

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Analysis of Crossover Between Local and Massive Separation on Airfoils	M. Barnett	513
--	------------	-----

FLUID DYNAMICS

Analysis of the Acoustic Planform Method for Rotor Noise Prediction (SYN)	V. L. Wells	522
Computation of Steady and Unsteady Vortex-Dominated Flows with Shock Waves	O. A. Kandil and H. A. Chuang	524
Sound Generation by Ducted Flames	U. G. Hegde, D. Reuter, B. T. Ziran	532
Solution of the Neumann Pressure Problem in General Orthogonal Coordinates Using the Multigrid Technique	U. Ghia, R. Ramamurti, K. N. Ghia	538
Resonance Tubes in a Subsonic Flowfield	E. Brocher and E. Duport	548
Study of Multibody Aerodynamic Interference at Transonic Mach Numbers	C. J. Cottrell, A. Martinez, G. T. Chapman	553
Mean Value Measurements of a Turbulent Swirling-Jet (TN)	M. Same' and S. Einav	619
Vortex Flow Model for the Blade-Vortex Interaction Problem (TN)	A. T. Hsu and J. C. Wu	621
Recirculation Structure of the Coannular Swirling Jets in a Combustor (TN)	Y. C. Chao	623
Solutions of One-Dimensional Steady Nozzle Flow Revisited (TN)	M.-S. Liou	625

INTERDISCIPLINARY TOPICS

Internal Vaporization in Porous Materials Under Laser Irradiation	D. E. Hastings and A. A. Rigos	561
---	--------------------------------	-----

STRUCTURAL MECHANICS AND MATERIALS

Nonlinear Panel Flutter by Finite-Element Method	B. S. Sarma and T. K. Varadan	566
Vibration of a Bimodulus Thick Plate According to a Higher-Order Shear Deformation Theory	J.-L. Doong and C.-P. Fung	575
Effects of Cutouts on the Dynamic Response of Curved Rectangular Composite Panels	G. J. Cyr, R. L. Hinrichsen, R. A. Walley	582
Boundary Integral Equations for Recovery of Design Sensitivities in Shape Optimization	M. R. Barone and R. J. Yang	589
Variational Method for Design Sensitivity Analysis in Nonlinear Structural Mechanics	J. B. Cardoso and J. S. Arora	595
Optimal Structural Design with Control Gain Norm Constraint	N. S. Khot, H. Öz, R. V. Grandhi, F. E. Eastep, V. B. Venkayya	604

Table of Contents continued on back cover

CONTENTS—continued

Two New Approximate Methods for Analyzing Free Vibration of Structural Components	C. W. Bert, S. K. Jang, A. G. Striz	612
A Basis for the Analysis of Solid Continua Using the Integrated Force Method (TN)	K. Vijayakumar, A. V. Krishna Murty, S. N. Patnaik	628
On a General Method of Vibration Analysis in Curvilinear Coordinates (TN)	S. K. Sinha	629
BOOK REVIEW		
Review of <i>Experimental Characterization of Advanced Composite Materials</i>	C. Bert	632
NOTICE TO SUBSCRIBERS		
ERRATUM		
Finite Difference Analysis of Rotationally Symmetric Shells Under Discontinuous Distributed Loadings	T. A. Smith	633
SELECTED ABSTRACTS FROM SOVIET AND JAPANESE AEROSPACE LITERATURE		
Aerospace Medicine		634
Aerodynamics		635
