F. Domenichini & G. Pedrizzetti	Impulsively started flow separation in wavy-walled tubes	page 1
C. F. Delale & D. G. Crighton	Prandtl–Meyer flows with homogeneous condensation. Part 1. Subcritical flows	23
J. M. Lopez	Characteristics of endwall and sidewall boundary layers in a rotating cylinder with a differentially rotating endwall	49
P. Le Quéré & M. Behnia	From onset of unsteadiness to chaos in a differentially heated square cavity	81
M. A. Hallworth, A. J. Hogg & H. E. Huppert	Effects of external flow on compositional and particle gravity currents	109
R. J. Riley & G. P. Neitzel	Instability of thermocapillary–buoyancy convection in shallow layers. Part 1. Characterization of steady and oscillatory instabilities	143
S. Benz, P. Hintz, R. J. Riley & G. P. Neitzel	Instability of thermocapillary–buoyancy convection in shallow layers. Part 2. Suppression of hydrothermal waves	165
S. J. Majumdar & N. Peake	Noise generation by the interaction between ingested turbulence and a rotating fan	181
A. Avagliano & N. Phan-Thien	Torsional flow: effect of second normal stress difference on elastic instability in a finite domain	217
P. Lin & P. L.-F. Liu	A numerical study of breaking waves in the surf zone	239
G. L. Body & U. T. Ehrenmark	Reflection of gravity waves by a steep beach with a porous bed	265
R. Malvano & F. Vatta	Lubricated plane slider bearing: solution of the inlet problem with upstream free surface	281
S. B. Pope	The vanishing effect of molecular diffusivity on turbulent dispersion: implications for turbulent mixing and the scalar flux	299
Y. D. Shikhmurzaev	On cusped interfaces	313
H. H. Fernholz & D. Warnack	The effects of a favourable pressure gradient and of the Reynolds number on an incompressible axisymmetric turbulent boundary layer. Part 1. The turbulent boundary layer	329
D. Warnack & H. H. Fernholz	The effects of a favourable pressure gradient and of the Reynolds number on an incompressible axisymmetric turbulent boundary layer. Part 2. The boundary layer with relaminarization	357
