

## AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Vibrations of Elastically Restrained Nonuniform Beams with Arbitrary Pretwist . . . . .	S. M. Lin	1681
---	-----------	------

## FLUID DYNAMICS

Subsonic and Supersonic Jet Noise Predictions from Statistical Source Models . . .	C. Bailly, P. Lafon, S. Candel	1688
Scalar Transport in a Swirling Transverse Jet . . . . .	C. E. Niederhaus, F. H. Champagne, J. W. Jacobs	1697
Stability and Emissions of Lean, Turbulent, Premixed Flames with Very Lean Coflow . . . . .	J. C. Hermanson, M. B. Colket, J. J. Sangiovanni	1705
Analytical Study of the Oblique Reflection of Detonation Waves . . . . .	H. Li, G. Ben-Dor, H. Grönig	1712
Interference Between a Cylindrical Bow Shock and a Plane Oblique Shock . . . . .	V. Ya. Borovoy, A. Yu. Chinilov, V. N. Gusev, I. V. Struminskaya, J. Détery, B. Chanetz	1721
Experiments on Oblique Shock Interactions with Planar Mixing Regions (TN) . . . . .	D. R. Buttsworth, R. G. Morgan, T. V. Jones	1774
Monte Carlo Analysis of the Hysteresis Phenomenon in Steady Shock Wave Reflections (TN) . . . . .	G. Ben-Dor, T. Elperin, E. Golshtein	1777
Dependence of Steady Mach Reflections on the Reflecting-Wedge Trailing-Edge Angle (TN) . . . . .	G. Ben-Dor, T. Elperin, H. Li, E. Vasiliev, A. Chpoun, D. Zeitoun	1780
Stabilization of Supersonic Combustion by a Free Recirculating Bubble: A Numerical Study (TN) . . . . .	L. F. Figueira da Silva, V. Sabel'nikov, B. Deshaies	1782

## GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Some Practical Complete Modal Spaces and Equivalence (TN) . . . . .	D.-W. Zhang and F.-S. Wei	1784
---	---------------------------	------

## INTERDISCIPLINARY TOPICS

Two-Component Planar Doppler Velocimetry in High Speed Flows . . . . .	P. S. Clancy and M. Samimy	1729
Integrating Experimental Data and Mathematical Models in Simulation of Physical Systems (TN) . . . . .	B. A. Zeldin and A. J. Meade Jr.	1787
Application of Dual Sorption Theory to Pressure-Sensitive Paints (TN) . . . . .	J. P. Hubner and B. F. Carroll	1790

## STRUCTURAL MECHANICS AND MATERIALS

Model Update Using Modal Contribution to Static Flexibility Error . . . . .	K. K. Denoyer and L. D. Peterson	1739
Quantitative Prediction of Thermomechanical Coupling Effect in Thermo-Elasto-Viscoplastic Composite Materials . . . . .	E.-S. Shin and S.-J. Kim	1746

Table of Contents continued on back cover

## CONTENTS—continued

<b>Geometrically Nonlinear Theory of Multilayered Plates with Interlayer Slips</b> .....	M. Di Sciuva	1753
<b>Efficient Computation of Eigenvector Sensitivities for Structural Dynamics</b> .....	K. F. Alvin	1760
<b>Adaptive Topology Optimization of Shell Structures</b> .....	K. Maute and E. Ramm	1767
<b>Nonaxisymmetric Exact Piezothermoelastic Solution for Laminated Cylindrical Shell (TN)</b> .....	S. Kapuria, P. C. Dumir, S. Sengupta	1792
<b>Effective Mass Sensitivities for Systems with Repeated Eigenvalues (TN)</b> .....	A. Paolozzi and L. Pesek	1795
<b>Modal Data Are Insufficient for Identification of Both Mass and Stiffness Matrices (TN)</b> .....	M. Baruch	1797
<b>BOOK REVIEW</b>		
<b>Review of <i>Turbulence and Transition Modeling</i></b> .....	T. J. Coakley	1799
