

**HANDBOOK OF
BIOMEDICAL
INSTRUMENTATION**

R S Khandpur

CONTENTS

Preface

PART ONE: RECORDING AND MONITORING INSTRUMENTS

1 Bioelectric Signals and Electrodes

- Origin of bioelectric signals 3
- Recording electrodes 8
- Skin-contact impedance 14
- Electrodes for ECG 16
- Electrodes for EEG 24
- Electrodes for EMG 25
- Electrical conductivity of electrode jellies and creams 27
- Microelectrodes 28

2 Physiological Transducers

- Pressure transducers 34
- Transducers for body temperature measurement 43
- Pulse sensors 54
- Respiration sensors 56

3 Recording Systems

- Basic recording system 58
- General consideration for electronic recorder amplifiers 59
- Sources of noise in low level recording circuits 60
- Preamplifiers 62
- The main amplifier and driver stage 70
- Writing systems 72
- Direct writing recorders 73
- Ink jet recorder 80
- Potentiometric recorder 81
- Ultra-violet (UV) recorders 84
- Thermal array recorder 87
- Electrostatic recorder 89

v

3

31

58

Light gate array recorder	91	
Instrumentation tape recorders	92	
4 Biomedical Recorders		94
Electrocardiograph	94	
Phonocardiograph	106	
Electroencephalograph (EEG)	109	
Electromyograph	112	
5 Medical Display Systems		118
Oscilloscope for biomedical measurements	118	
Cardioscope	121	
Multichannel displays	122	
Non-fade display systems	124	
6 Patient Monitoring Systems		135
System concepts	135	
Measurement of heart rate	141	
Blood pressure measurement	147	
Measurement of temperature	162	
Measurement of respiration rate	162	
Apnoea detectors	165	
7 Arrhythmia and Ambulatory Monitoring Instruments		169
Cardiac arrhythmias	169	
Ambulatory monitoring instruments	186	
8 Foetal Monitoring Instruments		194
Cardiotocograph	194	
Methods of monitoring foetal heart rate	195	
Foetal heart rate measurement		
Monitoring labour activity	208	
Continuous monitoring of foetal scalp pH	210	
Use of computers for processing cardiotocographic data	212	
9 Biomedical Telemetry		214
Wireless Telemetry	214	
Single channel telemetry systems	218	
Temperature telemetry system	222	
Multichannel wireless telemetry system	224	
Multipatient telemetry	228	
Transmission of analog physiological signals over telephone lines	232	
10 Computer Applications in Medical Field		236
Computer-aided ECG analysis	237	
Computerised catheterisation laboratory	240	

Computerised patient monitoring system	245	
Microcomputers	248	
11 Patient Safety		254
Electric shock hazards	254	
Leakage currents	262	
Test instruments for checking safety parameters of biomedical equipments	269	
PART TWO: MEASUREMENT AND ANALYSIS TECHNIQUES		
12 Blood Flowmeters		275
Electromagnetic blood flowmeter	275	
Ultrasonic blood flowmeters	281	
NMR blood flowmeter	290	
Laser Doppler flowmetry	292	
13 Cardiac Output Measurement		295
Indicator dilution methods	295	
Measurement of continuous cardiac output derived from the aortic pressure waveform	304	
Impedance technique	306	
14 Pulmonary Function Analysers		308
Pulmonary function measurement	308	
Spirometry	311	
Pulmonary function analysers	322	
Respiratory gas analysers	326	
15 Blood Gas Analysers		334
Blood pH measurement	335	
Measurement of blood pCO ₂	339	
Blood pO ₂ measurement	342	
A complete blood gas analyser	348	
16 Oximeters		355
Oximetry	355	
17 Blood Cell Counters		367
Methods of cell counting	369	
Coulter counters	372	
Automatic recognition and differential counting of cells	380	
18 Audiometers		385
Basic audiometer	390	
Pure tone audiometer	392	

- Speech audiometer 393
- Audiometer system Bekesy 394
- Evoked response audiometry system 397

PART THREE: MODERN IMAGING SYSTEMS

- 19 X-Ray Machines and Computed Tomography 405**
 - X-ray machine 407
 - X-ray computed tomography 410
- 20 Magnetic Resonance Imaging System 432**
 - Basic NMR components 447
- 21 Ultrasonic Imaging Systems 458**
 - Physics of ultrasonic waves 458
 - Medical ultrasound 464
 - A-scan 471
 - Echocardiograph (M-mode) 473
 - B-scanner 476
 - Real time ultrasonic imaging systems 482
 - Display devices for ultrasonic imaging 498
 - Biological effects of ultrasound 503
- 22 Medical Thermography 506**
 - Physics of thermography 507
 - Thermographic equipment 510
 - Quantitative medical thermography 513
 - Pyroelectric vidicon camera 518
 - Applications of thermography 519

PART FOUR: THERAPEUTIC EQUIPMENT

- 23 Cardiac Pacemakers 525**
 - External pacemakers 526
 - Implantable pacemakers 532
 - Programmable pacemaker 539
 - Performance aspects of implantable pacemakers 543
 - Power sources for implantable pacemakers 547
 - Leads and electrodes 550
 - Pacing system analysers 557
- 24 Cardiac Defibrillators 558**
 - dc-defibrillator 559

Defibrillator electrodes	561	
Defibrillator with synchroniser	562	
Performance aspects of dc-defibrillators	565	
Implantable defibrillators	569	
Defibrillator analyser	571	
25 Hemodialysis Machine		573
Function of the kidneys	573	
Artificial kidney	576	
Dialysers	577	
Membranes for hemodialysis	587	
Hemodialysis machines	588	
Portable kidney machines	596	
26 Instruments for Surgery		600
Surgical diathermy machine	603	
Electrodes used with surgical diathermy	605	
Safety aspects in electrosurgical units	607	
Surgical diathermy analysers	610	
27 Laser Applications in Biomedical Field		612
The laser	612	
Pulsed ruby laser	615	
Nd-YAG laser	617	
Helium-Neon laser	618	
Argon laser	618	
CO ₂ laser	623	
28 Physiotherapy and Electrotherapy Equipment		627
Shortwave diathermy machine	627	
Microwave diathermy machine	631	
Ultrasonic therapy unit	633	
Electro-diagnostic/therapeutic apparatus	636	
Pain relief through electrical stimulation	642	
<i>Glossary of Electronic Terms</i>		649
<i>Glossary of Medical Terms</i>		655
<i>References</i>		658
<i>Index</i>		697
