Health impacts of indoor air pollution

Much attention is paid to pollution outdoors, but people can spend around 90% of their time inside. Paul Harrison of the University of Leicester assesses whether our homes are out to get us.

682 BIOLOGY & INDUSTRY

Microbial biofilms in industry: wanted dead or alive?

From teeth to fish tanks to industrial pipes, as long as there's some water bacteria will form biofilms. Jana Jass of the Defence Research Establishment in Sweden and Hilary Lappin-Scott of Exeter University explain the pros and cons of these colonies.

687 LAW FILE

Cleaning Europe's air

Daniel Chappell examines the new integrated approach to tackling air pollution across Europe.
