Number 13

7 July 1997

PAPERS

APPLIED INTERFACES AND SURFACES

- 1827 **An EXAFS and XRD study of the structure of nanocrystalline Ti-B-N thin films**
T P Mollart, P N Gibson and M A Baker
- 1833 **Anodic film formation on Al-Au alloys: enrichment of gold in the alloy and subsequent evolution of oxygen**
H Habazaki, K Shimizu, P Skeldon, G E Thompson, G C Wood and X Zhou

APPLIED MAGNETISM AND MAGNETIC MATERIALS

- 1842 **Effects of magnetic permeability and resistivity on magneto-impedance in Fe-Cu-Nb-Si-B alloy ribbons**
Wanjun Ku, Fuding Ge and Jing Zhu
- 1846 **The field analysis and simulation of a permanent-magnet bias-field device for magneto-optic recording**
E P Furlani
- 1854 **The relation between the micromagnetic and microstructural properties of HDDR-processed Nd-Fe-B-type materials**
P Thompson, O Gutfleisch, J N Chapman and I R Harris
- 1861 **Solid state applications of a transportable low-cost megagauss generator**
N Puhlmann, O Portugall, H-U Müller, M Barczewski, I Stolpe and M von Ortenberg

FUNDAMENTAL AREAS OF PHENOMENOLOGY (INCLUDING APPLICATIONS)

- 1867 **The effect of surface expansion on transient heat transfer from a cylinder in cross flow**
F A Youssef

PHYSICS OF GASES, PLASMAS AND ELECTRIC DISCHARGES

- 1878 **A method for simultaneous determination of the diffusion coefficient of particles in gas media and their reflection coefficient at the wall**
I M Rusinov, G W Paeva and A B Blagoev
- 1885 **Heat transfer to a metallic wire exposed to a plasma flow for great Knudsen numbers**
Xi Chen
- 1893 **The determination of the neutral atom density in a high-pressure mercury discharge from the 253.7 nm self-reversed resonance line**
H Elloumi, M Aubès, F Simonet and J J Damelin court
- 1899 **A computational fluid dynamics simulation of high- and low-current arcs in self-blast circuit breakers**
M Claessens, K Möller and H G Thiel
- 1908 **Rare-earth-doped SiO₂ films prepared by plasma-enhanced chemical vapour deposition**
M Yoshihara, A Sekiya, T Morita, K Ishii, S Shimoto, S Sakai and Y Ohki
- 1913 **Non-Laplacian ion trajectories in mutually interacting corona discharges**
A Bouziane, C Taplamacioglu, K Hidaka and R T Waters
- 1922 **The acceleration of a cathode-jet plasma in a pulse vacuum discharge**
S P Gorbunov, V I Krasov and V L Paperny

Continued on inside back cover

- 1928 **Absorption measurements on a low-pressure, inductively coupled, argon-mercury discharge for lighting purposes: 1. The gas temperature and argon metastable states density**
J Jonkers, M Bakker and J A M van der Mullen

CONDENSED MATTER: ELECTRONIC STRUCTURE, ELECTRICAL AND OPTICAL PROPERTIES

- 1934 **A photopyroelectric method with air as the thermal coupling fluid**
J-S Antoniow, M Chirtoc and M Egee

- 1945 **The effects of flow impedance on the current-voltage characteristics of liquid-metal ion sources**
G L R Mair

CROSS-DISCIPLINARY PHYSICS AND RELATED AREAS OF SCIENCE AND TECHNOLOGY

- 1951 **Modelling of the reactive synthesis of ultra-fine powders in a thermal plasma reactor**
M Désilets, J-F Bilodeau and P Proulx

COMMENT

- 1961 **A comment on 'The effective electron affinity estimation from the simultaneous detection of thermally stimulated luminescence and exoelectronic emission. Application to an α -alumina single crystal'**
H Käämbre

REPLY TO COMMENT

- 1963 **Reply to Dr Käämbre's comment**
R Bindi, P Iacconi and D Lapraz
