

EXPERT INSIGHT

Python for ArcGIS Pro

Automate cartography and data analysis using ArcPy,
ArcGIS API for Python, Notebooks, and pandas

Forewords by:

*Dr. Christopher Tucker,
Chairman, American Geographical Society*

*René Rubalcava,
SoftWhere Development Engineer, Esri*

Table of Contents

Preface	xix
----------------	------------

Part I: Introduction to Python Modules for ArcGIS Pro	1
--------------------------------------------------------------	----------

Chapter 1: Introduction to Python for GIS	3
--------------------------------------------------	----------

Python: Built different	4
--------------------------------------	----------

Python versions • 5

ArcGIS Python versions • 6

What is Python? • 6

Where is it installed? • 7

Python interpreter • 8

What is a Python script? • 9

Executables included • 9

How to call the executable • 10

IDLE development environment • 12

Windows file path issues • 13

The operating system and Python system modules • 14

The basics of programming	16
----------------------------------------	-----------

Variables • 18

Variable formatting rules • 19

Assigned to vs is equal to (value comparison) • 19

Data types • 19

<i>Checking the data type</i>	• 20
<i>Strings</i>	• 20
<i>Integers</i>	• 26
<i>Floating numbers</i>	• 26
<i>Conversion between strings, integers, and floats</i>	• 28
Data structures or containers	• 28
<i>Tuples</i>	• 29
<i>Lists</i>	• 30
<i>Sets</i>	• 32
<i>Dictionaries</i>	• 33
Iteration	• 34
<i>For loops</i>	• 34
<i>While loops</i>	• 35
<i>Counters and enumerators</i>	• 35
Conditionals	• 36
<i>If versus else</i>	• 37
Zero-based indexing	• 37
<i>Data extraction using index position</i>	• 37
<i>Data extraction using reverse index position</i>	• 37
Functions	• 38
<i>Components of a function</i>	• 38
<i>Namespaces</i>	• 39
<i>Function examples</i>	• 39
Classes	• 40
Installing and importing modules	41
Using pip	• 42
Installing modules that are not in PyPI	• 44
<i>The setup.py file</i>	• 44
<i>Wheel files</i>	• 44
Installing in virtual environments	• 44
Importing modules	• 45

Three ways to import • 46

Importing custom code • 47

The site-packages folder • 48

Basic style tips for writing scripts 49

Indentation • 49

Using print statements • 50

Structuring a script • 51

Summary 52

Chapter 2: Basics of ArcPy **53**

Checking your ArcPy install 53

Using the correct Python IDLE Shell • 56

Using the Python IDLE Shell • 60

The Python window in ArcGIS Pro • 63

ArcPy environment settings 68

ArcPy tools: Geoprocessing using ArcPy 69

Built-in ArcPy functions 76

The Describe function • 77

List functions • 78

The wildcard parameter • 84

Combining wildcard and feature type parameters • 86

Introduction to ArcPy modules 88

Spatial Analyst module • 89

Summary 93

Chapter 3: ArcGIS API for Python **95**

What is the ArcGIS API for Python? 96

ArcGIS API modules • 96

What does it do and why use it? • 97

The Python Package Manager 98

Python environments • 98

How to create a new virtual environment • 99	
ArcGIS Pro Notebooks	104
Creating a Notebook in ArcGIS Pro • 105	
<i>Creating your first Notebook</i> • 106	
<i>ArcGIS Notebook structure</i> • 107	
<i>Keyboard shortcuts</i> • 110	
Connecting to ArcGIS Online or ArcGIS Enterprise • 111	
<i>Anonymous users</i> • 112	
<i>ArcGIS Pro connection</i> • 112	
<i>Built-in users</i> • 112	
Creating a Notebook • 113	
Using the gis module to manage your GIS	115
Searching for data, users, or groups • 115	
<i>Searching for public data as an anonymous user</i> • 115	
<i>Searching for data when connected to your organization</i> • 122	
<i>Managing users</i> • 130	
Summary	135

Part II: Applying Python Modules to Common GIS Tasks **137**

Chapter 4: The Data Access Module and Cursors	139
Walking through a directory to find data	140
arcpy.da.Walk • 140	
arcpy.da.Walk exercise • 140	
<i>Unzipping files using os.walk</i> • 141	
<i>Copying shapefiles to feature classes using arcpy.da.Walk</i> • 142	
Cursors	146
Search cursor • 146	
<i>Accessing the geometry of a feature class</i> • 148	
<i>Using a search cursor with a data dictionary as a lookup value</i> • 152	

Update cursor • 157	
Insert cursor • 160	
Summary	168
Chapter 5: Publishing to ArcGIS Online	171
Using ContentManager for publishing and organizing data	171
Publishing data • 172	
<i>Adding data from a CSV</i> • 172	
<i>Adding and publishing tips</i> • 176	
Organizing data and managing groups and users • 177	
<i>Organizing data into a folder</i> • 177	
<i>Accessing and managing groups</i> • 180	
Using the features module to work with feature layers	184
Querying feature layers • 185	
Editing features • 188	
Appending features • 191	
Using the mapping module to visualize your data	196
Summary	204
Chapter 6: ArcToolbox Script Tools	207
Introduction to script tools	207
How to create a script tool	209
Script tool General settings • 211	
Script tool Parameters tab • 214	
Script tool Validation • 220	
Writing messages • 221	
Exercise: Turning scripts into tools	222
Exporting a Notebook to a script in ArcGIS Pro 2.8 • 223	
Copying and pasting cells to a script in ArcGIS Pro 2.7 • 225	
Modifying a script to accept user input in the script tool • 226	
Creating your script tool in ArcGIS Pro • 230	

Running and testing the script tool • 234	
Updating the script tool to take census geography files • 237	
Testing input parameters • 239	
Adding custom messages • 240	
Testing the finished script tool • 243	
<i>Testing SQL with Contra Costa Tract data</i> • 243	
<i>Testing the script with California county geography</i> • 245	
<i>Testing the script with a space in the area name</i> • 247	
Summary	250
Chapter 7: Automated Map Production	251
<hr/>	
Referencing projects and maps within projects	252
Updating and fixing data sources	255
Fixing broken links • 255	
Working with layers	260
Adding, moving, and removing layers • 260	
Layer symbology • 267	
Layouts	282
Layers • 282	
Layout elements • 285	
<i>Legend</i> • 288	
<i>North arrow, scale bar, and text</i> • 295	
Exporting layouts • 297	
Summary	301
Part III: Geospatial Data Analysis	303
<hr/>	
Chapter 8: Pandas, Data Frames, and Vector Data	305
<hr/>	
Introduction to Pandas	306
Pandas DataFrames • 306	
Pandas Series • 306	

Spatially Enabled DataFrames • 307	
Installing Pandas • 308	
Getting data into (and out of) a Pandas DataFrame • 309	
<i>Reading data from a file</i> • 309	
<i>Writing data to a file</i> • 311	
Exercise: From GeoJSON to CSV to SHP using Pandas	311
Normalizing the nested JSON data • 314	
Joining data frames • 315	
Dropping columns • 318	
Creating a CSV • 319	
Creating a Spatially Enabled DataFrame from a DataFrame • 320	
Dropping NaN values using dropna • 323	
Querying the data frame • 324	
Publishing the data to ArcGIS Online • 327	
Converting an ArcGIS Online layer to a DataFrame • 329	
Indexing and slicing DataFrame rows and columns • 331	
Summary	333
Chapter 9: Raster Analysis with Python	335
<hr/>	
Raster data objects	335
Creating a new blank raster • 336	
Reading and copying raster properties • 337	
Creating a raster object from an existing raster • 337	
Saving a raster • 339	
Accessing the raster properties • 339	
<i>Accessing raster and cell value properties</i> • 341	
<i>Geographic properties</i> • 343	
ArcPy Raster tools	344
The Spatial Analyst toolset and the sa module • 344	
<i>Generating a raster object</i> • 345	
<i>Statistical raster creation tool</i> • 347	

<i>Conditionals</i> • 348	
<i>The Hillshade tool</i> • 349	
<i>The Conditional tool</i> • 353	
Map Algebra • 355	
<i>Shorthand operators for Map Algebra</i> • 360	
Using <code>arcgis.raster</code>	365
Working with imagery layers • 366	
<i>Plotting a histogram</i> • 367	
Working with raster layers • 370	
Summary	371
Chapter 10: Geospatial Data Processing with NumPy	373
<hr/>	
Introduction to NumPy	374
Advantages of NumPy arrays • 374	
NumPy arrays versus Python lists • 375	
Importing NumPy • 375	
Basics of NumPy for rasters	375
Creating an array • 376	
Reading a raster into an array • 378	
Array properties • 380	
<i>Size</i> • 380	
<i>Shape</i> • 381	
<i>Data type</i> • 382	
Accessing specific elements • 383	
Accessing a subset of the array • 385	
Slicing a raster • 387	
Concatenating arrays • 388	
Creating a raster from a NumPy array • 392	
Mathematical operations with NumPy • 392	
Array queries • 397	

Exercise: Statistical analysis of raster data using NumPy	399
Creating charts from NumPy arrays using Matplotlib • 402	
Summary	409

Part IV: Case Studies 411

Chapter 11: Case Study: ArcGIS Online Administration and Data Management 413

Case study: Administering your ArcGIS Online account	414
Creating users • 414	
Assigning licenses and credits • 420	
Creating reports for item usage • 425	
Reassigning user data • 436	
<i>Transferring data to a different user and creating a new folder • 436</i>	
<i>Transferring data to a different user with an existing folder • 442</i>	
Case study: Downloading and renaming attachments	444
Summary	455

Chapter 12: Case Study: Advanced Map Automation 457

Case study introduction	458
Setting up a layout for map automation	459
Source text element • 462	
Inset map frame • 465	
DetailsHeader and DetailsBox text elements • 469	
Legend element • 469	
Legend Item elements • 474	
Scale bar and north arrow elements • 476	
<i>Scale bar • 476</i>	
<i>North arrow • 479</i>	
Title text element • 481	
<i>Map Frame element • 481</i>	

Creating and adding data to your map	481
Working with legend and text elements in the layout	495
Changing the map view and exporting	498
Summary	505
Chapter 13: Case Study: Predicting Crop Yields	507
Case study introduction	508
Data and study area • 508	
Data concepts • 510	
Downloading datasets	512
World countries • 513	
Population • 515	
Rainfall • 516	
Agricultural land • 516	
Crop yields • 517	
Pesticide and fertilizer use • 521	
Temperature change • 522	
Cleaning up and combining the data	524
Fitting a random forest model	528
Loading the result into ArcGIS Online	531
Generating an HTML file using ArcGIS API for JavaScript	533
Summary	541
Other Books You May Enjoy	545
Index	549
