# PHYSICS LETTERS A

Abstracted/Indexed in: ADS/Chemical Abstracts/Current Contents: Physical, Chemical and Earth Sciences/  
INSPEC

Volume 329, issue 6

6 September 2004

## Contents

### Quantum physics

#### Towards an understanding of decoherence in ion traps

M.O. Terra Cunha and M.C. Nemes 409

#### A note on entanglement of formation and generalized concurrence

S.-M. Fei, Z.-X. Wang and H. Zhao 414

#### Exact solutions of continuous states for Hartmann potential

C.-Y. Chen, F.-L. Lu and D.-S. Sun 420

#### Bell gems: the Bell basis generalized

G. Jaeger 425

#### Frequency shifts in the spectral distribution of the reflectivity from a resonant medium with spatially modulated density

R. Friedberg and J.T. Manassah 430

#### Analytical results for entanglement in the five-qubit anisotropic Heisenberg model

X. Wang 439

### Nonlinear science

#### Mechanism of finite-amplitude double-component convection due to different boundary conditions

N. Tsitverblit 445

#### Comparative study of quantum anharmonic potentials

P. Amore, A. Aranda, A. De Pace and J.A. López 451

#### Two Markovian models leading to the Pascalian (1D ultrarelativistic) stationary distribution

R. Zygadlo 459

### Plasma and fluid physics

#### Kinetic relativistic solitons in electron-positron-ion plasmas

J.B. Kim, S.V. Bulanov, H. Suk and I.S. Ko 464

#### Fluctuation-dissipation theorems for nonlinear Fokker-Planck equations of the Desai-Zwanzig type and Vlasov-Fokker-Planck equations

T.D. Frank 475

#### Author index to volume 329

486
