction	249
8.1.4 Real-World Convergence of Technologies	250
8.2 Exploring The Cutting-Edge: Latest Innovations In Materials For Architecture And Planning.....	251
8.3 The Impact Of 3D Printing On Architectural Model Making	253
8.4 Exploring Design Freedom With 3D Printing	254
8.4.1 Understanding the Design Freedom of 3D Printing	255
8.4.2 Examples of the Design Freedom Offered by 3D Printing.....	256
8.5 Linking 3D Printing And City Models	257
8.6 3D-Printed Architecture Shaping The Future Of Urban Planning...	261
8.6.1 Benefits of 3D-Printed Architecture in Urban Planning	261
8.6.2 Real-World Examples.....	262
8.6.3 Impact of 3D Printing on Future Cities.....	264
Summary.....	278
