Fatigue & Fracture of Engineering Materials & Structures

Volume 22 Number 5 May 1999

Contents

Original articles

- 369 *B. Atzori, P. Lazzarin and R. Tovo*
From a local stress approach to fracture mechanics: a comprehensive evaluation of the fatigue strength of welded joints
- 383 *Z. Zheng, B. E. Powell, J. Byrne and I. W. Hussey*
The characterization of fatigue crack growth behaviour by constant ΔK control testing
- 393 *Y. Nakatani, T. Higashi and K. Yamada*
Effect of tempering treatment on hydrogen-induced cracking in high-strength steel
- 399 *D. P. Boothman, M. M. K. Lee, A. R. Luxmoore and J. D. Sumpter*
 J estimation for shallow semi-elliptical surface cracks in wide plates under pure bending
- 409 *D. Angelova and R. Akid*
A normalization of corrosion fatigue behaviour: an example using an offshore structural steel in chloride environments
- 421 *A. Melander, J. Linder, H. Stensiö, M. Larsson, A. Gustavsson and G. Björkman*
How defects in an adhesive layer influence the fatigue strength of bonded steel-sheet specimens
- 427 *D. G. Harlow and R. P. Wei*
Probabilities of occurrence and detection of damage in airframe materials
- 437 *W. Guo, C. H. Wang and L. R. F. Rose*
The influence of cross-sectional thickness on fatigue crack growth
- 445 *A. P. Kfoury*
A crack in a linear-elastic material under mode II loading, revisited
- 449 *S. Alexandrov*
A note on the limit load of welded joints of a rectangular cross-section
- 453 *W. N. Liu, H. A. Mang and C. H. Liu*
Numerical evaluation of the stress distribution ahead of a crack tip for a finite-width centre-cracked specimen loaded by stresses along a portion of the crack
- 457 Errata
- I Information on conferences/seminars
