

BASIC ELECTROMAGNETIC FIELDS

HERBERT P. NEFF, JR.

Contents

Preface xi

Symbols and Units xv

Chapter 1 COULOMB'S LAW AND ELECTRIC FIELD INTENSITY 1

- 1.1 Coordinate Systems 2
- 1.2 Coulomb's Law 4
- 1.3 Charge Configurations 8
- 1.4 Electric Field Intensity 15
- 1.5 Superposition 17
- 1.6 Field of an Infinite Line Charge Density 24
- 1.7 Field of a Sheet of Surface Charge Density 26
- 1.8 A Final Example 30
- 1.9 Concluding Remarks 30
- References 31
- Problems 32

Chapter 2 GAUSS'S LAW AND FLUX DENSITY 34

- 2.1 Electric Flux and Flux Density 34
- 2.2 Gauss's Law 37
- 2.3 Divergence and Maxwell's First Equation 47
- 2.4 Concluding Remarks 54
- References 54
- Problems 55

Chapter 3 SCALAR ELECTRIC POTENTIAL 59

- 3.1 Energy 60
- 3.2 Potential Difference and Potential 63
- 3.3 The Potential Integral 67

vi CONTENTS

3.4	<i>Gradient and Curl</i>	73
3.5	<i>Some Simple Examples</i>	79
3.6	<i>Energy and Energy Density</i>	83
3.7	<i>Concluding Remarks</i>	89
	<i>References</i>	89
	<i>Problems</i>	89

Chapter 4 MATERIALS AND MATERIAL DISCONTINUITIES WITH ELECTROSTATIC FIELDS 93

4.1	<i>Conductor Properties</i>	94
4.2	<i>The Electrostatic Dipole</i>	98
4.3	<i>Dielectric Properties</i>	100
4.4	<i>Capacitance</i>	107
4.5	<i>Conclusions</i>	116
	<i>References</i>	117
	<i>Problems</i>	117

Chapter 5 BOUNDARY VALUE PROBLEMS 122

5.1	<i>Poisson's and Laplace's Equation</i>	123
5.2	<i>One-Dimensional Solutions</i>	127
5.3	<i>A Two-Dimensional Example of a Boundary Value Problem Using Analytical Methods</i>	133
5.4	<i>A Numerical Method for Solving Boundary Value Problems</i>	139
5.5	<i>A Numerical Method for Solving an Integral Equation</i>	148
5.6	<i>Image Theory</i>	154
5.7	<i>Conclusions</i>	156
	<i>References</i>	156
	<i>Problems</i>	157

Chapter 6 STEADY ELECTRIC CURRENTS 161

6.1	<i>Electric Current Distributions</i>	161
6.2	<i>Conservation of Charge</i>	163
6.3	<i>Conduction Current</i>	164
6.4	<i>Joule's Law</i>	165
6.5	<i>Resistance</i>	166
6.6	<i>Sources for Currents</i>	169
6.7	<i>Intrinsic Semiconductors</i>	172
6.8	<i>The Semiconductor Junction Diode and the Vacuum Diode</i>	173
6.9	<i>Conclusions</i>	180
	<i>References</i>	181
	<i>Problems</i>	181

Chapter 7 THE STEADY MAGNETIC FIELD 184

7.1	<i>The Biot-Savart Law</i>	185
7.2	<i>The Infinite Filamentary Wire</i>	189

7.3	<i>Ampere's Law</i>	193
7.4	<i>Ampere's Law in Point Form</i>	200
7.5	<i>Magnetic Flux and Flux Density</i>	202
7.6	<i>Magnetic Scalar and Vector Potential</i>	203
7.7	<i>The Electric Current Loop or Magnetic Dipole</i>	209
7.8	<i>The Infinite Filamentary Current (Again)</i>	212
7.9	<i>Force</i>	213
7.10	<i>Interaction Between Filamentary Currents</i>	217
7.11	<i>Torque</i>	218
7.12	<i>Conclusions</i>	221
	<i>References</i>	222
	<i>Problems</i>	222

Chapter 8 MATERIALS AND MATERIAL DISCONTINUITIES WITH THE STEADY MAGNETIC FIELD 227

8.1	<i>Magnetic Materials</i>	227
8.2	<i>Magnetization and Boundary Conditions</i>	228
8.3	<i>Simple Magnetic Circuits</i>	233
8.4	<i>Inductance</i>	242
8.5	<i>Inductance and Magnetostatic Energy</i>	251
8.6	<i>A Numerical Method for Magnetic Field Problems</i>	258
8.7	<i>Conclusions</i>	263
	<i>References</i>	263
	<i>Problems</i>	263

Chapter 9 MAXWELL'S EQUATIONS 268

9.1	<i>Faraday's Law</i>	269
9.2	<i>Conservation of Charge (Again)</i>	277
9.3	<i>Maxwell's Second Equation</i>	278
9.4	<i>A Summary of Maxwell's Equations</i>	280
9.5	<i>Potentials</i>	284
9.6	<i>Poynting's Theorem</i>	290
9.7	<i>Boundary Conditions</i>	293
9.8	<i>Circuit Theory from Field Theory</i>	295
9.9	<i>A Numerical Method for Quasistatic Field Problems</i>	298
9.10	<i>Conclusions</i>	302
	<i>References</i>	302
	<i>Problems</i>	303

Chapter 10 UNIFORM PLANE WAVE PROPAGATION 307

10.1	<i>The Undamped Uniform Plane Wave</i>	308
10.2	<i>Wavelength</i>	315
10.3	<i>Phase Velocity</i>	316
10.4	<i>Power Density</i>	316
10.5	<i>Velocity of Energy Flow</i>	317

10.6	<i>Wave Impedance</i>	318
10.7	<i>Uniform Damped Plane Waves</i>	321
10.8	<i>Good Dielectrics</i>	325
10.9	<i>Good Conductors</i>	326
10.10	<i>Reflection of Plane Waves</i>	326
10.11	<i>Dielectric-Conductor Interface</i>	326
10.12	<i>Skin Depth and Surface Impedance</i>	331
10.13	<i>Dielectric-Dielectric Interface</i>	335
10.14	<i>Dielectric-Perfect Conductor Interface</i>	338
10.15	<i>Conductor-Perfect Conductor Interface</i>	340
10.16	<i>Oblique Incidence</i>	341
10.17	<i>Polarization</i>	349
10.18	<i>Dispersion</i>	351
10.19	<i>Concluding Remarks</i>	352
	<i>References</i>	352
	<i>Problems</i>	353

Chapter 11 LOSSLESS TWO-WIRE SYSTEMS (TRANSMISSION LINES) 357

11.1	<i>The Parallel Plane Guiding System</i>	357
11.2	<i>The General Lossless Line</i>	359
11.3	<i>The Lossless Line Equivalent Circuit</i>	364
11.4	<i>General Solutions for V and I—Lossless Line</i>	367
11.5	<i>Voltage Standing Wave Ratio</i>	369
11.6	<i>Input Impedance</i>	370
11.7	<i>Effect of the Generator</i>	372
11.8	<i>Special Load Impedances</i>	374
11.9	<i>Equivalent Lumped Parameters</i>	379
11.10	<i>Pulses on the Lossless Line</i>	380
11.11	<i>Concluding Remarks</i>	387
	<i>References</i>	388
	<i>Problems</i>	388

Chapter 12 THE SMITH CHART 391

12.1	<i>The Slotted Line</i>	391
12.2	<i>Derivation of the Smith Chart</i>	393
12.3	<i>Transmission Line Matching</i>	402
12.4	<i>Single Stub Matching</i>	404
12.5	<i>Double Stub Matching</i>	409
12.6	<i>Concluding Remarks</i>	411
	<i>References</i>	411
	<i>Problems</i>	412

Chapter 13 LOSSY TRANSMISSION LINES 414

13.1	<i>Losses in General</i>	414
------	--------------------------	-----

13.2	<i>Field Equations with Loss</i>	417
13.3	<i>The General Line</i>	418
13.4	<i>Special Two-Wire Lines</i>	425
13.5	<i>Quality Factor</i>	428
13.6	<i>Lossy Line Analysis with the Smith Chart</i>	430
13.7	<i>Line Parameters</i>	437
13.8	<i>The Coaxial Cavity</i>	438
13.9	<i>Concluding Remarks</i>	449
	<i>References</i>	450
	<i>Problems</i>	450

Chapter 14 LOSSLESS WAVE GUIDES AND CAVITIES 453

14.1	<i>Potentials</i>	454
14.2	<i>The Parallel Plane System</i>	456
14.3	<i>TE and TM Mode Phase Velocity</i>	466
14.4	<i>TE and TM Field Plots</i>	469
14.5	<i>One-Conductor Hollow Rectangular Waveguide</i>	469
14.6	<i>The Dominant TE_{10} Mode</i>	473
14.7	<i>Lossless Cavity Resonators</i>	485
14.8	<i>Concluding Remarks</i>	487
	<i>References</i>	488
	<i>Problems</i>	488

Chapter 15 WAVEGUIDE AND CAVITY LOSSES 491

15.1	<i>General Remarks</i>	491
15.2	<i>Rectangular Waveguide—TE_{10} Mode</i>	493
15.3	<i>Rectangular Cavity—TE_{101} Mode</i>	495
15.4	<i>Concluding Remarks</i>	499
	<i>References</i>	500
	<i>Problems</i>	500

Chapter 16 RADIATION 502

16.1	<i>The Radiation Field</i>	503
16.2	<i>The Hertzian Dipole</i>	507
16.3	<i>The Half-Wave ($\lambda/2$) Dipole</i>	511
16.4	<i>Gain, Directivity, Aperture, and Effective Length</i>	516
16.5	<i>Friis Transmission Formula</i>	528
16.6	<i>Concluding Remarks</i>	529
	<i>References</i>	530
	<i>Problems</i>	530

Appendix A Vector Relations 535

Appendix B Physical Constants 540

Appendix C Material Parameters 541

x CONTENTS

Appendix D Fourier Series 544

Appendix E Fourier Transforms 546

Appendix F Alternate Formulation of B 551

Appendix G Proofs of Integral Relations 560

Appendix H Special Functions 571

Answers to Selected Problems 585

Index 593
