QUEUEING SYSTEMS

VOLUME 17 (1994) Nos. 1,2

Published September 1994

Contents

Editorial introduction <i>V. Schmidt and R.F. Serfozo</i>	1
Ergodicity of Jackson-type queueing networks <i>F. Baccelli and S. Foss</i>	5
On the stability of queueing systems under precedence restrictions for the service of customers <i>H. Daduna</i>	73
Conditions for finite moments of waiting times in $G/G/1$ queues <i>D.J. Daley, R.D. Foley and T. Rolski</i>	89
Large deviations behavior of counting processes and their inverses <i>P.W. Glynn and W. Whitt</i>	107
On the transient behavior of the processor sharing queue <i>A. Jean-Marie and P. Robert</i>	129
Little laws for utility processes and waiting times in queues <i>R.F. Serfozo</i>	137
Palm calculus for a process with a stationary random measure and its applications to fluid queues <i>M. Miyazawa</i>	183
Imbedded construction of stationary sequences and point processes with a random memory <i>P. Brémaud and L. Massoulié</i>	213
Poisson's equation for queues driven by a Markovian marked point process <i>S. Asmussen and M. Bladt</i>	235
On the distribution of the number of packets in the fluid flow approximation of packet arrival streams <i>A. Brandt and M. Brandt</i>	275
Single-server queues with spatially distributed arrivals <i>D.P. Kroese and V. Schmidt</i>	317
