ENGINEERING**

**Editor-in-Chief  
Norman JONES**

**Contents**

**Special Issue**

**Structural Failure Symposium**

6-8 June 1988, MIT, U.S.A.

<b>N. Jones</b>	123	Editorial
<b>J. R. Veillette and J. F. Carney III</b>	125	Collapse of braced tubes under impact loads
<b>P. S. Symonds and C. W. G. Frye</b>	139	On the relation between rigid-plastic and elastic-plastic predictions of response to pulse loading
<b>T. Y. Reddy and R. J. Wall</b>	151	Axial compression of foam-filled thin-walled circular tubes
<b>P. H. Thornton and R. A. Jeryan</b>	167	Crash energy management in composite automotive structures
<b>P. D. C. Yang and J. B. Caldwell</b>	181	Collision energy absorption of ships' bow structures

# INTERNATIONAL JOURNAL OF IMPACT ENGINEERING

*Continued from outside front cover*

- S. Ishiyama, J. Takagi,  
K. Yamamoto and  
T. Nishimura** 197 Impact response of thin-walled frame structures
- P. R. Gefken, S. W. Kirkpatrick  
and B. S. Holmes** 213 Response of impulsively loaded cylindrical shells
- J. Radin and W. Goldsmith** 229 Normal projectile penetration and perforation of layered targets
- W. Johnson** 261 Some conspicuous aspects of the century of rapid changes in battleship armours, *ca* 1845-1945
