APPLIED SURFACES AND INTERFACES

- 2531 **Material properties of CuGaSe₂ absorber films prepared by rapid thermal annealing of stacked elemental layers**
M Klenk, O Schenker, V Alberts, U Probst and E Bucher
- 2538 **Backscattering of 8–28 keV electrons from a thick tungsten target**
R K Yadav, A Srivastava, S Mondal and R Shanker
- 2543 **Nitrogen-ion-energy dependent optical and structural properties of AlN films obtained using a filtered cathodic vacuum arc**
X H Ji, S P Lau, G Q Yu, W H Zhong, Y G Wang and B K Tay
- 2548 **Infrared optical properties of diamond films and electrical properties of CVD diamond detectors**
L Wang, Y Xia, H Shen, M Zhang, Y Yang and L Wang
- 2553 **Replication of patterns on nanometric polymer films obtained by photopolymerization by evanescent waves**
C Triger, C Ecoffet and D-J Lougnot

INTERDISCIPLINARY PHYSICS AND RELATED AREAS OF SCIENCE AND TECHNOLOGY

- 2559 **Electromagnetic flow control: characteristic numbers and flow regimes of a wall-normal actuator**
J-P Thibault and L Rossi
- 2569 **Microstructural characterization of XLPE electrical insulation in power cables: determination of void size distributions using TEM**
L Markey and G C Stevens
- 2584 **Electrohydrodynamics and dielectrophoresis in microsystems: scaling laws**
A Castellanos, A Ramos, A González, N G Green and H Morgan

COMMENT

- 2598 **Comments on 'The stepped nature of lightning and the upward connecting streamer' by R Morrow and T R Blackburn**
N L Aleksandrov and E M Bazelyan

Journal of Physics D: Applied Physics

Volume 36

Number 20

21 October 2003

RAPID COMMUNICATIONS

- L101 Use of combined dielectrophoretic/electrohydrodynamic forces for biosensor enhancement**
K F Hoettges, M B McDonnell and M P Hughes
- L105 Spin-coated zinc oxide transparent transistors**
B J Norris, J Anderson, J F Wager and D A Keszler

PAPERS

APPLIED MAGNETISM, MAGNETIC MATERIALS AND SUPERCONDUCTIVITY

- 2427 A model for magnetic flux leakage signal predictions**
C Mandache and L Clapham
- 2432 Magnetic properties of melt-spun $\text{Sm}(\text{Co}_{0.9}\text{Fe}_{0.1})_{6.8}\text{Zr}_{0.2}\text{C}_x$ ribbons with TbCu_7 structure**
X-b Du, H-w Zhang, C-b Rong, J Zhang, S-y Zhang, B-g Shen, Y Yan and H-m Jin

PHOTONICS AND SEMICONDUCTOR DEVICE PHYSICS

- 2435 Investigation of capillary waves excited by a Nd : YAG laser using pyrometry**
R T Deam, M Brandt and J Harris
- 2446 Characterization of optical anisotropy in quantum wells under compressive anisotropic in-plane strain**
M L Biermann, M Walters, J Diaz-Barriga and W S Rabinovich
- 2451 Replication qualities and optical properties of UV-moulded microlens arrays**
S-min Kim and S Kang
- 2457 Intersubband transitions for single, double and triple Si δ -doped GaAs layers**
E Ozturk and I Sokmen
- 2465 Observation of C_2 radicals formed by laser ablation of graphite targets using cavity ring-down spectroscopy**
I Labazan, N Krstulović and S Milošević
- 2471 Near field x-ray lithography simulations for printing fine bridges**
A J Bourdillon, C B Boothroyd, G P Williams and Y Vladimirovsky
- 2483 Controlling non-radiative energy transfer in organic binary blends: a route towards colour tunability and white emission from single-active-layer light-emitting devices**
D Pisignano, M Mazzeo, G Gigli, G Barbarella, L Favaretto and R Cingolani

EXPERIMENTAL, COMPUTATIONAL AND THEORETICAL PARTICLE BEAM AND PLASMA SCIENCE

- 2487 Theoretical analysis of electrical transient behaviour in TEA CO_2 laser with dielectric corona pre-ionization**
A Bahrapour and A A Ganjovi
- 2498 Secondary emission effects on streamer branching in transient non-uniform short-gap discharges**
A Hallac, G E Georghiou and A C Metaxas
- 2510 Test of Blanc's law for negative ion mobility in mixtures of SF_6 with N_2 , O_2 and air**
G Hinojosa and J de Urquijo
- 2515 The statistical time-delay and the breakdown formative time contributions to the memory effect in Ne at 7 mbar pressure**
I V Spasić, M K Radović, M M Pejović and Č A Maluckov
- 2521 Observations of the glow-to-arc transition between thoriated tungsten electrodes with a parallel RC circuit**
S Watanabe, S Saito, K Takamizawa and Y Ohzawa
- 2526 Self-discharge synchronizing operations in the external electrode fluorescent multi-lamps backlight**
G Cho, N O Kwon, Y M Kim, S J Kim, T S Cho, B S Kim, J G Kang, E H Choi, O W Lee, S C Yang and H S Uhm
