

HISTORICAL REVIEW PAPER

Octave Chanute and the Indiana Glider Trials of 1896	T. D. Crouch	769
--	--------------	-----

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Nd:YAG Laser-Based Dual-Line Rayleigh Scattering System	M. V. Ötügen, J. Kim, S. Popović	776
Incremental Potential Flow Based Membrane Wing Element	R. Smith and W. Shyy	782
Novel Method for Calculating Two-Dimensional Blade Vortex Interaction (TN)	R. J. Epstein, J. A. Rule, D. B. Bliss	909

FLUID DYNAMICS

Numerical Simulation of Receptivity Phenomena in Transitional Boundary-Layer Flows	S. H. Reitsma, V. P. Manno, T. F. Tureaud	789
Active Control of Panel Oscillation Induced by Accelerating Boundary Layer and Sound	L. Maestrello	796
Control of Vortex Pairing Sound	R. C. K. Leung, W. F. Chu, S. K. Tang, N. W. M. Ko	802
Flap Side-Edge Noise: Acoustic Analysis of Sen's Model	J. C. Hardin and J. E. Martin	810
Self-Contained Automated Methodology for Optimal Flow Control	R. D. Joslin, M. D. Gunzburger, R. A. Nicolaides, G. Erlebacher, M. Y. Hussaini	816
Nonlinear Second Moment Closure Consistent with Shear and Strain Flows	D. G. Pfuderer, C. Eifert, J. Janicka	825
Coupled Fluid-Structural Characteristics of Actuators for Flow Control	R. Rathnasingham and K. S. Breuer	832
Mixing Processes in a Coaxial Geometry with a Central Lobed Mixer-Nozzle	V. M. Belovich and M. Samimy	838
Difficulties in Sensitivity Calculations for Flows with Discontinuities	J. R. Appel and M. D. Gunzburger	842
Behavior of Wake Vortices Near Ground	A. Corjon and T. Poinso	849
Box-Length Requirements for Simulation of Sound from Large Structures in Jets (TN)	E. J. Avital and N. D. Sandham	912
Crossflow Vortices of a Jet Injected into a Supersonic Crossflow (TN)	J. G. Santiago and J. C. Dutton	915

STRUCTURAL MECHANICS AND MATERIALS

Vibration Suppression Using Acceleration Feedback Control with Multiple Proof-Mass Actuators	S. Matunaga, Y. Yu, Y. Ohkami	856
Optimization for Buckling of Composite Sandwich Plates	J.-S. Moh and C. Hwu	863

Table of Contents continued on back cover

CONTENTS—continued

Balance Technique for Monitoring In Situ Structural Integrity of Prismatic Structures	K. J. Peters and P. D. Washabaugh	869
Ballistic Impact of Thin-Walled Composite Structures	J. R. Vinson and J. M. Walker	875
Finite Element Model Update via Bayesian Estimation and Minimization of Dynamic Residuals	K. F. Alvin	879
Flow Characteristics and Shear-Layer Vortex Shedding of Double Concentric Jets ...	R. F. Huang and C. L. Lin	887
Statistical Experimentation Methods for Achieving Affordable Concurrent Systems Design	W. Chen, J. K. Allen, D. P. Schrage, F. Mistree	893
Instability of Lightly Damped Linear Nonconservative Systems	Y.-B. Yang, S.-R. Kuo, J.-D. Yau	901
Stiffness Matrix Adjustment Using Incomplete Measured Modes (TN)	O. Zhang, A. Zerva, D.-W. Zhang	917
BOOK REVIEW		
Review of <i>Unsteady Combustion</i>	K. Kailasanath	920
INTERNATIONAL AEROSPACE LITERATURE		
Russian Abstracts: Materials Microstructures		921
Japanese Abstracts: Materials Microstructures		925
German Abstracts: Materials Microstructures		929
United Kingdom Abstracts: Materials Microstructures		933
