## RAPID COMMUNICATIONS

- L23 **Negative magnetic moment induced by a magnetic field in the region of the magnetic phase transition in SmMnSi compound**  
S A Nikitin, I A Tskhadadze, M V Makarova and A V Morozkin
- L26 **A novel thermoelectric converter employing Fermi gas/liquid interfaces**  
Gao Min and D M Rowe
- L29 **Two modes of plasma-assisted electron emission from ferroelectric ceramics**  
D Shur and G Rosenman

## REVIEW ARTICLE

- R19 **Thermal boundary resistance of mechanical contacts between solids at sub-ambient temperatures**  
E Gmelin, M Asen-Palmer, M Reuther and R Villar

## PAPERS

### APPLIED INTERFACES AND SURFACES

- 629 **A Raman scattering study of GaAs : As films lifted off GaAs substrate**  
De-Sheng Jiang, Xue-Ping Li, Bao-Quan Sun and He-Xiang Han
- 632 **Ultra-low friction for a layered carbide-derived ceramic,  $Ti_3SiC_2$ , investigated by lateral force microscopy (LFM)**  
A Crossley, E H Kisi, J W B Summers and S Myhra

### APPLIED MAGNETISM AND MAGNETIC MATERIALS

- 639 **Consequences of a generalized Ohm's law for magnetic transport in conducting media**  
S Cuevas, J A del Río and M López de Haro

### FUNDAMENTAL AREAS OF PHENOMENOLOGY (INCLUDING APPLICATIONS)

- 644 **Optimizing the final deformation of a circular plate illuminated by a short laser pulse**  
M Dovč, J Možina and F Kosel
- 650 **Effects of annealing electric field assisted  $K^+-Na^+$  ion exchanged soda-lime glass guides**  
R Oven, S Batchelor and D G Ashworth
- 656 **Suction and injection effects on a similar flow between parallel plates**  
E A Hamza

### PHYSICS OF GASES, PLASMAS AND ELECTRIC DISCHARGES

- 664 **On the power cycles working with ideal quantum gases: I. The Ericsson cycle**  
A Şişman and H Saygin
- 671 **On energetic electrons in a multipolar magnetically confined Ar plasma**  
E Stamate, K Inagaki, K Ohe and G Popa
- 675 **Modelling of the plasma-particle interactions in a plasma jet**  
J M Bauchire, J J Gonzalez and P Proulx
