W. Suleiman and A. Monin	488	New method for identifying finite degree Volterra series
T.-C. Li, Z.-c. Hou and J.-f. Li	498	Stabilization analysis of a generalized nonlinear axially moving string by boundary velocity feedback
J. Engwerda	504	Uniqueness conditions for the affine open-loop linear quadratic differential game
T. Hu, A.R. Teel and L. Zaccarian	512	Anti-windup synthesis for linear control systems with input saturation: Achieving regional, nonlinear performance
Z. Artstein and S.V. Raković	520	Feedback and invariance under uncertainty via set-iterates
K. Hirata and Y. Ohta	526	Exact determinations of the maximal output admissible set for a class of nonlinear systems
H. Gao and T. Chen	534	A new approach to quantized feedback control systems
M. Barenthin and H. Hjalmarsson	543	Identification and control: Joint input design and \mathcal{H}_∞ state feedback with ellipsoidal parametric uncertainty via LMIs
Q. Hu, G. Ma and L. Xie	552	Robust and adaptive variable structure output feedback control of uncertain systems with input nonlinearity
V. Turetsky	560	Capture zones of linear feedback pursuer strategies
TECHNICAL COMMUNIQUE		
C. Hua, G. Feng and X. Guan	567	Robust controller design of a class of nonlinear time delay systems via backstepping method
E. Gershon and U. Shaked	574	H_∞ output-feedback control of discrete-time systems with state-multiplicative noise
A. Czornik and P. Jurgas	580	Set of possible values of maximal Lyapunov exponents of discrete time-varying linear system

CONTENTS

SURVEY PAPER

- L. Pronzato 303 **Optimal experimental design and some related control problems**

REGULAR PAPERS

- C. Cai and A.R. Teel 326 **Input-output-to-state stability for discrete-time systems**
- A. Chaillet and A. Loria 337 **Uniform semiglobal practical asymptotic stability for non-autonomous cascaded systems and applications**
- S. Battilotti 348 **Control over a communication channel with random noise and delays**
- G. Martín-Herrán, O. Rubel and G. Zaccour 361 **Competing for consumer's attention**
- J.C. Agüero and G.C. Goodwin 371 **Identifiability of errors in variables dynamic systems**
- I. Lind and L. Ljung 383 **Regressor and structure selection in NARX models using a structured ANOVA approach**
- S.-i. Azuma and T. Sugie 396 **Optimal dynamic quantizers for discrete-valued input control**
- A.D. Akkaya and M.L. Tiku 407 **Robust estimation in multiple linear regression model with non-Gaussian noise**
- R. Wallin, C.-Y. Kao and A. Hansson 418 **A cutting plane method for solving KYP-SDPs**

BRIEF PAPERS

- E.-W. Bai and K.-S. Chan 430 **Identification of an additive nonlinear system and its applications in generalized Hammerstein models**
- J.M. Bravo, T. Alamo, M.J. Redondo and E.F. Camacho 437 **An algorithm for bounded-error identification of nonlinear systems based on DC functions**
- X. Xia and J. Zhang 445 **Geometric characterization on the solvability of regulator equations**
- T.D. Murphey 451 **On multiple model control for multiple contact systems**
- M. Niedźwiecki 459 **On the lower smoothing bound in identification of time-varying systems**
- L. Hu and X. Mao 465 **Almost sure exponential stabilisation of stochastic systems by state-feedback control**
- F.D. Bianchi, R.J. Mantz and C.F. Christiansen 472 **Multivariable PID control with set-point weighting via BMI optimisation**
- T. Hatanaka and K. Takaba 479 **Computations of probabilistic output admissible set for uncertain constrained systems**
