Journal of Fluid Mechanics

VOLUME 598

- 1 Free-Lagrange simulations of the expansion and jetting collapse of air bubbles in water
C. K. Turangan, A. R. Jamaluddin, G. J. Ball & T. G. Leighton
- 27 Large-eddy simulation of a bi-periodic turbulent flow with effusion
S. Mendez & F. Nicoud
- 67 Abrupt transitions between gyroscopic and internal gravity waves: the mid-latitude case
H. van Haren
- 81 Structure formation in homogeneous freely decaying rotating turbulence
P. J. Staplehurst, P. A. Davidson & S. B. Dalziel
- 107 Landslide tsunamis propagating along a plane beach
P. Sammarco & E. Renzi
- 121 Experimental study of higher-order moments in shear-driven boundary layers with rotation
E. Ferrero, R. Genovese, A. Longhetto, M. Manfrin & L. Mortarini
- 141 Investigation of three-dimensional structure of fine scales in a turbulent jet by using cinematographic stereoscopic particle image velocimetry
B. Ganapathisubramani, K. Lakshminarasimhan & N. T. Clemens
- 177 Direct numerical simulations of rotating turbulent channel flow
O. Grundestam, S. Wallin & A. V. Johansson
- 201 Direct numerical simulation of vortex ring evolution from the laminar to the early turbulent regime
P. J. Archer, T. G. Thomas & G. N. Coleman
- 227 The initial-value problem for three-dimensional disturbances in plane Poiseuille flow of helium II
L. B. Bergström
- 245 Recurrent solutions of Alber's equation for random water-wave fields
M. Stiassnie, A. Regev & Y. Agnon
- 267 The analysis of self-diffusion and migration of rough spheres in nonlinear shear flow using a traction-corrected boundary element method
M. S. Ingber, S. Feng, A. L. Graham & H. Brenner
- 293 Spiral swimming of an artificial micro-swimmer
E. E. Keaveny & M. R. Maxey
- 321 Frontal waves in a strait
M. E. Stern & J. A. Simeonov
- 335 Direct numerical simulation of passive scalar transport in transverse jets
S. Muppidi & K. Mahesh
- 361 Experimental investigation of homogeneity, isotropy, and circulation of the velocity field in buoyancy-driven turbulence
Q. Zhou, C. Sun & K.-Q. Xia
- 373 Observations on the wavenumber spectrum and evolution of an internal wave attractor
J. Hazewinkel, P. van Breevoort, S. B. Dalziel & L. R. M. Maas
- 383 Viscous flows in a muddy seabed induced by a solitary wave
Y. S. Park, P. L.-F. Liu & S. J. Clark
- 393 Bifurcation analysis of steady Rayleigh-Bénard convection in a cubical cavity with conducting sidewalls
D. Puigjaner, J. Herrero, C. Simó & F. Giralt
- 429 Evidence of higher-order effects in thermally driven rapid granular flows
C. M. Hrenya, J. E. Galvin & R. D. Wildman
- 451 The elephant mode between two rotating disks
B. Viaud, E. Serre & J.-M. Chomaz
- 465 A Lagrangian investigation of the small-scale features of turbulent entrainment through particle tracking and direct numerical simulation
M. Holzner, A. Liberzon, N. Nikitin, B. Lüthi, W. Kinzelbach & A. Tsinober
- 476 INDEX TO VOLUME 598
