MATHEMATICS AND COMPUTERS IN SIMULATION
VOLUME 43, NUMBER 2, FEBRUARY 1997

Abstracted/Indexed in: ACM Computing Reviews, CAD/CAM Abstracts, Cambridge Scientific Abstracts, Compuscience, Computer Abstracts, Engineering Index/Compendex, INSPEC Information Services, Mathematical Reviews, Statistical Theory and Method Abstracts, Zentralblatt für Mathematik

CONTENTS

<i>Ph. Bogaerts, J. Castillo and R. Hanus</i> Analytical solution of the nonuniform heat exchange in a reactor cooling coil with constant fluid flow	101
<i>H. Shibata, T. Ushio, S. Kumagai and S. Kodama</i> Petri net based qualitative simulation with quantitative information	115
<i>Q. He</i> Semi-discrete method for generalized Schrödinger-type equations	123
<i>A. Tchamova</i> Evidence reasoning theory with application to the identity estimation and data association systems	139
<i>N. Kutznetsov and P. Kloeden</i> The problem of information stability in computer studies of continuous systems	143
<i>D.G. Devenish and B.J. Stone</i> Sub-structuring non-linear dynamic systems in the time domain	159
<i>L.G. Birta and L. Yang</i> Some P(EC) ^m E methods for the parallel solution of ODEs	171
<i>J.L. Lamotte and F. Delay</i> On the stability of the 2D interpolation algorithms with uncertain data	183
<i>Chr. Kabakchiev, B. Vassileva and I. Miteva</i> Adaptive Doppler processing technique	203
<i>S.H. Jacobson</i> The effect of initial transient on the steady-state simulation harmonic analysis gradient estimators	209
<i>G. Albeanu</i> A Monte Carlo approach for controlled search	223
News of IMACS	229
