

STANLEY WOLF

Guide to
Electronic Measurements
and Laboratory Practice

PRENTICE-HALL
ELECTRICAL ENGINEERING SERIES

Contents

Preface

xii

1 Language of Electrical Measurements

1

- Charge, Voltage, and Current 1
- Conventions for Describing
Electrical Quantities 7
- Electrical Units 9
- Circuit Models and Ideal Circuit Elements 10
- Electrical Diagrams 14
- Sinewaves, Frequency, and Phase 20
- Average and RMS Values 22
- Problems 26
- References 30

2 Experimental Data and Errors

32

- Measurement Recording and Reporting 33
- Precision and Accuracy 34
- Computational Aids 36
- Errors in Measurement 40
- Statistical Evaluation of Measurement
Data and Errors 41

vii

The Decibel	45
Problems	47
References	48

3 Electrical Laboratory Practice **49**

Safety	50
Circuit Layout and Assembly	54
Grounds	54
Circuit Protection Devices	60
Input Impedance, Output Impedance, and Loading	63
Interference Signals and Shielding	66
Cables, Connectors, and Switches	82
Power Transfer and Impedance Matching	94
Temperature Effects on Component Operation and Measurements	96
Problems	97
References	99

4 Basic dc and ac Meters **100**

Electromechanical Meter Movements	101
dc Ammeters	108
dc Voltmeters	113
ac Ammeters and Voltmeters	116
Features of Meter Construction	125
How to Use Basic Meters	127
Meter Errors	128
Problems	130
References	131

5 Resistors and Resistance Measurements **132**

Resistance and Resistors	132
Resistor Types	138
Color Coding of Resistors	145
Environmental Effects on Resistors	146
Measurement of Resistance	150
Problems	158
References	160

6	Capacitors and Capacitance Measurements	161
	Capacitance and Capacitors	161
	Capacitor Circuit Models and Losses	170
	Capacitor Types	173
	Color Coding of Capacitors	180
	Capacitance Measurement	182
	Problems	187
	References	188
7	Inductors and Transformers	189
	Inductance and Inductors	189
	Properties of Magnetic Materials	194
	Inductor Structures	200
	Measurement of Inductance	205
	Transformers	211
	Types of Transformers	216
	Electromagnets and Relays	222
	Problems	225
	References	227
8	Batteries, dc Power Supplies, and Standard Cells	228
	Batteries	229
	Common Battery Types	234
	Solar Cell	239
	dc Power Supplies	240
	Standard Cells and Zener Diodes	244
	Problems	247
	References	248
9	The Oscilloscope	250
	Oscilloscope Subsystems	251
	How an Oscilloscope Displays a Signal	262
	Oscilloscope Controls	264
	How to Operate an Oscilloscope	271
	Oscilloscope Limitations	283

High-Frequency and Other Special Oscilloscopes	290	
Oscilloscope Photography	296	
Additional Oscilloscope Measurement Applications	297	
Problems	298	
References	301	
10 Low Frequency Power and Energy Measurements		302
Power Measurements in dc Circuits	303	
Power in ac Circuits	305	
Single-Phase Power Measurements	308	
Electric Power Distribution	313	
Polyphase Power and Measurements	315	
Miscellaneous Meters	320	
Electrical Energy Measurements	323	
Problems	325	
References	326	
11 Potentiometers and Recorders		327
Potentiometers	328	
Recorders	336	
Problems	343	
References	344	
12 Electronic Voltage and Current Meters		346
Analog Electronic Meters	346	
Digital Electronic Meters	357	
Special Purpose Electronic Meters	365	
Problems	369	
References	371	
13 AC Signal Sources		372
Oscillators	372	
Signal Generators	382	

Sweep Frequency Generators	384
Pulse Generators	387
Function Generators	391
Problems	393
References	394

14 Time and Frequency Measurements **396**

Time Measurements	397
Frequency Measurements	400
Harmonic Analysis	408
Problems	412
References	413

15 Electrical Transducers **414**

Strain Gauges	417
Linear Variable Differential Transformers	421
Fluid-Property Transducers (Pressure and Flow Rate)	425
Temperature Transducers	428
Light and Radiation Transducers	434
Sound Transducers	441
Chemical Property Transducers	444
Magnetic Measurements	446
Thickness Transducers	448
Problems	448
References	449

16 Electrical Amplifiers **451**

General Properties of Amplifiers	452
Differential Amplifiers	455
Operational Amplifiers	458
Problems	464
References	465

17 Uses of Electronic Instrumentation in Scientific Measurements **466**

Appendix A	Electrical Units and Conversion Factors	475
Appendix B	Identification of Discrete Solid State Components	478
Appendix C	Meter Calibration	480
Index		483
