REVIEWS

- Michael Jerry Antal, Jr.,* and Gabor Varhegyi 703 Cellulose Pyrolysis Kinetics: The Current State of Knowledge

KINETICS, CATALYSIS, AND REACTION ENGINEERING

- Abdul M. Kazi, James G. Goodwin, Jr.,* George Marcelin, and Rachid Oukaci 718 Synthesis of MTBE during CO Hydrogenation: Reaction Sites Required
- Jawad K. Ali* and David W. T. Rippin 722 Comparing Mono- and Bimetallic Noble-Metal Catalysts in a Catalytic Membrane Reactor for Methylcyclohexane Dehydrogenation
- Tiejun Zhang and Ravindra Datta* 730 Integral Analysis of Methyl *tert*-Butyl Ether Synthesis Kinetics
- Muthanna H. Al-Dahhan, Yuanxin Wu, and Milorad P. Duduković* 741 Reproducible Technique for Packing Laboratory-Scale Trickle-Bed Reactors with a Mixture of Catalyst and Fines
- Xiaoliang Ma, Kinya Sakanishi, Takaaki Isoda, and Isao Mochida* 748 Hydrodesulfurization Reactivities of Narrow-Cut Fractions in a Gas Oil
- Per Zeuthen,* Barry H. Cooper, Fred T. Clark, and David Arters 755 Characterization and Deactivation Studies of Spent Resid Catalyst from Ebullating Bed Service
- Jan W. Veldsink,* Geert F. Versteeg, and Wim P. M. van Swaaij 763 A Catalytically Active Membrane Reactor for Fast, Highly Exothermic, Heterogeneous Gas Reactions. A Pilot Plant Study
- Marie-Françoise S. G. Reyniers and Gilbert F. Froment* 773 Influence of Metal Surface and Sulfur Addition on Coke Deposition in the Thermal Cracking of Hydrocarbons
- Rafael Bilbao,* Jesús Arauzo, and Maria L. Salvador 786 Kinetics and Modeling of Gas Formation in the Thermal Decomposition of Powdery Cellulose and Pine Sawdust
- Fernando Escobedo and Hendrik J. Viljoen* 794 Reaction Fronts in a Porous Medium. Approximation Techniques versus Numerical Solution
- José A. Caballero,* Rafael Font, Antonio Marcilla, and Juan A. Conesa 806 New Kinetic Model for Thermal Decomposition of Heterogeneous Materials

MATERIALS AND INTERFACES

- Chau Jen Lee,* Shih Sheng Wang, Gwo Chin Lin, Wei Hu, and Lien Tai Chen 813 Pilot Production of Polysulfone Hollow Fiber for Ultrafiltration Using Orthogonal Array Experimentation

PROCESS DESIGN AND CONTROL

- Tore K. Gustafsson,* Bengt O. Skrifvars, Katarina V. Sandström, and Kurt V. Waller 820 Modeling of pH for Control

I-Cheng Chang,
Cheng-Ching Yu,* and
Ching-Tien Liou*

828 Model-Based Approach for Fault Diagnosis. 2. Extension to Interval Systems

SEPARATIONS

- Hubert Reisinger and C. Judson King* 845 Extraction and Sorption of Acetic Acid at pH above pK_a To Form Calcium Magnesium Acetate
- José Espinosa,* Pio A. Aguirre, and Gustavo A. Pérez 853 Product Composition Regions of Single-Feed Reactive Distillation Columns: Mixtures Containing Inerts
- Mary E. Rezac, William J. Koros,* and Stephen J. Miller 862 Membrane-Assisted Dehydrogenation of Normal Butane
- Chinnaiya Namasivayam* and Kuppusamy Ranganathan 869 Removal of Lead(II) by Adsorption onto "Waste" Iron(III)/Chromium(III) Hydroxide from Aqueous Solution and Radiator Manufacturing Industry Wastewater
- Guo-Wen Xu,* Cheng-Fang Zhang, Shu-Jun Qin, and Bin-Chen Zhu 874 Desorption of CO_2 from MDEA and Activated MDEA Solutions

GENERAL RESEARCH

- Sıdıka Kocakuşak,* Jülide H. Köroğlu, Ekrem Ekinçi, and Raşit Tolun 881 Production of Anhydrous Borax Using Microwave Heating
- S. G. Sauer, B. R. Locke,* and P. Arce* 886 Effects of Axial and Orthogonal Applied Electric Fields on Solute Transport in Poiseuille Flows. An Area Averaging Approach
- Toshihiro Ishimori* and Mamoru Senna 895 Effects of Titania Sol on the Mechanical Delamination of Talc
- Chiuping Li,* Yu-Wen Chen,* and Ming-Chang Tsai 898 Highly Restrictive Diffusion under Hydrotreating Reactions of Heavy Residue Oils
- C. H. Lee and Gerald D. Holder* 906 Use of Supercritical Fluid Chromatography for Obtaining Mass Transfer Coefficients in Fluid-Solid Systems at Supercritical Conditions
- An Li, Sirirat Pinsuwan, and Samuel H. Yalkowsky* 915 Estimation of Solubility of Organic Compounds in 1-Octanol
- Yaşar Demirel* and Halime Ö. Paksoy 921 Excess Heat Capacity Surfaces for Water-Alkanol Mixtures by the UNIQUAC Model
- Fu Wenge, Yusuf Chisti,* and Murray Moo-Young 928 A New Method for the Measurement of Solids Holdup in Gas-Liquid-Solid Three-Phase Systems
- Liao Yang and Godwin A. Chukwu* 936 Couette Flow of Non-Newtonian Power-Law Fluids in Narrow Eccentric Annuli
- Arthur D. Broadbent,* Normand Thérien, and Yifang Zhao 943 Effects of Process Variables on the Fixation of Reactive Dyes to Cotton Using Infrared Radiation
- Dimitrios A. Apostolou, Nikolaos S. Kalospiros, and Dimitrios P. Tassios* 948 Prediction of Gas Solubilities Using the LCVM Equation of State/Excess Gibbs Free Energy Model
- Robert A. Heidemann* and Michael L. Michelsen 958 Instability of Successive Substitution
- Seiichiro Imamura,* Takao Higashihara, and Kazunori Utani 967 Effect of Water on the Durability of BPO_4 in the Decomposition of Freon 12
- Shuji Ichikawa, Yuji Ohgomori,* Naoko Sumitani, Hideto Hayashi, and Makoto Imanari* 971 Process for Manufacturing 1,4-Butanediol from Acrolein
- Garry C. Gunter, Robert H. Langford, James E. Jackson, and Dennis J. Miller* 974 Catalysts and Supports for Conversion of Lactic Acid to Acrylic Acid and 2,3-Pentanedione

RESEARCH NOTES

- Bassam S. Nader,*** 981 Synthesis and Preliminary Evaluation of Aryl Arenesulfonate Esters as Potential Intermediate Temperature Fluids
Chester E. Pawloski,
Cynthia L. Powell,
Colleen F. O'Brien, and
Mark P. Arrington
- Steinar Hauan, Terje Hertzberg, and** 987 Why Methyl *tert*-Butyl Ether Production by Reactive Distillation May Yield Multiple Solutions
Kristian M. Lien*
- Allan Hong, Ravindra K. Mariwala,** 992 Adsorbate Shape Selectivity: Separation of the HF/134a Azeotrope over Carbogenic Molecular Sieve
Michael S. Kane, and Henry C. Foley*

CORRELATIONS

- Ioannis N. Tsibanogiannis,** 997 Prediction of Normal Boiling Point Temperature of Medium/High Molecular Weight Compounds
Nikolaos S. Kalospiros, and
Dimitrios P. Tassios*

■ Supplementary material for this paper is available separately (consult the masthead page for ordering information); all supplementary material except structure factor tables will also appear following the paper in the microfilm edition of this journal.

* In papers with more than one author, the asterisk indicates the name of the author to whom inquiries about the paper should be addressed.

AUTHOR INDEX

- Aguirre, P. A., 853
 Al-Dahhan, M. H., 741
 Ali, J. K., 722
 Antal, M. J., Jr., 703
 Apostolou, D. A., 948
 Arauzo, J., 786
 Arce, P., 886
 Arrington, M. P., 981
 Arters, D., 755
 Bilbao, R., 786
 Broadbent, A. D., 943
 Caballero, J. A., 806
 Chang, I.-C., 828
 Chen, L. T., 813
 Chen, Y.-W., 898
 Chisti, Y., 928
 Chukwu, G. A., 936
 Clark, F. T., 755
 Conesa, J. A., 806
