# GLOBAL CHANGE AND RELEVANT SPACE OBSERVATIONS

---

Edited by J. L. Fellous

Pergamon Press

## CONTENTS

Introduction	1
<i>Section 1. Middle Atmosphere Change</i>	
Preliminary Assessment of Possible Aerosol Contamination Effects on SAGE Ozone Trends in the Lower Stratosphere <i>D. M. Cunnold and R. E. Veiga</i>	5
Middle Atmosphere Change through Solar Forcing <i>G. M. Keating and C. Chen</i>	9
Some Complications in Determining Trends in the Stratosphere <i>K. Labitzke and H. van Loon</i>	21
Changes in Characteristics of Planetary Waves at 80–100 km over Central and Southern Europe since 1980 <i>J. Laštovička and D. Pancheva</i>	31
<i>Section 2. Detection of an Enhanced Greenhouse Effect</i>	
Detection of the Greenhouse Gas Signal from Space: A Progress Report <i>T. P. Barnett, R. Haskins and M. Chahine</i>	37
Thirty-year Trend of Observed Greenhouse Clouds over the Tropical Oceans <i>J. London, S. G. Warren and C. J. Hahn</i>	45
Global Distribution of Cloud Cover Derived from NOAA/AVHRR Operational Satellite Data <i>L. L. Stowe, E. P. McClain, R. Carey, P. Pellegrino, G. G. Gutman, P. Davis, C. Long and S. Hart</i>	51
Possible Causes of Enhanced Greenhouse Effect as due to Natural and Anthropogenic Phenomena <i>V. Bucha</i>	55
Radiation Balance of the Surface and Atmosphere for Hungary as Derived from NIMBUS-7 ERB Measurements and Model Calculations <i>A. Rimóczi-Paál, E. Kovács and J. Mika</i>	61
<i>Section 3. Large-Scale Biological/Physical Processes in the Ocean and at the Ocean/Atmosphere Interface</i>	
Advances in Modeling Ocean Primary Production and its Role in the Global Carbon Cycle <i>W. K. Nuttle, J. S. Wroblewski and J. L. Sarmiento</i>	67
CO <sub>2</sub> Exchange at the Air–Sea Interface: Time and Space Variability <i>L. Merlivat, J. Etcheto and J. Boutin</i>	77
Precision of Regional Mean Sea Level and Continental Ice Sheet Topography as Determined by Satellite Altimetry <i>J. Benveniste, F. Blanc, C. Boissier, C. Brossier, S. Houry, F. Jourdin, P. Mazzega, J. F. Minster, F. Rémy and P. Vincent</i>	87

*Section 4. Global to Regional Energy and Water Balance Parameters*

- Water Balance and General Circulation Parameters Deduced from Operational Satellites: The Example of Tropical Africa 95  
*M. Desbois*

- Parameterization for Regional Energy Balance Climate Modelling over Hungary 101  
*J. Mika, E. Kovács, P. Németh and A. Rimóczi-Paál*

- Determination of the Global Radiation and the Photosynthetically Active Radiation Using METEOSAT and NOAA Satellite Pictures 105  
*L. A. Baranski and H. Chrzanowska*

- Climatological Analysis of Rainfall for the Wet Pampa and Northwest of Buenos Aires Province 109  
*C. M. Krepper, B. V. Scian and J. L. Aiello*

*Section 5. Physical/Biological Processes at the Soil/Atmosphere Interface*

- Modeling Forest Physics and Ecology to Assess the Impacts of Climate Variability 115  
*P. Martin*

- The Sahelian Energy Balance Experiment (SEBEX): Ground Based Measurements and their Potential for Spatial Extrapolation Using Satellite Data 131  
*J. S. Wallace, I. R. Wright, J. B. Stewart and C. J. Holwill*

- An Overview of the Results of the FIFE-87 and FIFE-89 Campaigns 143  
*R. E. Murphy, P. J. Sellers, F. G. Hall, G. Asrar, B. L. Blad, E. T. Kanemasu, R. D. Kelley, B. Markham, D. Strebel and J. R. Wang*

- Estimating the Daily Upward Longwave Radiation from NOAA-AVHRR Data for Mapping Net Radiation 151  
*J. P. Lagouarde, Y. Brunet, Y. Kerr and J. Imbernon*

- Use of Thermal Infrared Remote Sensing for Water Budget Studies 163  
*C. Ottlé, Y. Sucksdorff and M. Ben Mehrez*

- Etude et Extraction des Propriétés de Surface par Télédétection Spatiale dans les Courtes Longueurs d'Onde 169  
*B. Pinty and M. M. Verstraete*

- Potential and Limitations in Using the Global Vegetation Index Data Set for Monitoring the Interannual Variability of the Earth's Biosphere 173  
*G. G. Gutman*

- Behaviour of Inter Crop-Growth Stages Scatterograms for NOAA/AVHRR Vegetation Indices 177  
*R. K. Gupta*

*Section 6. Space Systems' Capabilities*

- Hydrometeorological, Oceanographic and Earth-Resources Satellite Systems Operated by the U.S.S.R. 183  
*A. Karpov*

- The Plans of the European Space Agency for Earth Observation 191  
*C. J. Readings*

French Space Programmes Related to Global Change <i>J. L. Fellous and A. Ratier</i>	213
Operational Satellite Products for Global Change: Current Research and Development Activities <i>G. Ohring</i>	227
Execution Phase (C/D) Spectral Band Characteristics of the EOS Moderate Resolution Imaging Spectrometer-Nadir (MODIS-N) Facility Instrument <i>V. V. Salomonson and D. L. Toll</i>	231
Monitoring of Ozone Trend by Stellar Occultations: The GOMOS Instrument <i>J. L. Bertaux, G. Mégie, T. Widemann, E. Chassefière, R. Pellinen, E. Kyrola, S. Korpela and P. Simon</i>	237
SCIAMACHY Instrument Design <i>A. P. H. Goede, H. J. M. Aarts, C. van Baren, J. P. Burrows, K. V. Change, R. Hoekstra, E. Hölzle, W. Pitz, W. Schneider, C. Smorenburg, H. Visser and J. de Vries</i>	243
