Journal of Physics D: Applied Physics

Volume 30

Number 8

21 April 1997

RAPID COMMUNICATIONS

- L23 Infrared absorption of the products formed in distributed electron cyclotron resonance plasmas of hexamethyldisiloxane and tetraethoxysilane**
P Raynaud, Y Segui, G Balmer, A Boulanger and R R Burke
- L28 High silicon etch rates by hot filament generated atomic hydrogen**
H N Wanka and M B Schubert

PAPERS

APPLIED INTERFACES AND SURFACES

- 1167 On the effects of optical constants and physical parameters on the emittance of thin-film selective emitters for thermophotovoltaic applications**
M Ghanashyam Krishna, R G Biswas and A K Bhattacharya

FUNDAMENTAL AREAS OF PHENOMENOLOGY (INCLUDING APPLICATIONS)

- 1175 The force acting on a moving current loop above a conducting plate**
N M Sakaji
- 1181 A theory of broad-area semiconductor lasers with modal reflectors**
M Szymański, J M Kubiśa, P Szczepański and B Mroziwicz
- 1190 An analysis of the heat transfer from a moving elliptical cylinder**
M Baeva, P Baev and A Kaplan
- 1197 Pressure waves arising from the oscillation of cavitation bubbles under dynamic stressing**
P R Williams, P M Williams and S W J Brown
- 1207 The simulation of short-term streaming electrification dynamics**
J A Palmer and J K Nelson

PHYSICS OF GASES, PLASMAS AND ELECTRIC DISCHARGES

- 1214 Modelling of plasma chemical processes in pulsed corona discharges**
G V Naidis
- 1219 The effect of laser-induced photodetachment in O₂ rf discharges**
M Shibata, N Nakano and T Makabe

CONDENSED MATTER: ELECTRONIC STRUCTURE, ELECTRICAL AND OPTICAL PROPERTIES

- 1225 The anomalous treeing resistance of proton-irradiated PMMA**
O S Gefle and S M Lebedev
- 1228 The effect of electrode materials on Pb alloy superconducting tunnel junctions for submillimetre wave heterodyne receiver application**
S M X Claude and S W Moon
- 1234 General-order kinetics of thermoluminescence and its physical meaning**
C M Sunta, W E Feria Ayta, R N Kulkarni, T M Piters and S Watanabe

Continued on inside back cover

- 1243 **Space-charge distributed relaxations in vacuum-deposited polyvinyl fluoride films**
S Chand, G D Sharma, S Chandra and R Chandra
- 1248 **A comparison of enhanced field emission from broad surfaces in direct-current and radiofrequency regimes**
M Luong, H Safa, B Bonin, T Junquera, A Le Goff and S Maïssa
- 1252 **Modes in electron-hopping transport over insulators sustained by secondary electron emission**
B H W Hendriks, G G P van Gorkom, N Lambert and S T de Zwart

CROSS-DISCIPLINARY PHYSICS AND RELATED AREAS OF SCIENCE AND TECHNOLOGY

- 1265 **Structure and viscoelasticity of an electrorheological fluid in oscillatory shear: computer simulation investigation**
Zuowei Wang, Zhifang Lin and Ruibao Tao
