

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Study of Adaptive Shape Airfoils at Low Reynolds Number in Oscillatory Flows (TN)	W. Shyy, D. A. Jenkins, R. W. Smith	1545
--	-------------------------------------	------

FLUID DYNAMICS

Numerical Simulation of Secondary Combustion of Hydrogen Injected from Preburner into Supersonic Airflow	S. Tabejamaat, Y. Ju, T. Nioka	1441
Upwind Scheme for Acoustic Disturbances Generated by Low-Speed Flows	J. A. Ekaterinaris	1448
Computational Method for Describing Porous Wall Boundary Conditions Based on Experimental Data	T. J. Beutner, Z. Z. Celik, L. Roberts	1456
Viscous-Inviscid Interaction Using the Navier-Stokes Equations	A. Filippone and J. N. Sørensen	1464
Application of Chimera/Unstructured Hybrid Grids for Conjugate Heat Transfer	K.-H. Kao and M.-S. Liou	1472
Practical Three-Dimensional Aerodynamic Design and Optimization Using Unstructured Meshes	J. Elliott and J. Peraire	1479
Simulations of High Knudsen Number Flows in a Channel-Wedge Configuration	T. X. Nguyen, C. K. Oh, R. S. Sinkovits, J. D. Anderson Jr., E. S. Oran	1486
Experimental Study of Acoustic Velocity Effects on Simulated Solid Fuel Pyrolysis	L. M. Matta, B. T. Zinn, J. I. Jagoda	1493
Inverse and Direct Airfoil Design Using a Multiobjective Genetic Algorithm	A. Vicini and D. Quagliarella	1499
Comparison of Explicit and Traditional Algebraic Stress Models of Turbulence	C. G. Speziale	1506
Closed-Form Modeling of Fluid-Structure Interaction with Nonlinear Sloshing: Potential Flow	J. L. Ortiz and A. A. Barhorst	1510
Numerical Solution of the Full Potential Equation Using a Chimera Grid Approach (TN)	T. L. Holst	1543
Improvements to a Dual-Time-Stepping Method for Computing Unsteady Flows (TN)	S. DeRango and D. W. Zingg	1548
Cascade Flow Calculations Using the $k-\omega$ Turbulence Model with Explicit-Implicit Solver (TN)	C. H. Choi and J. Y. Yoo	1551
Numerical Simulations of Three-Dimensional Trailing Vortex Evolution (TN)	R. E. Robins and D. P. Delisi	1552

STRUCTURAL MECHANICS AND MATERIALS

Dynamic Contact Analysis of Laminated Composite Plates Under Low-Velocity Impact	N. S. Goo and S. J. Kim	1518
---	-------------------------	------

Table of Contents continued on back cover

CONTENTS—continued

Dynamic Learning Rate Neural Network Training and Composite Structural Damage Detection	H. Luo and S. Hanagud	1522
Composite Patch Repairs of Metal Structures: Adhesive Nonlinearity, Thermal Cycling, and Debonding	W. T. Chow and S. N. Atluri	1528
Studies of Low-Density Freejets and Their Impingement Effects	B. Deependran, R. I. Sujith, J. Kurian	1536
Deflection-Voltage Model and Experimental Results for Polymeric Piezoelectric C-Block Actuators (TN)	A. J. Moskalik and D. Brei	1556
Comment on "Structural Damage Identification Using Assigned Partial Eigenstructure" (RF)	M. Baruch	1559
Reply to M. Baruch (RF)	B. S. Liebst and R. G. Cobb	1559
BOOK REVIEW		
Review of <i>Flow Simulation with High-Performance Computers II</i>	P. L. Roe	1560
