# QUEUEING SYSTEMS

VOLUME 17 (1994) Nos. 3,4

Published October 1994

## Contents

### Invited paper

- Approximations for multi-server queues: system interpolations  
*T. Kimura* 347

### Articles

- A unified algorithm for computing the stationary queue length distributions in  $M(k)/G/1/N$  and  $GI/M(k)/1/N$  queues  
*P. Yang* 383
- Tandem queue with group arrivals and no intermediate buffer  
*Y. Zhu* 403
- Exponential bounds for queues with Markovian arrivals  
*N. G. Duffield* 413
- A retrial queue with redundancy and unreliable server  
*A. Aissani* 431
- On performance comparison of  $MR/GI/1$  queues  
*R. Szekli, R. L. Disney and S. Hur* 451
- Kitting process in a stochastic assembly system  
*P. Som, W. E. Wilhelm and R. L. Disney* 471

### Corrigendum

- Corrections to "Optimal order of servers in a tandem queue with general blocking"  
*D. W. Cheng and Y. Zhu* 491
- Author Index 493
