London

Contents

Preface	vii
List of Symbols	xiii
CHAPTER 1 FUNDAMENTALS OF GROUNDWATER FLOW	1
1-1 Scope and Aim of Subject	1
1-2 Nature of Soil Body	2
1-3 Discharge Velocity and Seepage Velocity	4
1-4 Darcy's Law	4
1-5 Range of Validity of Darcy's Law	6
1-6 Coefficient of Permeability	7
1-7 Capillarity	8
1-8 General Hydrodynamic Equations, Velocity Potential	10
1-9 Two-dimensional Flow, Stream Function	15
1-10 Streamlines and Equipotential Lines	16
1-11 Boundary Conditions	18
1-12 The Flow Net	21
1-13 Seepage Force and Critical Gradient	23
1-14 Anisotropy	26
CHAPTER 2 APPLICATION OF THE DUPUIT THEORY OF UNCONFINED FLOW	40
2-1 Basic Considerations	40
2-2 Two-dimensional Flow on a Horizontal Impervious Boundary	42
2-3 Free Surface Subject to Infiltration or Evaporation	43
2-4 Groundwater Flow with an Inclined Lower Impervious Boundary	44
2-5 Pavlovsky's Solution for $i > 0$	47
2-6 Pavlovsky's Solution for $i < 0$	49
2-7 Seepage through an Earth Dam on an Impervious Base	50
2-8 Radial Flow into Completely Penetrating Wells.	57
CHAPTER 3 CONFORMAL MAPPING BY ELEMENTARY FUNCTIONS	62
3-1 Introduction and Geometrical Representation of $w = f(z)$	62
3-2 Application of the Mapping Function $z = w^2$	64
3-3 Conformal Mapping	69
3-4 Fundamentals of Solution of Two-dimensional Flow Problems by Conformal Mapping	70

3-5	Linear Mapping Function	71
3-6	Reciprocal Function, $w = 1/z$	72
3-7	Bilinear Transformation	75
3-8	Upper Half of z Plane into Unit Circle in w Plane	76
3-9	The Transformation $w = z^n$	77
CHAPTER 4 SPECIAL MAPPING TECHNIQUES		81
4-1	Velocity Hodograph	81
4-2	Flow Characteristics at Singular Points of Flow Domain	83
4-3	Examples of Velocity Hodographs	85
4-4	Construction of Solution by Complex Velocity	88
4-5	Zhukovsky Functions	92
4-6	The Schwarz-Christoffel Transformation	93
4-7	Examples of Schwarz-Christoffel Mappings	96
CHAPTER 5 CONFINED FLOW		101
5-1	General Discussion	101
5-2	Hydraulic Structure on Surface of Infinite Depth of Porous Media	103
5-3	Inclined Sheetpile	111
5-4	Finite Lower Impervious Boundary: General	114
5-5	Impervious Structure with Sheetpile on Layer of Finite Depth	116
5-6	Heaving and Roofing	124
5-7	Depressed Structure on a Permeable Base of Infinite Extent	128
5-8	Depressed Structure on a Permeable Base of Infinite Extent with Two Symmetrical Rows of Pilings	132
5-9	Double-wall Sheetpile Cofferdam	136
CHAPTER 6 APPROXIMATE METHODS OF SOLUTION FOR CONFINED FLOW PROBLEMS		141
6-1	Graphical Flow Net	141
6-2	Solutions by Analogies: Electrical Analogue	142
6-3	The Flow Tank	143
6-4	Viscous Flow Models: Hele-Shaw Model	144
6-5	Relaxation Method	148
6-6	Method of Fragments	151
6-7	Flow in Layered Systems	159
CHAPTER 7 UNCONFINED FLOW THROUGH EARTH STRUCTURES ON HOMOGENEOUS FOUNDATIONS OF GREAT DEPTH		168
7-1	General Discussion	168
7-2	Unconfined Flow around Cutoffs	168
7-3	Seepage through Homogeneous Earth Dam with Horizontal Under-drain	171
7-4	Earth Structure with a Cutoff Wall	175
7-5	Earth Structure with a Cutoff Wall at the Toe	181
7-6	Earth Structure with Horizontal Drain Underlain by Impervious Material of Infinite Extent	182
7-7	Seepage through Earth Structures into Drains of Finite Length	186

CHAPTER 8 UNCONFINED FLOW THROUGH HOMOGENEOUS EARTH STRUCTURES OF FINITE DEPTH	198
8-1 Introduction	198
8-2 Solution by Inversion	198
8-3 Rockfill Dams with Central Cores without Tail Water	200
8-4 Rockfill Dams with Tail Water	205
8-5 Seepage through an Earth Dam on an Inclined Impervious Base	208
8-6 Earth Dam on Impervious Base with Toe Filter	210
8-7 Seepage through Earth Dam Founded on Layer of Finite Depth with Cutoff Wall	226
CHAPTER 9 SEEPAGE FROM CANALS AND DITCHES	231
9-1 Seepage from a Ditch with a Curved Perimeter into a Horizontal Drainage Layer	231
9-2 Seepage from a Ditch into a Curved Drainage Layer	234
9-3 Seepage from Ditches of Trapezoidal Shapes	235
9-4 Seepage from Triangular-shaped Ditches	240
9-5 Seepage from Ditches into Permeable Layers at Shallow Depths	241
9-6 Seepage from a Shallow Ditch Considering Capillarity	243
9-7 Seepage from a Ditch into a Permeable Layer of Finite Length	246
CHAPTER 10 SEEPAGE TOWARD WELLS	249
10-1 Introduction: Fundamental Equations; Sources and Sinks	249
10-2 Well and Uniform Flow	251
10-3 Flow between Two Wells of Equal Strength.	252
10-4 An Eccentrically Placed Well within a Circular Contour	253
10-5 Influence of the Shape of the Contour on the Discharge	255
10-6 Interference among Wells	258
10-7 Partially Penetrating Well in Semi-infinite Media	259
10-8 Partially Penetrating Well in Layer of Finite Thickness	262
APPENDIX A	265
A-1 Complex Numbers	265
A-2 Absolute Values	268
A-3 Analytic Functions	269
A-4 Elementary Functions of z ; Hyperbolic Functions.	273
A-5 Complex Integration	275
A-6 Integration around Singular Points; Residues	278
APPENDIX B	284
B-1 Elliptic Integrals	284
B-2 Elliptic Integrals of the First Kind	284
B-3 Elliptic Functions; Jacobian Functions	287
B-4 Elliptic Integrals of the Second Kind	291
B-5 Jacobian Zeta Function	295
B-6 Elliptic Integrals of the Third Kind	296
B-7 Gamma and Beta Functions	298
References	301
Index	309
