REVIEWS

- Juergen Koehler,* 1003** A Review on Minimum Energy Calculations for Ideal and Nonideal Distillations
Peter Poellmann, and Eckhart Blass

KINETICS, CATALYSIS, AND REACTION ENGINEERING

- Can Erkey, Jianhua Wang, 1021** Isobutylene Production from Synthesis Gas over Zirconia in a Slurry Reactor
Walter Postula, Zhentao Feng, C. V. Philip, Aydin Akgerman, and Rayford G. Anthony*
- Pier Luigi Beltrame,* Paolo Carniti,* 1027** Acid-Catalyzed Dehydration of Ethylmethylphenylcarbinol in Phenol-Ethyl Methyl Ketone Mixture
Aldo Gamba, Paolo Calaresu, Oscar Cappellazzo, and Giuseppe Messina
- J. R. González-Velasco,* 1031** Activity and Selectivity of Palladium Catalysts during the Liquid-Phase Hydrogenation of Phenol. Influence of Temperature and Pressure
M. P. González-Marcos, S. Arnaiz, J. I. Gutiérrez-Ortiz, and M. A. Gutiérrez-Ortiz
- Narendra Dave and Gary A. Foulds* 1037** Comparative Assessment of Catalytic Partial Oxidation and Steam Reforming for the Production of Methanol from Natural Gas
- Rune Lødeng,* Odd A. Lindvåg, 1044** Experimental and Modeling Study of the Selective Homogeneous Gas Phase Oxidation of Methane to Methanol
Pål Søraker, Per T. Roterud, and Olav T. Onsager
- Saeed M. S. Al-Zahrani and 1060** Effects of Steam and Liquid Water Treatment on the Oxidative Coupling of Methane over a Li/MgO Catalyst
Lance L. Lobban*
- Aihua Zhang, Ikusei Nakamura, 1074** Isomerization of *n*-Pentane and Other Light Hydrocarbons on Hybrid Catalyst. Effect of Hydrogen Spillover
Kohjiroh Aimoto, and Kaoru Fujimoto*
- Ivan Milosavljevic and 1081** Cellulose Thermal Decomposition Kinetics: Global Mass Loss Kinetics
Eric M. Suuberg*
- Prakob Kitchaiya and 1092** Ethers from Ethanol. 2. Reaction Equilibria of Simultaneous *tert*-Amyl Ethyl Ether Synthesis and Isomylene Isomerization
Ravindra Datta*
- Eiji Sasaoka,* Kazuo Taniguchi, 1102** Catalytic Activity of ZnS Formed from Desulfurization Sorbent ZnO for Conversion of COS to H₂S
Shigeru Hirano, Md. Azhar Uddin, Shigeaki Kasaoka, and Yusaku Sakata
- Cuong Pham-Huu, 1107** Reactions of *n*-Heptane and Methylcyclopentane over an Oxygen-Modified Molybdenum Carbide Catalyst. Study of Coke Formation, Catalyst Deactivation, and Regeneration
Andrew P. E. York, Mohamed Benaissa, Pascal Del Gallo, and Marc J. Ledoux*
- Mostafa Maalimi, Arvind Varma,* and 1114** The Sharp Interface Model: Zero-Order Reaction with Volume Change
William C. Strieder*
- Shien-Jen Yang, Yu-Wen Chen,* and 1126** Effect of Matrix on the Metal Poisoning of REY Catalysts
Chiuping Li*

- Grete Bach, Gerhard Zimmermann,* 1132 Transfer-Line Heat Exchanger Fouling during Pyrolysis of Hydrocarbons
Frank-Dieter Kopinke,
Simon Barendregt,
Paul van den Oosterkamp, and
Harry Woerde
1 Deposits from Dry Cracked Gases
- Ting-Chia Huang* and 1140 Kinetic Study of Naphthalene Hydrogenation over Pt/Al₂O₃ Catalyst
Ben-Chang Kang
- Yves Chauvin,* Sandra Einloft, and 1149 Catalytic Dimerization of Propene by Nickel-Phosphine Complexes in
Hélène Olivier
1-Butyl-3-methylimidazolium Chloride/AlEt₂Cl_{3-x} (x = 0, 1) Ionic Liquids
- Wim J. J. Welters, 1156 Hydrocracking of *n*-Decane over Zeolite-Supported Metal Sulfide
Onno H. van der Waerden,
Henny W. Zandbergen,
Vincent H. J. de Beer,* and
Rutger A. van Santen
Catalysts. 1. CaY-Supported Transition Metal Sulfides
- Wim J. J. Welters, 1166 Hydrocracking of *n*-Decane over Zeolite-Supported Metal Sulfide
Onno H. van der Waerden,
Vincent H. J. de Beer,* and
Rutger A. van Santen
Catalysts. 2. Zeolite Y-Supported Ni and Ni-Mo Sulfides
- Liisa K. Rihko and A. Outi I. Krause* 1172 Kinetics of Heterogeneously Catalyzed *tert*-Amyl Methyl Ether Reactions
in the Liquid Phase
- Young-Soo Lee, Hee-Taik Kim, and 1181 Effect of Ferric Oxide on the High-Temperature Removal of Hydrogen
Kyong-Ok Yoo*
Sulfide over ZnO-Fe₂O₃ Mixed Metal Oxide Sorbent

MATERIALS AND INTERFACES

- R. Gopalan and Y. S. Lin* 1189 Evolution of Pore and Phase Structure of Sol-Gel Derived Lanthana
Doped Titania at High Temperatures
- Linda M. Parker,* 1196 The Use of Hydrotalcite as an Anion Absorbent
Neil B. Milestone, and
Roger H. Newman
- Anders Södergård,* Maria Niemi, 1203 Changes in Peroxide Melt-Modified Poly(L-lactide)
Johan-Fredrik Selin, and
Jan H. Näsman
- Dmitry Yu. Murzin 1208 Modeling of Adsorption and Kinetics in Catalysis over Induced
Nonuniform Surfaces: Surface Electronic Gas Model

PROCESS DESIGN AND CONTROL

- Guillermo E. Elicabe, Eser Ozdeger, 1219 On-Line Estimation of Reaction Rates in Semicontinuous Reactors
Christos Georgakis,* and
Cajetan Cordeiro
- Arnon Arbel, Zupeng Huang, 1228 Dynamic and Control of Fluidized Catalytic Crackers. 1. Modeling of the
Irvén H. Rinard, Reuel Shinnar,* and
Ajit V. Sapre
Current Generation of FCC's
- Jonas B. Waller and Kurt V. Waller* 1244 Defining Directionality: Use of Directionality Measures with Respect to
Scaling
- Purt Tanartkit and 1253 Stable Decomposition for Dynamic Optimization
Lorenz T. Biegler*

SEPARATIONS

- Masaaki Teramoto 1267 Approximate Solution of Facilitation Factors for the Transport of CO₂
through a Liquid Membrane of Amine Solution
- Ahmad Shariat and John G. Kunesh* 1273 Packing Efficiency Testing on a Commercial Scale with Good (and Not So
Good) Reflux Distribution
- Jongsic Hwang,* Sang J. Park, 1280 Phase Behavior of CO₂/Crude Oil Mixtures in Supercritical Fluid
Milind D. Deo, and Francis V. Hanson
Extraction System: Experimental Data and Modeling
- Zbigniew T. Fidkowski and 1287 Utilization of Waste Heat Stream in Distillation
Rakesh Agrawal*

- Ruey-Shin Juang* and Hwai-Luh Chang 1294 Distribution Equilibrium of Citric Acid between Aqueous Solutions and Tri-*n*-octylamine-Impregnated Macroporous Resins
- Maw-Ling Wang,* Ying-I Lin, and Bing-Lang Liu 1302 Extraction Equilibrium of Pyrocatechol by Sulfuric Acid Salts of Trioctylamine
- Arend J. M. Herwijn, Eric J. La Heij, Juul J. IJzermans, W. Jan Coumans, and Piet J. A. M. Kerkhof* 1310 Determination of Specific Cake Resistance with a New Capillary Suction Time Apparatus

GENERAL RESEARCH

- Andrzej Wyczesany 1320 ■ Chemical Equilibria in the Process of Etherification of Light FCC Gasoline with Methanol
- Tongfan Sun, Danith Ly, and Amyr S. Teja* 1327 Densities of Acetic Acid + Water Mixtures at High Temperatures and Concentrations
- Stuart W. Churchill* and Christina Chan 1332 Theoretically Based Correlating Equations for the Local Characteristics of Fully Turbulent Flow in Round Tubes and between Parallel Plates
- Clifford Y. Tai* and Pao-Chi Chen 1342 Crystal Growth and Agglomeration of Calcium Sulfite Hemihydrate Crystals
- Leonid P. Guilyazetdinov 1352 Structural Group Composition and Thermodynamic Properties of Petroleum and Coal Tar Fractions
- Ben T. Ottenbours, Peter J. Adriaensens, Bert J. Reekmans, Robert A. Carleer, Dirk J. Vanderzande, and Jan M. Gelan* 1364 Development and Optimization of Fast Quantitative Carbon-13 NMR Characterization Methods of Novelac Resins
- Graham F. Andrews and Shu-Lun S. Wong* 1371 Boundary Layer Solution for a Bubble Rising through a Liquid Containing Surface-Active Contaminants
- Baoquan Zhang and Shaofen Li* 1383 Determination of the Surface Fractal Dimension for Porous Media by Mercury Porosimetry
- Kazimiera J. L. Paciorek,* Wen-Huey Lin, and James H. Nakahara 1387 Polysilahydrocarbon Synthetic Fluids. 3. Synthesis of Six-Carbon-Bridged Trisilahydrocarbons
- Kazimiera J. L. Paciorek* and Steven R. Masuda 1390 Polysilahydrocarbon Synthetic Fluids. 4. Quantitative Structure-Activity Relationships
- Costas Tsouris,* David W. DePaoli, James Q. Feng, and Timothy C. Scott 1394 Experimental Investigation of Electrostatic Dispersion of Nonconductive Fluids into Conductive Fluids
- Hiroaki Tsuchiai, Tomohiro Ishizuka, Tsutomu Ueno, Hideshi Hattori,* and Hideaki Kita 1404 Highly Active Absorbent for SO₂ Removal Prepared from Coal Fly Ash
- Christine Bryce and Dimitrios Berk* 1412 Kinetics of the Dissolution of Copper in Iron(III) Chloride Solutions
- Lennart Gustavsson and Bo Leckner* 1419 Abatement of N₂O Emissions from Circulating Fluidized Bed Combustion through Afterburning
- Nancy J. Sell,* Jack C. Norman, and John A. Ciriacks 1428 Flue Gas Desulfurization Scheme To Recover Elemental Sulfur
- Shyh-Jye Hwang* and Wen-Jang Lu 1434 Ion Exchange in a Semifluidized Bed
- Prakash Kumar, Raksh V. Jasra, and Thirumaleshwara S. G. Bhat* 1440 Evolution of Porosity and Surface Acidity in Montmorillonite Clay on Acid Activation
- Volker Bieling, Friedhelm Kurz, Bernd Rumpf, and Gerd Maurer* ■ 1449 Simultaneous Solubility of Ammonia and Carbon Dioxide in Aqueous Solutions of Sodium Sulfate in the Temperature Range 313–393 K and Pressures up to 3 MPa
- Yutaka Tada,* Setsuro Hiraoka, Takashi Achiwa, and Seung-Tae Koh 1461 Mixing Properties of Molten Alkali Nitrates Based on the Law of Corresponding States
- Guido Saracco* and Laura Montanaro 1471 Catalytic Ceramic Filters for Flue Gas Cleaning. 1. Preparation and Characterization
- Guido Saracco* and Vito Specchia 1480 Catalytic Ceramic Filters for Flue Gas Cleaning. 2. Catalytic Performance and Modeling Thereof
