

Volume 23 Number 6 June 2000

ISSN 8756-758X

Fatigue & Fracture of Engineering Materials & Structures

Editor-in-Chief: K. J. Miller

Associate Editors-in-Chief: Y. Hong, Y. Murakami & A. Saxena

Published in co-operation with:
American Society for Testing & Materials ASTM Committee E08 on Fatigue & Fracture
& The European Structural Integrity Society

Fatigue & Fracture of Engineering Materials & Structures

Volume 23 Number 6 June 2000

Contents

Original articles

- 467 *A. Carpinteri, R. Brighenti and A. Spagnoli*
External surface cracks in shells under cyclic internal pressure
- 477 *C. H. Wang*
Fatigue crack closure analysis of bridged cracks representing composite repairs
- 489 *C.-K. Lin and W.-J. Tsai*
Corrosion fatigue behaviour of a 15Cr-6Ni precipitation-hardening stainless steel in different tempers
- 499 *G. Zhang and B. Richter*
A new approach to the numerical fatigue-life prediction of spot-welded structures
- 509 *L. J. Chen, Z. G. Wang, G. Yao and J. F. Tian*
An assessment of three creep-fatigue life prediction methods for nickel-based superalloy GH4049
- 521 *P. Segle, P. Andersson and L. Å. Samuelson*
Numerical investigation of creep crack growth in cross-weld CT specimens. Part I: influence of mismatch in creep deformation properties and notch tip location
- 533 *P. Andersson, P. Segle and L. Å. Samuelson*
Numerical investigation of creep crack growth in cross-weld CT specimens. Part II: influence of specimen size
- 541 Information on conferences/seminars
