International
Journal

Contents

Vol. 16, No. 3, 1988

Editorial

Stanley G. Rubin

H. T. Lai and P. K. Khosla

P. Laure and Y. Demay

**Luis G. Reyna and
Stefan Menne**

V. Eswaran and S. B. Pope

R. J. Bodonyi and P. W. Duck

**S. C. R. Dennis and
P. W. Duck**

P. W. Duck and R. J. Bodonyi

M. J. Miksis and L. Ting

i Softstrip® computer-readable data strip containing the table of contents of this issue of *Computers & Fluids*

iii *Computers & Fluids*: a retrospective

217 Global pressure relaxation procedure for compressible turbulent strong interaction flows

229 Symbolic computation and equation on the center manifold: application to the Couette-Taylor problem

239 Numerical prediction of flow in slender vortices

257 An examination of forcing in direct numerical simulations of turbulence

279 A numerical method for treating strongly interactive three-dimensional viscous-inviscid flows

291 Unsteady flow due to an impulsively started rotating sphere

311 Oscillatory flow over a semi-infinite flat plate at low Reynolds numbers

327 A numerical method for long time solutions of integro-differential systems in multiphase flow

[continued on inside back cover]
