# QUEUEING SYSTEMS

VOLUME 16 (1994) Nos. 3,4

Published May 1994

## Contents

### Articles

- A simple formula for mean multiplexing delay for independent regenerative sources  
*H. Dupuis and B. Hajek* 195
- Numerical methods for controlled and uncontrolled multiplexing and queueing systems  
*H.J. Kushner and L.F. Martins* 241
- Convexity of single stage queueing systems with bulk arrival  
*J.G. Shanthikumar* 287
- On the equivalence of three types of blocking in non-Markovian tandem queues  
*H. Sakasegawa and T. Kawashima* 301
- Waiting-time tail probabilities in queues with long-tail service-time distributions  
*J. Abate, G.L. Choudhury and W. Whitt* 311
- A queueing theoretic methodology for the analysis of separable conflict resolution algorithms with variable length elementary events  
*G.C. Polyzos and M.L. Molle* 339
- A general formulation for mean-value analysis in product-form batch-movement queueing networks  
*A.J. Coyle, W. Henderson, C.E.M. Pearce and P.G. Taylor* 363
- Fluid queue driven by an  $M/M/1$  queue  
*J. Virtamo and I. Norros* 373
- A storage model with self-similar input  
*I. Norros* 387
