Contents continued from outside back cover

|  |     |  |
|--|-----|--|
| F. Giri, Y. Rochdi, F.Z. Chaoui and A. Brouri              | 767 | Identification of Hammerstein systems in presence of hysteresis-backlash and hysteresis-relay nonlinearities                                 |
| Z. Li, S.S. Ge, M. Adams and W.S. Wijesoma                 | 776 | Robust adaptive control of uncertain force/motion constrained nonholonomic mobile manipulators   |
| L. Freidovich, A. Robertsson, A. Shiriaev and R. Johansson | 785 | Periodic motions of the Pendubot via virtual holonomic constraints: Theory and experiments   |
| C.E. de Souza, K.A. Barbosa and M. Fu                      | 792 | Robust filtering for uncertain linear discrete-time descriptor systems   |
| M. Abbaszadeh and H.J. Marquez                             | 799 | Robust $H_\infty$ observer design for sampled-data Lipschitz nonlinear systems with exact and Euler approximate models                       |
| F. Abdallah, A. Gning and P. Bonnifait                     | 807 | Box particle filtering for nonlinear state estimation using interval analysis  |
| C. Wang  | 816 | Semiglobal practical stabilization of nonholonomic wheeled mobile robots with saturated inputs   |
| T. Sogo  | 823 | Inversion of sampled-data system approximates the continuous-time counterpart in a noncausal framework                                       |
| <b>TECHNICAL COMMUNIQUEs</b>                               |     |  |
| C.-J. Chien and A. Tayebi                                  | 830 | Further results on adaptive iterative learning control of robot manipulators   |
| X.J. Jing, Z.Q. Lang and S.A. Billings                     | 838 | Magnitude bounds of generalized frequency response functions for nonlinear Volterra systems described by NARX model                          |
| Y. Hong, G. Chen and L. Bushnell                           | 846 | Distributed observers design for leader-following control of multi-agent networks  |
| D.W. Kim, J.B. Park and Y.H. Joo                           | 851 | Theoretical justification of approximate norm minimization method for intelligent digital redesign   |
| Y. Huang, W. Zhang and G. Feng                             | 857 | Infinite horizon $H_2/H_\infty$ control for stochastic systems with Markovian jumps  |
| Y. Zhang, W.H. Chen and Y.C. Soh                           | 864 | Improved robust backstepping adaptive control for nonlinear discrete-time systems without overparameterization                               |
| C. Lin, Q.-G. Wang, T.H. Lee, Y. He and B. Chen            | 868 | Observer-based $H_\infty$ fuzzy control design for T-S fuzzy systems with state delays   |
| S.-J. Park and K.-H. Cho                                   | 875 | Robust supervisory control of timed discrete event systems under partial observation based on eligible time bounds: The existence conditions |
| F. Hamelin and P. Bernhard                                 | 882 | Uncoupling Isaacs equations in two-player nonzero-sum differential games. Parental conflict over care as an example                          |
| G. Zhang, Y. Xia and P. Shi                                | 886 | New bounded real lemma for discrete-time singular systems  |

## CONTENTS

### REGULAR PAPERS

- |  |     |  |
|--|-----|--|
| D. Chu and R.C.E. Tan  | 585 | <b>The extended <math>J</math>-spectral factorization for descriptor systems</b>   |
| A.P. Aguiar, J.P. Hespanha and P.V. Kokotović                                  | 598 | <b>Performance limitations in reference tracking and path following for nonlinear systems</b>                                |
| H.F. Grip, L. Imsland, T.A. Johansen, T.I. Fossen, J.C. Kalkkuhl and A. Suissa | 611 | <b>Nonlinear vehicle side-slip estimation with friction adaptation</b>   |
| H. Hjalmarsson and H. Jansson  | 623 | <b>Closed loop experiment design for linear time invariant dynamical systems via LMIs</b>                                    |
| F. Eng and F. Gustafsson   | 637 | <b>Identification with stochastic sampling time jitter</b>   |
| S. Thil, H. Garnier and M. Gilson  | 647 | <b>Third-order cumulants based methods for continuous-time errors-in-variables model identification</b>                      |
| T. Bakhtiar and S. Hara  | 659 | <b><math>\mathcal{H}_2</math> regulation performance limitations for SIMO linear time-invariant feedback control systems</b> |
| R. Carli, F. Fagnani, A. Speranzon and S. Zampieri                             | 671 | <b>Communication constraints in the average consensus problem</b>  |
| Z.-L. Deng, Y. Gao, C.-B. Li and G. Hao  | 685 | <b>Self-tuning decoupled information fusion Wiener state component filters and their convergence</b>                         |
| Y. Kim, D.-W. Gu and I. Postlethwaite  | 696 | <b>Real-time path planning with limited information for autonomous unmanned air vehicles</b>                                 |
| T. Li and J.-F. Zhang  | 713 | <b>Decentralized tracking-type games for multi-agent systems with coupled ARX models: Asymptotic Nash equilibria</b>         |
| J. Cortés  | 726 | <b>Distributed algorithms for reaching consensus on general functions</b>  |

### BRIEF PAPERS

- |   |     |   |
|---|-----|---|
| W. Lan and B.M. Chen                          | 738 | <b>Explicit construction of <math>H_\infty</math> control law for a class of nonminimum phase nonlinear systems</b> |
| Z. Chen and J. Huang                          | 745 | <b>A Lyapunov's direct method for the global robust stabilization of nonlinear cascaded systems</b>                 |
| G. Herrmann, M.C. Turner and I. Postlethwaite | 753 | <b>A robust override scheme enforcing strict output constraints for a class of strictly proper systems</b>          |
| Q.S. Song                                     | 761 | <b>Convergence of Markov chain approximation on generalized HJB equation and its applications</b>                   |
