Special Issue: Heat Transfer and Sustainable Energy Technologies

<i>Editorial</i>		
B. THONON	1657	Heat transfer and sustainable energy technologies
P. STEHLIK	1658	Heat transfer as an important subject in waste-to-energy systems
M. KUOSA, J. KAIKKO and L. KOSKELAINEN	1671	The impact of heat exchanger fouling on the optimum operation and maintenance of the Stirling engine
M. Z. I. KHAN, K. C. A. ALAM, B. B. SAHA, A. AKISAWA and T. KASHIWAGI	1677	Study on a re-heat two-stage adsorption chiller – The influence of thermal capacitance ratio, overall thermal conductance ratio and adsorbent mass on system performance
K. C. A. ALAM, M. Z. I. KHAN, A. S. UYUN, Y. HAMAMOTO, A. AKISAWA and T. KASHIWAGI	1686	Experimental study of a low temperature heat driven re-heat two-stage adsorption chiller
B. PALM	1693	Refrigeration systems with minimum charge of refrigerant
N. TSUZUKI, Y. KATO and T. ISHIDUKA	1702	High performance printed circuit heat exchanger
L. LUO, D. TONDEUR, H. LE GALL and S. CORBEL	1708	Constructal approach and multi-scale components
N. CANEY, P. MARTY and J. BIGOT	1715	Friction losses and heat transfer of single-phase flow in a mini-channel
J. E. STEINBRENNER, C. H. HIDROVO, F.-M. WANG, S. VIGNERON, E. S. LEE, T. A. KRAMER, C.-H. CHENG, J. K. EATON and K. E. GOODSON	1722	Measurement and modeling of liquid film thickness evolution in stratified two-phase microchannel flows
F.-M. WANG, J. E. STEINBRENNER, C. H. HIDROVO, T. A. KRAMER, E. S. LEE, S. VIGNERON, C.-H. CHENG, J. K. EATON and K. E. GOODSON	1728	Investigation of two-phase transport phenomena in microchannels using a microfabricated experimental structure
H.-M. HENNING	1734	Solar assisted air conditioning of buildings – an overview
V. TRILLAT-BERDAL, B. SOUYRI and G. ACHARD	1750	Coupling of geothermal heat pumps with thermal solar collectors
P. W. GRIFFITHS and P. C. EAMES	1756	Performance of chilled ceiling panels using phase change material slurries as the heat transport medium
