

BIBLIOTHEQUE DU PARI

operations research letters

a journal of the Operations Research Society of America devoted to the rapid publication of concise contributions in Operations Research

Editor
George L. NEMHAUSER

OPERATIONS RESEARCH LETTERS

Volume 15, Number 2; March 1994

CONTENTS

Some properties of the fleet assignment problem <i>Z. Gu, E.L. Johnson, G.L. Nemhauser and Y. Wang</i>	59
An algorithm for solving general D.C. programming problems <i>T.Q. Phong</i>	73
A notion "A perfect forward procedure for a single facility dynamic location/ relocation problem" <i>G. Andreatta and F.M. Mason</i>	81
Understanding the lead-time effects in stochastic inventory systems with discounted costs <i>J.S. Song</i>	85
Approximate analysis of discrete-time tandem queueing networks with bursty and correlated input traffic and customer loss <i>D. Park, H.G. Perros and H. Yamashita</i>	95
New descent rules for solving the linear semi-infinite programming problem <i>T. León and E. Verchur</i>	105
